Please publish the following legal advertisement one time in the Sunday, December 1, 2019, issue of the Helena Independent Record. Please note that the last line of the ad is a DEQ accounting code number that **must** appear in the ad. Please send the affidavit of publication, the tear sheet, and the bill to Autumn Daniels, Montana Department of Environmental Quality, Waste Management and Remediation Division, P.O. Box 200901, Helena, MT 59620-0901. Thank you for your assistance.

#### PUBLIC NOTICE

The Montana Department of Environmental Quality has issued the Record of Decision for the final remedy for cleanup of contamination at the Joslyn Street Tailings Facility located in Helena and Lewis and Clark County, Montana. The major components of the remedy include soil excavation and off-site disposal at a licensed landfill, monitored natural attenuation for groundwater, long-term monitoring, and institutional controls (ICs). ICs will include land use and groundwater restrictions for certain properties, and an existing IC limits disturbance of the existing on-site repository. The remedy was selected over other alternatives evaluated because it meets statutory requirements and is expected to achieve substantial risk reduction in a cost-effective manner. The Record of Decision is available for public review at the DEQ Waste Management and Remediation Division located at 1225 Cedar Street in Helena and at the Lewis and Clark Library located at 120 South Last Chance Gulch in Helena. It is also on DEQ's website <http://deq.mt.gov/Land/statesuperfund/rods>. For more information, please contact Scott Owen, DEQ Project Officer at (406) 444-6804, or [sowen2@mt.gov](mailto:sowen2@mt.gov).
