1	BEFORE THE BOARD OF ENVIRONMENTAL REVIEW
2	OF THE STATE OF MONTANA
3	
4	BOARD MEETING)
5	JULY 24, 2009)
6	
7	TRANSCRIPT OF PROCEEDINGS
8	
9	
10	Heard at Room 111 of the Metcalf Building
11	1512 East Sixth Avenue
12	Helena, Montana
13	July 24, 2009
14	9:32 a.m.
15	
16	BEFORE CHAIRMAN JOSEPH RUSSELL,
17	BOARD MEMBERS LARRY MIRES, HEIDI KAISER,
18	JOE WHALEN, and MARVIN MILLER
19	
20	
21	PREPARED BY: LAURIE CRUTCHER, RPR
22	COURT REPORTER, NOTARY PUBLIC
23	P.O. BOX 1192, HELENA, MT 59624
24	(406) 442-8262
25	

1	WHEREUPON, the following proceedings were
2	had and testimony taken, to-wit:
3	* * * *
4	CHAIRMAN RUSSELL: We'll start our
5	regular meeting now, and the first item on the
6	agenda is the review and approval of the May 29,
7	2009 Board meeting minutes, which were sent
8	separate, right?
9	MS. WITTENBERG: Yes.
10	CHAIRMAN RUSSELL: Any comments on those
11	minutes?
12	(No response)
13	CHAIRMAN RUSSELL: Seeing none, I'll
14	entertain a motion to adopt the minutes as
15	submitted.
16	MR. MILLER: So moved.
17	CHAIRMAN RUSSELL: Who wants to second
18	it?
19	MR. MIRES: I'll second.
20	CHAIRMAN RUSSELL: It's been seconded by
21	Larry. Any further discussion?
22	(No response)
23	CHAIRMAN RUSSELL: Seeing none, all
24	those in favor, signify by saying aye.
25	(Response)

CHAIRMAN RUSSELL: Opposed.

(No response)

2.4

CHAIRMAN RUSSELL: Motion carries.

MR. LIVERS: Mr. Chairman, before we leave administrative matters -- For the record, Tom Livers for the Department. Just for the record, we do have a new appointment to the Board. I think most Board members are aware of that. Larry Andersen, he's an attorney in private practice in Great Falls for several years, will be filling the seat. This is a quasi-judicial board, there is a requirement for an attorney, and he will fill that role.

Mr. Andersen, I spoke with him after his appointment. He had a prior commitment that prevented him from participating today. He was not able to change that. But he's looking forward to his term on the Board. So he will be joining us at the next opportunity.

And then also for the record, Ms.

Shropshire, Robin Shropshire called this morning.

She is at home sick, and not able to come in, but she did ask that if we had any concerns over a quorum, she would be able call in, and that didn't look like that was going to be the case.

CHAIRMAN RUSSELL: Thanks, Tom. The next item on the agenda are briefing items, contested case updates. Katherine.

2.4

MS. ORR: Mr. Chairman, members of the Board, I think the way I'll proceed here is if there is a development that needs some sort of amendment to what's stated on the agenda, I'll go over those.

The first one would be Item (d), which is in the matter of the appeal by Eastgate Water and Sewer Association of Helena Sand and Gravel, Inc. open cut permit. A hearing was scheduled for the next Board meeting of September 2nd, and that's being dismissed, and the Board will have a dismissal order before it for that meeting.

And in the next Item (e), III-A(1)(e), in the matter of the violations of the Montana Water Quality Act by Wilderness Club, LLC, and Wilderness Club Eureka, Lincoln County. There is pending before the Board -- and this is one of those cases where the Board retained jurisdiction -- summary judgment. A summary judgment motion was filed by the Wilderness Club, and this has been fully briefed at this point. The parties have waived oral argument.

And I would suggest as a matter of procedure, unless you feel differently, that I review it, write a proposed decision for you to adopt, and that would be on September 2nd. And unless you want to do it a different way, I would suggest that. So it's not something that we need to vote on, but I just -- is that okay?

2.4

CHAIRMAN RUSSELL: Sounds good to me.

MR. MILLER: Sounds good.

MS. ORR: And then the next matter, (f), why we don't we come back to that, because in this matter, there have been continuing requests for a stay, and this issue of whether or not to continue this stay that's been requested is before me because you've delegated prehearing matters, but I thought the Board would want to hear from the parties what their reasoning is pro and con issuance of a stay. And I'll hear that as well today. So we'll come back to that on the agenda.

On Item (g), this is one that is before me, been delegated to me, and the Department filed a motion for summary judgment, and this has also been briefed, and there is a ruling to be made on that, and I'll have that ready for the September meeting.

LAURIE CRUTCHER, RPR 406-442-8262

Yes.

of the board, I'm Gary Zadick. I'm the attorney

MR. ZADICK:

23

2.4

25

today?

Mr. Chairman, members

for SME. I'll give you a brief status of the permitting.

2.4

The notice asks the parties to give a status of construction and permitting affecting the coal plant. The coal plant, the owners of the land where the site has applied for rezoning. It seems like many years ago. Ultimately the Cascade County Board of Commissioners granted the rezoning. It was upheld by the District Court, and MEIC and the neighboring landowners have appealed to the Supreme Court. Notice was issued yesterday or the day before. Their appellant's brief is due in thirty days. So rezoning is still being litigated.

The air permit issue by DEQ and the CO2 part of it approved by the Board is on appeal to the District Court, Cascade County. The Judge from Lewistown is presiding over it. That process was stayed, and a similar request to stay it until November 2nd is pending before the Court, and has been briefed, waiting a decision from the Judge on whether to grant our request to stay further proceedings until November 2.

A similar request is before the BER on the PM2.5 determination by DEQ, and is being

appealed by MEIC. We've requested a stay until November 2, 2009.

2.4

Southern Montana has filed an application for a gas plant air permit at the same site. That's in process with DEQ. That's the reasoning behind this request for a stay.

Southern Montana is not in the position today to decide whether to abandon the coal permit or not. We need further processing of the gas permit before we can make those decisions. It affects financing, investment today by the owners, who are 40,000 or 50,000 Montanans who have a substantial investment in construction to date, and in the deposit to have a first queue on the transmission network. And so that's all tied into that. Those investments don't want to be lost -- we don't want to lose those investments, and affect the owners.

The construction onsite is not ongoing today because of these appeals and their impact on long term financing. Interim financing was obtained to build what was done to commence construction to that point, although there is still work ongoing under the Section 106 permit through the US Army Corps of Engineers. That work

is ongoing, because that affects water supply. It doesn't involve hard construction right now, but it's a review process under Section 106 of the water source, the facilities that might have to cross the river, transmission line, gas line.

