UPDATE! New Asbestos Program Rule Changes are in Effect

The Secretary of State published MAR Notice No. 17-317 in the Montana Administrative Register, Issue 20, regarding the Notice of Amendment, Adoption, and Repeal - Incorporation by Reference - OSHA Preclusion - Asbestos Project Management on October 27, 2011. When the Secretary of State has published the final rules, they will be available on its website at www.sos.mt.gov. For a working copy of the new rules, the department is working on an unofficial courtesy copy that combines the rule changes and the part of the old rules that remain in effect. Please check back for the posting of this document. Notification of the posting will be made through the program's List Serve and a note published on its web page. Sign up for the List Serve at http://svc.mt.gov/deq/ListServe/asbestosStep1.asp. The department is also providing the following links to the MAR Notice, Issue 20, and the Proposed Rules as noticed April 14, 2011.

- MAR Notice
- Issue 20
- Noticed Rule Changes

Also, with the new rule changes will be new forms. The program has developed three forms for notifications. All fields on the forms must be completed. With names, first and last name must be entered. Also, you must list the first and last name of a person who will be on site during the activities that the department may contact during program inspections of the site.

- Montana Asbestos Project Permit Application and Demolition/Renovation Notification, MTACP01. This is the long form for applications and notifications. (PDF) (Word)
- Montana Asbestos Project Permit Application and Demolition/Renovation Notification, MTACP02. This form is to notify of demolition activities in which the facility is being demolished and NO ACM has been identified in the facility nor is there any ACM being left in the building. If ACM is being left in the building, you must use Form MTACP01. (PDF) (Word)
- Montana Asbestos Project Permit Application and Demolition/Renovation Notification, MTACP03. This form is used for asbestos-related activities for ACM that is regulated. Activities covered by this form are listed under the "Type of Activity" section at the top of the form. This is the short form of Form MTACP01. Please note that the section for a demolition/renovation contractor has been removed. (PDF) (Word)
