

# CHARGE AHEAD MONTANA

David Williams  
Owner of a Chevy Bolt

**What made you decide to buy an electric vehicle?**

Environmental and climate change considerations.

**What has been your favorite part of owning an electric vehicle?**

It doesn't use gas and it's a blast to drive. It's a great little car.

**Have you had any problems with it during the winter?**

No. I knew the range would be impacted but it's been entirely manageable.

**What has been the most challenging part of owning an electric vehicle?**

Taking it on longer trips. I have a Subaru Outback, which only leaves the garage when it's a trip that would be a challenge for the Bolt

**Would you recommend an EV to someone considering buying a new car?**

Absolutely, they should test drive one if possible.

**What advice would you give to someone considering buying an electric vehicle?**

Do your research. They are great vehicles and almost any of them can do ninety-five percent of what most people use a car for.