2.4

So that's the status of construction.

And that's the purpose behind the request for a stay. It doesn't make sense to invest money, and experts, and gear up this hearing, until we know what's going to happen with the gas permit, and that's underway. Thank you.

CHAIRMAN RUSSELL: Questions for SME?
(No response)

CHAIRMAN RUSSELL: Thank you, Gary.

MS. HARBINE: Mr. Chairman, members of the Board, Jenny Harbine representing the Appellants in this matter.

SME has sought and obtained a temporary stay of the appeal proceedings in this matter, and is seeking further stay until November 2009 of the appeal proceedings, and MEIC requested the status conference to get clarity regarding the status of the Highwood Coal Plant that is the subject of this permit appeal, and also to address a fundamental inequity in SME's request for a

continued stay.

While initial press reports indicated that SME was abandoning its coal plant altogether in favor of building a gas plant, nothing that SME has said formally to this Board, to the two District Courts before which related matters are pending, or to DEQ, indicates that SME has given up its plans to build a coal plant.

In fact, SME's most recent submissions to DEQ with respect to its air quality permit application for a gas plant indicate that SME has not abandoned those plans.

The gas plant permit application is actually styled as a modification to the coal plant permit, and the gas plant is described as additive to the coal plant facility, not a substitute for the coal plant facility. Indeed, in that application, SME has modeled cumulative emissions from both the gas plant and the coal plant, contemplating that they might both be constructed at the same site.

So there is a real lack of clarity here regarding -- and confusion created by SME regarding the status of the coal plant and SME's intentions with respect to that plant. And unless

and until SME relinquishes its coal plant permit, or DEQ or this Board revokes that permit, MEIC's appeal of the Highwood Coal Plant permit is very much a live issue.

2.4

SME has already undertaken significant construction activities on the coal plant. Much of this construction was done even after SME announced that it would shift its focus from building a coal fired power plant to a natural gas plant, and much of that activity indeed took place after the Hearing Examiner first granted SME's request for a stay of these appeal proceedings.

While SME apparently is not engaged in construction activities at this moment, any suspension of work was done voluntarily by SME, and SME may begin construction again at any time. All this construction is happening pursuant to a permit that MEIC contends is unlawful.

In the meantime, if these appeal proceedings are stayed, construction may continue while MEIC is unable to pursue its legal claims before this Board.

And there are three ways that the Board can address this inequity. It may revoke SME's air quality permit for the coal plant, or direct

DEQ to consider such a revocation; it may prohibit construction of the coal plant while the stay of appeal proceedings is in effect; or the Board can simply deny SME's motion for a stay, and allow MEIC to pursue this appeal.

2.4

I'll advocate for revocation of the permit, and there are several reasons for that.

If SME does not intend to build this coal plant, then there is no reason for SME to hang on to this permit. Revocation, or SME voluntarily relinquishing this permit, would obviate the need for these appeal proceedings, and also not to mention the other cases pending before the District Courts in Helena and in Cascade County.

If SME does not intend to build a coal plant, there is no good reason for it to hang on to its permit, and there are policy reasons for that, too.

Allowing SME to retain its permit
effectively allows it to squat on its allocation
of the PSD increment for pollutants in the state.
While SME retains the permit, whether or not the
coal plant is actually constructed, SME retains
that allocation of the PSD increment for
particulate matter, nitrogen oxide, and sulphur

oxide, and meanwhile no other development projects may make use of that allocation.

2.4

If SME is still clinging to the hope that it might someday be able to build this coal plant, or wishes to retain this permit for transfer or sale at some later date, it would be skirting the purposes of the Clean Air Act to allow SME to retain this permit.

Whether SME retains the permit or has to undergo a new permitting process, it will need to update its Best Available Control Technology analysis in order to ensure that the maximum achievable emissions reductions are employed for this plant. If that's the case, under the existing permit, that would be the case if SME were to apply for a new permit.

The BACT analysis in the current permit is already stale, but at whatever point in the future that SME might find this project again feasible, that BACT analysis would be very outdated. So under either scenario, whether SME does intend to construct this coal plant, or retain the hope of constructing this coal plant, or whether it doesn't intend to construct this coal plant, there is no good reason for SME to

1 retain this air quality permit. 2 If the Board is inclined to grant SME's 3 stay through November, then we would respectfully request that the Board also require SME to cease 4 5 all construction activities at the site in order to prevent the inequity of MEIC's appeal not going 6 7 forward while construction continues. 8 I'll answer any questions. 9 CHAIRMAN RUSSELL: Thank you. Any 10 questions? 11 (No response) CHAIRMAN RUSSELL: I have one for our 12 attorney. Of the three options, there is only one 13 14 the Board has authority to do. We can't revoke a 15 permit. 16 MS. ORR: Right. 17 CHAIRMAN RUSSELL: There is two options 18 that were basically to revoke a permit. That's not our job. I think David --19 20 MS. ORR: It's not before us at this 21 point. 22 MR. RUSOFF: For the record, I'm David 23 Rusoff, attorney for the Department of Environmental Quality, and I just wanted to 2.4

address the agenda item which is the status of

25

SME's request for another stay of the contested case hearing, and the status of construction.

2.4

When SME contacted the parties prior to filing its most recent request for a stay, SME contacted the Department, and the Department's position was that it does not object to the requested stay. And I believe SME indicated that in its brief to Ms. Orr, and that is still the Department's position. We don't have any objection to continuing the stay.

CHAIRMAN RUSSELL: Thanks, David.

MS. HARBINE: If I may? Mr. Chairman, members of the Board, I wanted to address the Chairman's concern regarding the Board's authority to revoke a permit.

The Board does have authority to revoke a permit under ARM 17.8.763. You may revoke a permit or any portion of a permit at the written request of a permittee, or for violation of any requirement of the Clean Air Act of Montana, rules adopted under the act, the Federal Clean Air Act and rules promulgated under that act, or any applicable requirement in the Montana SIP.

There is precedent in the Board of Environmental Review which I'm happy to -- I'm

sorry -- the Environment Appeals Board of the Environmental Protection Agency, which I'm happy to provide to this Board, for denying permits under exactly this circumstance: Where there is a very remote possibility that a project will ever be constructed, a BACT analysis is in danger of growing stale, the project proponent is not diligently pursuing construction, and a PSD increment has been allotted to that project that's unavailable for other projects.

2.4

I would submit that under these circumstances revocation is appropriate, and the Department and the Board should consider that.

CHAIRMAN RUSSELL: Thanks.

