RE: May – June 2015 Progress Report
Stimson Lumber Company, Bonner Cooling Pond Removal Project
Administrative Order on Consent, Docket No. SF-10-0001

Messrs. Large and Martin:

Pursuant to Section 81A of the referenced Administrative Order on Consent (AOC), this letter is submitted on behalf of Stimson Lumber Company as a monthly progress report for the preceding period of May 2015 through June 2015.

Compressor Building: Results from the test pits indicated low levels of PCB contamination surrounding the Compressor Building. Though the levels are low overall, in many instances the cleanup targets were exceeded. Borings inside the building footprint were conducted on June 4-8. Field modifications were made to the sampling to eliminate one internal boring and add several outside the test pit perimeter to delineate the outer bounds of contamination. Stimson is awaiting the sampling results.

Post-Remediation Monitoring: The contractor reports that the repository inspection has been done. Groundwater monitoring was completed during the week of June 8. We are awaiting the reports in both cases.

Respectfully Submitted,

STEVEN A. PETRIN
Environmental Manager
