

Table 13
Excavation Volume Summary

Material	Quantity Pre-Quick Lime Addition cubic yards	Weight Pre-Quick Lime Addition Tons	Required Quick Lime Addition * %	Required Quick Lime Tons	Quantity Post-Quick Lime Addition cubic yards	Estimated Shrink/Swell %	Total Quantity in Respository cubic yards	Total Quantity of Tailing by Wiegth Tons	Notes
Unsaturated tailings (Moisture content >30%)	124,305	261,786	3	7,854	134,335	1	135,678	225,294	Place in repository and/or haul this volume off site.
Saturated Tailings (Moisture content <30%)	35,872	76,999	5	3,850	40,789	1	41,197	67,851	Place in repository and/or haul this volume off site.
Waste Rock **	34,150	0	0	0	34,150	15	39,273	NA	Volume of Waste rock to be removed and placed in repository.
Alluvium Sediment****	15,000	0	0	0	15,000	15	17,250	NA	Alluvium Sediment will be placed in repository.
Embankment materials and soil west	37,000	69,930	3	2,098	39,679	15	45,631	NA	Place in repository
Soil located within 25 feet of South side of Soda ButteCreek	3,500	7,513	3	225	3,788	15	4,356	NA	Place in repository
Total	249,827			11,704	224,274		283,385	293,145	

Materials	Density LBs/cubic foot
Unsaturated Tailings (bank conditions)	156
Saturated Tailings (bank conditions)	159
Waste Rock (loose conditions)	140
Quick Lime	58
***Unsaturated Tailings (post lime addition)	123
***Saturated Tailings (post lime addition)	122

* - Quick Lime addition based on bank conditins of tailings

** - The waste rock materials will not require quick lime ammendment.

*** - Denisty based on 3 day cure time. This assumes materials will be in the stockpile for minimum of three days.

**** - Assumes that 1 foot of alluvium sediment will be removed as part of the tailings excavation.