MR. ZADICK: Mr. Chairman, may I respond to a couple of things? I have the press release here, and nowhere in it did Southern Montana say it was not building the coal plant. This is the only press release there has been. I'm happy to share it with the Board.

The amount of money invested to date in the coal project is about \$40 million, funded by Montanans. These multiple appeals have all been done without a request for a stay by the opponents, nor posting any security. That's an

issue probably for the next legislative session, what it does to a project. But there are no projects in Montana.

2.4

If you're worried about CFC's, there is none on the drawing board. The stay in November won't affect anything, and there is still room anyway, so that allotment isn't used up.

We've asked for a stay until November 10, and that's a reasonable request in light of the fact we've done double time to submit the air permit application on the gas plant. So I think our request is reasonable. Thank you.

CHAIRMAN RUSSELL: Board?

MR. LIVERS: Mr. Chairman, maybe before you get into questions, I guess I would just reiterate Katherine's opening that this decision has been delegated to her. It's been noticed not as an action item today, but a briefing item, so any discussion or certainly any direction would at best be informal.

CHAIRMAN RUSSELL: Good point.

MR. WHALEN: I have a quick question.

Madam, I'm sorry, I didn't get your name when you came to testify.

MS. HARBINE: Jenny Harbine.

MR. WHALEN: Jenny, you indicated there was a precedent set for permit revocation under circumstances very similar to this. What is that precedent?

MS. HARBINE: I have actually copies of two decisions here of the EPA Administrator,

Environmental Appeals Board, which the

Administrator has delegated authority. (Provides document) And I apologize. I don't have copies for all Board members. I have a few, and may submit copies at a later date.

MR. WHALEN: Okay.

2.4

MS. HARBINE: Although this arises in slightly different procedural circumstances, it's a situation -- both of these are situations, one in 1983 and one in 1999, in which a project, after a permit has issued, became infeasible. There were changed circumstances, either problems with property ownership for the project site, or permitting approval issues aside from the air quality permit.

And in both of these cases, the

Administrator, or the Environmental Appeals Board,

looked at the policy considerations underlying the

availability of the PSD increment, and looked at

2.4

the requirement that projects be diligently constructed. In the case of federal law, projects must be constructed, or construction must commence within 18 months after a permit is issued, and must be diligently pursued thereafter. That's the same as the permit condition that SME operates under here.

And they looked -- before there was any violation of that condition of federal law, the Administrator looked at the circumstances, said "There is no possible way that these projects are going to be able to comply with that requirement. We're just going to revoke the permit or deny the permit now." Does that answer your question?

MR. WHALEN: Thank you.

MR. ZADICK: May I respond?

CHAIRMAN RUSSELL: That's fine.

MR. ZADICK: The first decision here, In the Matter of the New York Power Authority, they failed to commence construction. We've commenced construction. Completely different circumstances. They're contesting that we commenced construction. That's another one of these appeals. But DEQ has determined we commenced construction.

The second one, the applicant sold the

property, and so they were asked to show cause why their permit shouldn't be revoked. We haven't sold the property. We've invested \$40 million in the project. We still own the property. Active construction, concrete, steel, isn't ongoing, but the Corps of Engineers permitting Section 106 that affects the water supply is ongoing. And so those activities are still ongoing and active.

2.4

If you don't secure your water source, that may be a problem, but we believe we've succeed in that, and all of these steps have to be taken in sequence. Thank you.

CHAIRMAN RUSSELL: I don't even play a lawyer after I stayed at a Holiday Inn Express, but both of these were remanded back to Administrators to make decisions, so I don't see that -- I think it's a stretch that we would have any authority to revoke a permit. And it says it's remanded to the Administrator, and back here it basically says the same thing. We're not the Administrator. DEQ is the Administrator.

MR. RUSOFF: Could I also respond briefly, Chairman Russell? Again, David Rusoff for the Department. I guess I just wanted to confirm your statement that the Board's

2.4

authority to revoke an air quality permit under certain circumstances; and if the Department makes that determination, the permittee has the ability to request a contested case hearing before the Board, and the parties would have the opportunity to file briefs on the applicable case law, and the facts related to particular situation. And that case might or might not be assigned to a Hearing Examiner, and then the Board would have to make a decision.

Administrative Rules provide the Department with

So I would caution the Board not to develop any preconceived ideas about a revocation of this particular permit, or what the law might be applicable to revocation of a permit prior to the issue actually coming before the Board. Thank you.

CHAIRMAN RUSSELL: Thanks. I've probably muddied the water enough, so I'm not going to say anything else. And this is a matter really of Katherine's. Is there anything else that the Board would like to informally pronounce? Formally and informally pronounce?

(No response)

CHAIRMAN RUSSELL: Seeing none, thanks

for your time today. We'll see what Katherine comes up with.

Katherine, back on the agenda.

MS. ORR: We are on item III(A)(2), which is cases in litigation. And I think the summaries here sort of speak for themselves.

In the first matter, which is the Thompson River CoGen appeal, a reply brief was filed with the Supreme Court on July 13, 2009.

In the second matter, which involves the appeal of the Board's ruling on CO2, I don't have anything to add other than what's been placed on the agenda.

CHAIRMAN RUSSELL: Thank you. Why don't we take a quick break.

(Recess taken)

CHAIRMAN RUSSELL: We're going to go ahead and get started. The first item is the proposed rulemaking to the Gallatin River Outstanding Resource Water. Tom, are you going to take this one?

MR. LIVERS: Mr. Chairman, Bob Bukantis is going to make a presentation for the Board, but maybe just a quick little bit of history. There is quite a bit of history associated with this.

The Board is being asked by the

Department to extend the public comment period,

and that's a means to essentially extend the

rulemaking so that the discussions can continue.

We've got obviously a couple new Board members for

whom this is a new issue, and actually we'll have

three, so likely at one of the next meetings,

we'll do a little more background.

I know a couple of the Board members have heard some background on this issue, but we'll probably be looking at another extension, just given the timing of the rules, as early as the December meeting; and by that time, prior to that action, we'll spend a little more time giving a briefing on the issue, how it came to be, what the key points are, where we're heading with that.

CHAIRMAN RUSSELL: And the concept of extension is not to let this thing just fester.

It's actually moving forward from the parties, right?

MR. LIVERS: It is, and it's at the request of the parties. And Bob can probably talk in a little bit more detail about that. But essentially it's had good consequences, and the discussions are ongoing. They've got a process in

place, and this just keeps the rulemaking alive while that happens, but it also gives the time for that to run its course.

2.4

CHAIRMAN RUSSELL: Thanks. Bob.

