Re: Poplar Pipeline – DEQ Approval of Certification – Docket No. WQ-15-12

Dear Mr. Dundas,

On January 8, 2018, the Montana Department of Environmental Quality (DEQ) received a certification of compliance from Bridger Pipeline LLC (Bridger) stating that all activities required by the February 8, 2017 Administrative Order on Consent, Docket No. WQ-15-12 (Consent Order) were completed. Pursuant to Section XXIV of the Consent Decree, DEQ has evaluated the activities completed by Bridger, including the Supplemental Environmental Projects, and approves Bridger's certification.

The Consent Order is terminated except for the sections specified in Section XXIV. Unless new or undisclosed information is provided to DEQ regarding the discharge that constitutes a new or renewed basis for action, DEQ considers this matter closed. DEQ appreciates Bridger's cooperation during this process. Please let me know if you have any questions.

Sincerely,

A handwritten signature in blue ink, appearing to read "Thad Adkins", is written over a light blue horizontal line.

Thad Adkins  
Legal Counsel  
Montana Department of Environmental Quality
