The Board of Directors is happy to report that we have finally received official approval from the Department of Environmental Quality (DEQ) for the drain field project! See the attached approval notification along with the updated Certificate of Subdivision Approval (COSA). It has been a long journey but we are on the verge of actually getting the construction phase of this project underway. At the request of the Board, our engineer (Hafferman Engineering) is negotiating with the proposed contractor on the community's behalf regarding final estimates for construction, a schedule, and a timeline for payment. We will update you as soon as we have that information along with next steps, documents (such as the updated User Agreement, any applicable Deed Restrictions, etc.), payment schedules, and the like. If things go as we hope, you should be prepared to make your initial payments in as short as the next few weeks (or longer) depending upon finalization of the construction plan. We are still hoping to get construction done this fall.

The Timbrshor Board