MR. BUKANTIS: Mr. Chairman, members of the Board, my name is Bob Bukantis, and I supervise the Water Quality Standards Section for the Department of Environmental Quality. And as Tom indicated, I'm here just to really briefly go over the Gallatin ORW, extension of the public comment period that's before you.

So in your packets, in addition to the executive summary, you've got a draft

Administrative Register notice to extend the public comment period to the 20th of November, and also a copy of the comment letter submitted by the Greater Yellowstone Coalition requesting extension of the public comment on this rulemaking.

Just very briefly, I'll summarize the background and context of this, especially given, as Tom indicated, we're thinking that we will be coming back to you, and explaining this in more detail in December, assuming you agree with us to extend the public comment period.

But basically what ORW designation means

is it's a designation to provide the highest level of water quality protection available under Montana's law to a water, in this case the Gallatin River between the Park and Spanish Creek.

18

19

20

21

22

23

2.4

25

And again, this issue first came to the Board through a petition from American Wildlands in December of 2001, so this has been going on for quite awhile, and that petition precipitated a series of Board and Department actions, which included an EIS, a public hearing by this Board in Gallatin Gateway, and a draft rule, which just to summarize the draft rule, the rule would identify the Gallatin as an ORW, Outstanding Resource Water; and it would also clarify the Department has authority to regulate all new or increased sources of pollution with direct hydrologic connection to the Gallatin River, as well as clarify that any new restrictions would not apply to any permits that had been issued prior to the rule going into effect.

The initial public comment period closed on November 2nd, 2006. We received quite a bit of comment, and there was quite a bit of opposition to the ORW because it would render some Big Sky properties undevelopable in the eyes of many.

And so there was a move to develop a collaborative group which became known as the Wastewater Solutions Forum, which has been moving forward with trying to seek alternatives that would provide the Gallatin with water quality protection that would be as good or better as would be envisioned from the ORW.

2.4

So the Department has agreed to support that collaborative moving forward. There was a meeting, I think, within -- well, I know within the last couple of weeks, where some of the Department members were involved. I think things have slowed down a little bit because of the economic situation, but things continue to move forward, and you do have that letter from GYC asking to extend rulemaking, which we support.

So with that, I'll leave you with just saying that the Department supports extending this rulemaking until the 20th of November, and this item would be then back before you in the December meeting. I'd be happy to answer any questions if you have any, and there is also a couple folks here in the Department that have been involved with various aspects for back up if necessary.

CHAIRMAN RUSSELL: Thanks, Bob. We will

at some future meeting, before this is all closed, the Department will put a nice briefing matter together, some nice maps, understanding what the rules are trying to do?

2.4

MR. LIVERS: Mr. Chairman, we have done that periodically, as you know, but I think what we're envisioning at this point is maybe the December meeting, since the six month extension will be up prior to the January meeting.

We'll probably need to take action. We anticipate action, again, to extend in December, and we would have a briefing prior to the action item where we go into more detail, more depth, a little more on the history; but also we've done a Power Point before that shows the footprint for the hydrologic connection, and I think that's what we've got in mind.

CHAIRMAN RUSSELL: Great. So are there any procedural questions that the Board would have, so we don't really run into this water quality issue, and the matters, and the boundaries, and all those things?

(No response)

CHAIRMAN RUSSELL: Thanks, Bob. Questions before we proceed with this?

1	(No response)
2	CHAIRMAN RUSSELL: If none, I will
3	entertain a motion
4	MR. LIVERS: Do you want to take public
5	comment?
6	CHAIRMAN RUSSELL: Is there anyone out
7	in the audience that is actually not a DEQ person
8	that would like to extend a comment on this
9	matter?
10	(No response)
11	CHAIRMAN RUSSELL: Seeing none, I will
12	entertain a motion to actually to adopt a new
13	notice, and extend the comment period to November.
14	MS. KAISER: So moved.
15	CHAIRMAN RUSSELL: It's been moved by
16	Heidi. Is there second?
17	MR. MILLER: I'll second.
18	CHAIRMAN RUSSELL: Seconded by Marvin.
19	Is there any comment?
20	(No response)
21	CHAIRMAN RUSSELL: Questions? All those
22	in favor, signify by saying aye.
23	(Response)
24	CHAIRMAN RUSSELL: Opposed.
25	(No response)

CHAIRMAN RUSSELL: Thank you. The next item on the agenda is the potential amendment to Administrative Rules of Montana 17.38 Chapters 1 and 2, Public Water Supplies. It must be Gene.

Our new Charles Homer.

2.4

MR. PIZZINI: Good afternoon, ladies and gentlemen, Chairman Russell, members of the Board. For the record, my name is Eugene Pizzini, and I'm the Rules Coordinator for the Public Water Supply Section.

The Department has proposed amendments to the Administrative Rules of Montana Title 17, Chapter 38, Subchapters 1 and 2, Public Water and Sewage System Requirements. The proposed amendments are necessary to amend existing rules to incorporate new statutory requirements related to regional water systems, adopt new rules to incorporate new federal requirements related to groundwater sources, disinfection byproducts, and surface water sources; amend existing rules to reduce requirements that are more stringent than existing federal requirement related to treating groundwater, sanitary surveys, and residual disinfectants; and to amend existing rules to repeal sections that are not authorized by

statute.

As a condition of primacy with the
United States Environmental Protection Agency,
Montana is required to have rules no less
stringent than the applicable federal rules. The
policy of the Montana Legislature has been for
State agencies to retain primacy over
environmental and public health programs.

The proposed amendments to Title 17, Chapter 38, Subchapter 1 are necessary to incorporate new statutory requirements for the review of regional water supply systems, Section 1, Chapter 449, laws of 2009. This actually came in under House Bill 556.

The new provisions will apply to regional water supply systems for which a final engineering report has been approved by United States Bureau of Reclamation. For these projects, the statute requires a shorter time for Department review of plans and specifications, a longer life for plan approvals after approvals are issued by the Department, and a project life approval for project documents other than design plans and specifications. All other requirements in the subchapter apply to these projects except as

specifically modified by these amendments.

2.4

The proposed amendments to Title 17,
Chapter 38, Subchapter 2 include the proposed
adoption of four new federal rules. The new
federal requirements include the groundwater rule,
the initial distribution system evaluation rule,
the Stage 2 disinfection byproducts requirements
rule, and the enhanced treatment for
criptosporidium rule. All applicable public water
supply systems are subject to the new federal
requirements under federal rule.

The Department proposes to adopt these new requirements by reference with no changes.

