

# Montana Pole & Treating Plant

Site Update

FEBRUARY 2023

*Left photo: Construction of the engineered repository. Right Photos: Removing soils from the land treatment unit*

## POST-CONSTRUCTION

Construction is complete on the south side of the Montana Pole & Treating Plant site. Seeding will begin in Spring when the weather warms up.

Envirocon moved soils into an engineered repository and wrapped up construction in September of 2022. DEQ is coordinating with the Environmental Protection Agency (EPA) and Butte-Silver Bow to complete title research and survey the property to eventually allow for redevelopment. A portion of the property will remain in DEQ's control to ensure the remedy remains in place.

DEQ and the EPA are holding a neighborhood meeting on Feb. 28 at 6:30 p.m. to answer any questions and provide additional information. If you have questions or concerns please contact Dave Bowers at (406) 438-1171.

# COMMUNITY MEETING

Join DEQ and the EPA for a community meeting to hear updates on the Montana Pole & Treating Plant. The meeting will be accessible both online and in-person.

**Feb. 28, 2023 at 6:30 p.m.**

In-person: Silverbow Fire Training Center (350 Josette Ave, Butte)

Online: Access the online meeting via Zoom using

Webinar ID: 869 8993 2958

Passcode: 701646

Call-in: +1 206-337-9723

## PLANNING FOR PHASE 5

DEQ and the EPA will start planning for phase 5, addressing cleanup of the groundwater contamination, by identifying stakeholders and coordinating initial planning.
