Subject: Asbestos Accreditation in Montana
Date: Monday, June 11, 2012 2:15:56 PM

The Asbestos Control Program would like to remind asbestos professionals working in Montana that accreditation to work in Montana must be obtained and renewed annually. This is in addition to the annual refresher courses. All accreditations expire one year from the date the course was completed.

Course providers: please remind your students that they must apply for state accreditation both after they have completed the initial course and after each annual refresher course.

Course Providers and Students: please note that refresher and initial courses provide you with a certificate, and that certificate then allows you to apply for state accreditation. Completion of the course does not mean automatic accreditation or automatic accreditation renewal. You must apply for and receive accreditation every year to engage in asbestos-related occupations in Montana.

If you have questions please call us at 444-5300 or you can review the Administrative Rules, which define this procedure, on our website.