The proposed new rules are necessary to allow the Department to enforce public water supply laws and to retain primacy for the enforcement of the Safe Drinking Water Act.

Proposed changes to the existing rules or to accommodate the new federal requirements and Department resource issues. The groundwater rule requires systems with susceptible sources to provide treatment that achieves inactivation or removal of 4-logs of viruses. The existing rules only allow for inactivation. The existing rule requires systems that chlorinate to maintain a

minimum .2 milligram per liter residual at all points in the distribution system.

2.4

As these systems are subject to the disinfection byproducts requirements, there is a potential for systems to create compliance issues with the federal rules while complying with Montana's more stringent rules.

The Department is also proposing to reduce existing sanitary survey frequencies to more closely match that of the federal requirements.

The Department proposes to repeal rules that it does not have specific statutory authority to enforce. These rules were carried over from the break-up of the Department of Health and Environmental Sciences. Those portions of these rules that the Department does regulate are codified under other rules.

The other revisions are necessary to provide consistency and clarity in the implementation and enforcement of existing rules with existing statutory requirements.

The Department recommends appointment of a Hearings Officer and initiation of rulemaking.

I am more than willing to answer any questions.

CHAIRMAN RUSSELL: Thanks. I have one, but I'll wait. Any questions for the Department, Gene?

(No response)

2.1

2.4

CHAIRMAN RUSSELL: When I read through this, you talk about the two parts per million residual, and then in the other area, I couldn't find -- you talk about disinfecting agents. Is there somewhere in there that shows the equivalency between chlorine and other agents that are listed? And we all know there are standards for those. Why aren't they done by potential instead of by chemical?

MR. PIZZINI: Mr. Chairman, members of the Board, I guess the easiest way to answer that is in reality, the way our current rule is set up, we require systems to have a minimum .2 milligrams per liter when they use a chlorine form disinfectant. If you have been on the Board long enough, once upon a time, that section of our rules was the chlorination rule. Well, in order to allow systems to use another form of disinfectant such as UV, we had to make it the disinfection rule.

So in reality, I think your question is

taking two of the components that we're doing and try and push them into one, and I'll try to explain that.

2.1

2.4

We have the .2 chlorine residual requirement existing under the current rule. The groundwater rule, which is the new federal rule requirement that's coming in, may require a groundwater source to disinfect its source and achieve 4-log virus inactivation prior to the first user. It has no subsequent language or residual out into the distribution system.

Montana was actually proactive years ago when they created this disinfection rule, and allowed the Department to require some groundwater systems to install chlorination and then disinfection. We did not have the 4-log component. So our answer to that was we said, "You have to have a minimum residual out in the distribution system. That way we know that everybody has water that's being disinfected."

The problem with that is the first user on the system may not have water that's been in contact long enough with the chlorine to achieve the 4-log virus inactivation.

So to resolve the stringency between our

rules and the new federal rule, we're doing away with the .2. A groundwater system that's triggered into disinfection under the groundwater rule will not have to maintain a residual out in the distribution system.

2.4

Part of what we're removing with the .2 is Montana was also more stringent than the federal rule for surface water systems. The surface water rule says that a system basically must have a detectable level out in all points of their distribution system. Montana used .2 as a qualitative number as opposed to having -- or excuse me -- quantitative as opposed to just saying detectable, because it was so wide open.

One of the concerns with requiring that level is that in order for a large system, or a system with large distribution, to push it out to the farthest points, they're going to have a lot initially. That large quantity initially has the potential to cause disinfection byproducts issues. And so in an effort to try to make it easier for systems to comply with that, we're proposing to do away with the .2.

The .2 will remain under some circumstances. A groundwater system that's

required to supply full-time disinfection, and for some reason if the Department determines that there is a distribution system issue -- such as multiple leaks, loss of water through the system, the system is unable to maintain pressure, the system has a recurring problem out in the distribution system -- then we will require them to maintain a residual, and that residual will be the .2.

2.4

I would have is New Rule IV on criptosporidium.

What I know of criptosporidium, it takes a lot of disinfection agent to inactivate it, and if you're filtering it, you have basically have to filter it through something like a concrete slab. How is that going to buck up against the disinfection byproduct rule?

MR. PIZZINI: Chairman Russell, members of the Board, the enhanced treatment for criptosporidium is otherwise known LT-2, long term two.

When EPA wrote their rules to implement the Safe Drinking Water Act back years ago, they wrote the surface water treatment rule. That rule is mainly designed to deal with Giardia and

criptosporidium, which for the reasons you stated, difficulty of inactivation through a chemical treatment, is why the surface water treatment rule requires mechanical, as well as chemical treatment. You use filters to take as much of it out as you can; you use chlorine as a disinfectant on the other end to try and catch the remainder. The surface water treatment rule requires 3-log inactivation/removal of cripto.

2.4

The LT-2 is the next step, and what it's doing is the general intent is to improve the ability, or to raise the bar on what the systems have to do to ensure that they're removing cripto. They do that by monitoring and doing some treatment changes. So yes, cripto is extremely difficult to inactivate with chlorine under the wrong water -- wrong being right in this case.

Water quality parameters, you could be talking 30 minutes to get an inactivation.

So that's why they have the filtration requirement. This is just the next step in their progression on how they're going to deal with these things.

CHAIRMAN RUSSELL: Just a quick question. Are there any large public supplies

that are pretreating before they filter at this time, prechemical treatment? Sometimes that will help with disinfection byproducts. I was wondering.

2.4

MR. PIZZINI: Chairman Russell, members of the Board, the disinfection byproducts is mainly going to be dealt with under Stage 2. Surface water systems that optimize their surface water quality facilities, depending on the type of plant they have, have the ability to remove some of the precursors, the organic carbon that's in the water, that type of stuff.

LT-2 -- or excuse me -- Stage 2 is dealing with -- Stage 1, when it came out, dealt with the larger systems. Stage 2 is now applying those disinfection byproduct removal requirements and monitoring down to the smaller systems.

So yes, a change in some treatment plants -- And there is a whole array of various treatments that you can use, whether it's direct, indirect, and so they can change the way they're doing things. I don't know what we have for systems currently that are doing pretreatment. I can find out if you --

CHAIRMAN RUSSELL: Just to --

1	MR. PIZZINI: Just to harass me.
2	CHAIRMAN RUSSELL: Just a little
3	harassment. Are there any questions for Gene
4	before we release him?
5	(No response)
6	CHAIRMAN RUSSELL: Thank you.
7	Any other questions?
8	(No response)
9	CHAIRMAN RUSSELL: Seeing none, I would
10	entertain a motion to initiate rulemaking and
11	appoint Katherine
12	MS. ORR: That would be fine.
13	CHAIRMAN RUSSELL: as the Hearing
14	Examiner. Do I have a motion for that?
15	MR. WHALEN: Mr. Chairman, I move to
16	initiate rulemaking, and appoint Katherine Orr as
17	our Hearings Officer.
18	CHAIRMAN RUSSELL: Is there a second?
19	MR. MIRES: Second.
20	CHAIRMAN RUSSELL: Seconded by Larry.
21	Further discussion?
22	(No response)
23	CHAIRMAN RUSSELL: Seeing none, all
24	those in favor, signify by saying aye.
25	(Response)

CHAIRMAN RUSSELL: Opposed.

