

The Department of Environmental Quality is announcing fall 2015 training classes - [Montana Department of Environmental Quality \(DEQ\) - Compliance & Technical Support Section](#) **It is strongly encouraged to register as soon as possible.** Remember the BMP 101: Storm Water Management during Construction course or equivalent course is a mandatory prerequisite for all the advanced **BMP** level classes (102, 201, 202, and 301). Please be sure to attach one of the following items to the registration form for any advanced level course:

- 1.) A certificate of completion from the BMP 101 course
- 2.) A completed registration form with payment for an upcoming BMP 101 course
- 3.) A certificate of completion from an equivalent course

Course Descriptions

BMP 101: Storm Water Management during Construction – entry level class, prerequisite for all advanced level classes, great refresher on how to select and install BMPs, perfect for new storm water professionals

BMP 201: SWPPP Administrator – understand the roles, responsibilities, and expectations of a SWPPP Administrator, learn how to become successful and be compliant, meet the regulatory requirements for being a SWPPP Administrator

NEW CLASS: BMP 201: Re-Cert – maintain a valid certification, continue to build upon your existing experience and knowledge to make your programs successful, network with other SWPPP Administrators

BMP 202: SWPPP Preparer – learn how to properly draft a SWPPP for successful implementation in the field, perfect for storm water professionals

BMP 301: Conducting Storm Water Compliance Evaluation Inspections – learn how DEQ conducts inspections, set up your inspections in a similar fashion to ensure success, **being provided at the request of the MS4s**

Additional Training Information

All Classes Offer CEUs – 1 day = 0.8CEUs / 2 day = 1.6CEUs
