Montana DEQ and Western Energy Company. The Montana Supreme Court determined that DEQ properly interpreted rules implementing the Montana Water Quality Act (specifically ARM 17.30.637(4)). In so doing, the Court recognized that DEQ has the flexibility to exempt ephemeral waters from the water quality standards applicable to Class C-3 waters without the Board of Environmental Review reclassifying the waters. The Court also determined that DEQ lawfully permitted representative sampling of outfalls under Western Energy Company's MPDES permit. The Montana Supreme Court remanded the case back to District Court for further proceedings to determine whether DEQ acted properly in regard to a stretch of East Fork Arnells Creek that is potentially impaired and intermittent, whether it is necessary for DEQ to adopt a TMDL for impaired segments of East Fork Arnells Creek, and whether the representative monitoring selected by DEQ is factually supported.