(No response)

2.4

CHAIRMAN RUSSELL: Motion carries. We have another Department request to initiate rulemaking on ARM 17.30.201.

MS. CHAMBERS: Thank you, Mr. Chairman, members of the Board. Thanks for giving me the opportunity to follow Geno. My name is Jennie Chambers, and I am Chief of the Water Protection Bureau.

The Department requests the Board concur with the recommendation to initiate rulemaking to amend ARM 17.30.201. These are rules that are pertaining to the permit fees associated with water quality discharges.

The Montana Water Quality Act requires the Board to adopt rules that are sufficient to recover the cost of issuing permits, licenses, or other authorizations issued by the Department, as well as any costs that are used to administer the operating program of the budget.

The program is operating -- our current fee schedule, which became effective February 15, 2002, so we haven't had a fee increase since the 2002 time frame. In preparing these fee rule

packages, we used specific data on permits that we currently issue or expect to manage in the future, and this was consistent with our statutory requirements under MCA 75-5-516.

I just want to give you a quick overview, I guess, of the Water Protection Bureau, and why we're going forward with the fee increase, and ask the Board to initiate rulemaking.

The Water Protection Bureau currently has 26 FTEs that are covered under this fund source. Personal services just to cover staff is 1.8. We have very limited operating cost, and have reduced it drastically just to maintain our budget where it current is. Our operating budget is only \$460,000. Our current revenue from fees brings in 1.7. It's not even enough to cover our staff, let alone any kind of operating expenses.

Our total budget remains at status quo

2.4. We haven't changed -- basically gone to the

legislative session and asked for additional

funding to try to raise our spending authority,

basically 2.4 just to maintain our current budget.

We do get additional revenue, but it's very limited. We get a PPG grant, which is from EPA, just to administer the program. Based upon

our primacy package, that's a little over \$300,000, \$324,000.

2.4

We get some cooperation and some money from Planning Division, which is another division within the Department of Environmental Quality, \$97,000. That is basically to fund one FTE for nonpoint source work associated with water quality discharges; coordinate with Army Corps of Engineers, Fish, Wildlife and Parks, and be the liaison with the Department in those activities.

And then we get very limited General Fund, \$60,000 currently. However at this last legislative session, basically we're sitting on the side of the table wondering whether or not we were going to maintain that \$60,000 or not. So in this budget projection, we basically didn't account for General Fund because it's not something that we can count on going forward in the future.

So we needed to make up the difference somehow in our fee structure. There has been no increase in fee. If we have no increase in fee to move forward in 2010, we would have basically \$70,000 to carry forward on our fees. So \$70,000 plus the 1.7 we bring in would not be enough to

cover the program. In 2011, we would have \$560,000 in the red, so we'd be in a deficit \$560,000.

2.4

Basically to get this package, based upon hard economic times, we knew that this fee increase might impact our stakeholders. We have done an informal review and stakeholder involvement with informal comments during the drafting process. We will continue to work with those folks, get responses back to them during the informal process, which is not mandatory, but it's definitely something we want to move forward with.

In addition, two presentations to the Water Pollution Control Advisory Council who agreed with the Department's initiative to move forward; also gave some recommendation as to whether or not we'd go for a large increase at this time, which is looking about a 30 and 40 overall program increase, or do incremental changes and come back to the Board each year.

So with this particular package, if we move forward, it's about a 30 to 40 percent increase, and then we probably shouldn't have to be back in front of the Board until 2013, so it will carry us forward at least during the next

biennium.

2.4

The four major proposed amendments are increasing both application and annual fees for permits and authorizations, establishing fees based on volume discharges for groundwater discharges to make it more equitable for groundwater discharges compared to surface water discharges. We also establish fees for administrating the process of permit related submittals.

One example on No. 3 here is if we get application from a permittee for authorization to degrade, which is a very complex process, we currently do not have a fee associated with that. If somebody came into the Department, a mine or a new industry or something, that knew they weren't going to have a similar capacity to discharge in that receiving water, and needed to apply for authorization to degrade, I'd have to allocate staff and resource in our operating budget to supply or to review that request. We thought it would be prudent to have a fee associated with that to try to recover, recoup some of those costs.

In No. 4, we just added text in the

rules to clarify how the fees are assessed under the fee schedule. As you see from the package that was provided, the rule package, these fee packages are fairly complex, so we want to add additional language to try to clarify things.

2.4

The MAR notice that you have been provided for the proposed revisions. The Department requests the Board concur with this recommendation to initiate rulemaking, and to appoint a Hearings Officer for the public hearing. I'd be happy to answer any questions.

CHAIRMAN RUSSELL: I have one question.

Under the storm water permit area, it's still a

per outfall, even though --

In a lot of cities, Kalispell being one, they're basically not -- there are a lot of storm water systems for parking lots that are not being tied into the existing storm water system collection. Are those things going to be subject to this rule?

MS. CHAMBERS: Mr. Chairman, members of the Board, I'm a little confused on your question. Are you referring to the storm water section under MS-4, and this is little separate storm sewer systems, and that those are based upon outfalls,

and those are for small MS-4s within Montana, which we only have a handful, about nine of them, which is more than a handful unless you have nine fingers. But about nine of them.

2.4

So basically the city is required, based upon MS-4, by having a plan to cover, to be compliant with general permits with MS-4s, to set up their own local ordinance based on how they do storm water in a particular area, or urban area of development.

So it would be our recommendation from the Department to have the City of Kalispell set up ordinances within their local area to ensure that those storm water drainage systems either comply with the city requirements, hook up to city sewer systems, or maintain their storm water runoff from the particular area or site.

CHAIRMAN RUSSELL: So what would be a definition of an outfall then?

MS. CHAMBERS: An outfall is defined as point source or area of disturbance where runoff all maintains. Under storm water, it's a little bit different, because it's not a point source activity. However, under the EPA Clean Water Act, storm water is considered a point source.

2 definition is in the packet, but it could just be 3 referenced on additional, another rule source. 4 define an outfall as a receiving water, state 5 receiving water, so if --CHAIRMAN RUSSELL: Nothing short of 6 7 that? 8 MS. CHAMBERS: Right. 9 CHAIRMAN RUSSELL: Groundwater would be 10 considered a state receiving water? I'm just 11 trying to get to -- Some of our systems in Montana 12 use dry wells. Is that an outfall? MS. CHAMBERS: That's an outfall under 13 the groundwater, requirements of the groundwater 14 pollution control system, so that indeed maybe 15 16 would need a groundwater pollution control system permit, or a permit coverage in the UIC program 17 18 that was brought up earlier. But as far as storm 19 water, it's surface water runoff that would 20 potentially impact or cause harm on surface water, 21 receiving waters. 22 CHAIRMAN RUSSELL: That helps. MR. WHALEN: Mr. Chairman. Ms. 23 2.4 Chambers. My question would be: Are there new

We define outfalls -- and I think the

1

25

categories that have been inserted into the fee

Thanks.

schedule as a result of this review?

MS. CHAMBERS: Mr. Whalen, members of the Board, we have clarified some areas that have added some new categories. Some areas that we have changed is groundwater is now set up by volume or flow.

That used to be just an industrial or domestic, but we tried to break those out to be more representative of populations of groundwater discharges, which are some large subdivisions or even the City of Belgrade, that would pay an equitable amount of rate compared to like a surface water discharge, like the City of Deer Lodge.

Plus we added some additional categories, for instance, the authorization to degrade is a new category. We looked at adding -- we have another category for others, just in case some new general permit gets developed that we didn't have a category associated with that, that we have a place holder for those.

In addition, we added another category for resubmittal of application fees, and then maybe an administrative processing fee. We do have some permittees that will submit an

application; we have staff review those, look at them for completeness; call them deficient; continue to work with the permittee to try to get the application complete; then a year or two years later, they'll submit a whole brand new application, and call it under their existing permit. However, everything that we reviewed has totally changed.

2.4

So we would probably charge those folks a resubmittal application fee, just to allocate the time that it's going to take to rereview a totally new application, in our eyes, but a concurrent application in the permittee's eyes.

MR. WHALEN: I have a follow-up. In setting up this rate increase schedule, I'm noticing some discrepancies between point versus nonpoint sources. There is a couple of cases where point sources have not risen, but nonpoint sources have. What was the thinking in terms of changes to the way that these fees were structured relative to point versus nonpoint?

MS. CHAMBERS: Well, in the eyes of the Clean Water Act, anything that we regulate within the Water Protection Bureau is considered a point source, so I just want to clarify that. So in the

Clean Water Act, stormwater is a point source type of activity. We also look at the volume and concentration and the potential for the pollutants that they're to going to discharge.

In stormwater construction, for instance, that would be turbidity, how much volume of the site contributed to the impact of the receiving waters. We looked at a little bit of that.

However, the big hurdle, I guess, that we had was on the point sources, which would be the individual MPDES permit holders. We were reaching our statutory cap. Under the MCA requirements, we have a statutory cap of five thousand, so we don't have much wiggle room as far as going any higher to make it more equitable on there as far as the increase. We only had the other activities that we weren't at that cap to kind of play with.

MR. WHALEN: Thank you. One more follow up. I guess I understand the bind that the Department or the Bureau is in with respect to trying to catch up on revenues in order to justify operations.

But speaking for myself, I would say

don't feel bashful about coming to the Board with much more nominal fee increases on an annual basis as opposed to a big lump sum fee increase of 30, 40 percent system-wide. Politically it's a lot easier to digest those small increases. At least at the local level, if we're going to raise our water rates, if we've got to raise them 50 to 60 percent, we've got a real issue with ratepayers; but if we come in on an annual basis, and do a 2 or 3 percent increase in order to maintain operations, that makes everything a lot more palatable.

2.4

And I'm kind of interested to hear if you've heard from municipal water users relative to this new fee structure.

MS. CHAMBERS: Mr. Whalen, members of the Board, yes, we had sent these draft rules to the League of Cities and Towns, actually did a presentation in front of those. There is some smaller municipalities that are represented on WPCAC, so they also heard the presentation.

I would agree with you and echo that, that it's not good program management as far as waiting seven years to come in for a fee increase. So even though these rules may carry us to 2013,

it wouldn't be prudent to wait until that time frame when we're in dire straits in order to get a fee increase.

2.4

So to get in the cycle of when we go to the legislative session, get our spending authority to get us covered for the next two year biennium, I would propose that my bureau would also go forward with the fee increase, evaluate our budget at that time, and go on an every two year cycle to also be able to communicate that to the municipalities on our regulated community as far as our permittees.

MR. WHALEN: Thank you, Mr. Chairman.

CHAIRMAN RUSSELL: I have a couple. You try to establish your fees based on what it takes to do the work, with the exception of suction dredging, as it appears. It's really nice that you're basically going to nail nonresidents of Montana with a higher fee. I like that. I guess I'm on the record as saying that.

Somewhere in your narrative, you also mentioned that there is \$400,000 that you're not sure you're going to have in your program. What was that all about?

MS. CHAMBERS: Mr. Chairman, I'm not

LAURIE CRUTCHER, RPR 406-442-8262

sure where the \$400,000 reference is coming from.

2.4

CHAIRMAN RUSSELL: I don't either. I couldn't find it. Maybe it was another rule, but there is only the fee rule in front of us, isn't it?

MS. CHAMBERS: That's correct. Mr.

Chairman, members of the Board, I guess I'd like provide a little bit of clarification. Yes, the cost of managing the program, the fees are supposed to be assessed in order for us to manage our program. Suction dredge -- and it wasn't my idea to charge residents more than nonresidents.

That was put in the statute up in the legislative session years ago, and so we would have to go back to them in order to get that changed.

Plus CAFOs is also other area that is locked in statute, and that we were working with the stock growers and some of our group in order to evaluate that particular fee. That is not commensurate based upon what it takes to review a CAFO application, or do compliance on a CAFO particular site.

The \$400,000 section, I'm not -CHAIRMAN RUSSELL: That's all right.

MS. CHAMBERS: -- totally clear. But it

could be that we are seeing a decrease in applications. From 2008 to 2009, we have seen a 20 percent decrease in applications, and so we did look a little bit at what we currently have and what we expect to manage in the future. With the economic downturn, even the Department sees reductions on stormwater applications. That trickles down to our bureau because we don't get the storm water construction applications in either.

2.4

So we are looking at loss of revenue potentially in the future with the downturn in the economy.

CHAIRMAN RUSSELL: Any other questions?

MR. LIVERS: Mr. Chairman, just looking at the summary on this rulemaking, I think we might be mixing a couple of numbers. I think there is a reference to, "Currently unknown is a \$60,000 State General Fund appropriation would be available in the future," and then there is, "In addition to approximately \$2 million permit fee revenues, there is another approximately \$400,000 between some State special revenue funds and federal grants."

CHAIRMAN RUSSELL: I was just reading

1	too fast. Thanks for clarifying that for me.
2	MR. LIVERS: I think Mr. Mires might
3	have caught that as well.
4	CHAIRMAN RUSSELL: Any further
5	questions?
6	(No response)
7	CHAIRMAN RUSSELL: Thank you. Seeing
8	none, Katherine, are you up for this one, too?
9	MS. ORR: Yes, that would be fine.
10	CHAIRMAN RUSSELL: I would entertain a
11	motion to initiate rulemaking, and appoint
12	Katherine as the Hearing Officer.
13	MR. MIRES: So moved.
14	CHAIRMAN RUSSELL: It's been moved by
15	Larry. Is there a second?
16	MS. KAISER: Second.
17	CHAIRMAN RUSSELL: It's been seconded by
18	Heidi. Further discussion?
19	(No response)
20	CHAIRMAN RUSSELL: Seeing none, all
21	those in favor, signify by saying aye.
22	(Response)
23	CHAIRMAN RUSSELL: Opposed.
2 4	(No response)
25	CHAIRMAN RUSSELL: Thank you. Next on

the Agenda are new contested cases on appeal.

2.4

MS. ORR: Mr. Chairman, members of the Board, coincidentally the violations for both of these cases are the same, and the first one has to do with the Anaconda Country Club. These are public water supply cases.

In that case, you probably saw the administrative order that recites the violation and the request for the penalty. There was an alteration of a public water supply system without prior Department approval, and specifically they installed a new groundwater well and abandoned an existing well without plans, and specs, and approval by the Department. And they also operated the public water supply without Department approval. And the Department is seeking \$5,420 in fines.

CHAIRMAN RUSSELL: Any questions for Katherine?

(No response)

CHAIRMAN RUSSELL: Seeing none, I would entertain a motion to appoint Katherine the permanent Hearings Examiner on this matter.

MS. KAISER: So moved.

CHAIRMAN RUSSELL: It's been moved by

LAURIE CRUTCHER, RPR 406-442-8262

1	Haidi Ta thana a sanado
1	Heidi. Is there a second?
2	MR. MILLER: Second.
3	CHAIRMAN RUSSELL: Seconded by Marvin.
4	Further discussion?
5	(No response)
6	CHAIRMAN RUSSELL: All those in favor,
7	signify by saying aye.
8	(Response).
9	CHAIRMAN RUSSELL: Opposed.
10	(No response)
11	CHAIRMAN RUSSELL: Motion carries
12	unanimously.
13	MS. ORR: Mr. Chairman, members of the
14	Board, this is a case out of Three Forks involving
15	Headwaters Livestock Auction, which is also a
16	public water supply source. The same allegations,
17	alteration of a public water supply without
18	Department approval. In this case, it was
19	installation of a reverse osmosis system. And no
	plans and specs had been generated by an engineer,
20	
20	and then when that was done, there were
21	and then when that was done, there were

without Department approval, and the fine there

1 that's requested is \$7,518. 2 CHAIRMAN RUSSELL: I have a question. 3 You read the appeal letter, did you not? MS. ORR: 4 Yes. 5 CHAIRMAN RUSSELL: The first, "After having met with a number of Board members in the 6 7 violations department of this past week," who are 8 they talking about? 9 MS. ORR: I guess their own board, is 10 the way I read that. 11 CHAIRMAN RUSSELL: It says, "In the 12 violations department this past week, I find it 13 necessary to ask for an appeal." 14 MS. ORR: Maybe they have a very special committee that anticipates violations. 15 16 CHAIRMAN RUSSELL: Well, I quess they're in the business. 17 MS. ORR: It was unclear. 18 CHAIRMAN RUSSELL: That is a weird 19 20 statement. I guess it doesn't really need clarification. They asked for -- they've appealed 21 22 the decision of the Department. It almost sounds 23 like there is someone in the Department who says, 2.4 "Why don't you just appeal and see how far you can

get." I'm sure that didn't happen, John.

25

1	MR. LIVERS: Mr. Chairman, I'd speculate
2	that's all it is, that they had some discussions
3	with the Department staff, which they may be
4	referring to as Board members, and maybe they
5	weren't satisfied, and it looks like
6	CHAIRMAN RUSSELL: I'm sure it wasn't ex
7	parte.
8	MR. ARRIGO: Mr. Chairman, members of
9	the Board, just for clarification. I'm John
10	Arrigo with the Enforcement Division. I believe
11	the appeal letter came from a gentleman who is a
12	manager of the operation, and he had to consult
13	with his Board of Directors to make the decision
14	whether or not to appeal.
15	CHAIRMAN RUSSELL: He wasn't very clear.
16	I want to just go on the record that he didn't
17	talk to me.
18	MR. WHALEN: Mr. Chairman, I'm just
19	wondering if there may be some merit in splitting
20	the difference with Ms. Orr on these new appeals
21	and maybe hear this one.
22	CHAIRMAN RUSSELL: It would be up to the
23	Board. Is that a motion?
2 4	MR. WHALEN: It's not a motion. It's

just a thought I would put out there to consider

before we would go to motion, for a couple reasons. One is the workload that we're putting on the Hearings Officer.

2.4

And then secondly, between these two, if they are similar in nature in terms of violations, and this one happens to be a higher fine, and we have the incident of this letter in the memo and the confusion that it's generated, it might be worth giving this some hearing. I don't know what sort of -- because I'm new, I'm not certain what sort of difficulties it might create for the Department, but as a new Board member, this is something that I guess I would be interested in listening to.

CHAIRMAN RUSSELL: With that in mind, in the past we've basically just not appointed a Hearing Examiner permanently, and we would allow Katherine to continue to do pre-hearing work for us, and just move forward in that fashion.

MR. MIRES: Basically just like Joe was saying, just retain the option of looking at it in the future if need be.

CHAIRMAN RUSSELL: Right.

MR. MIRES: Like most cases, this will resolve itself.

CHAIRMAN RUSSELL: It may resolve itself with some parties' actions on this. So we can just take no action on it. We'll just keep moving. Is that all right? We'll just keep moving then.

The last item -- and this is very odd

2.1

2.4

The last item -- and this is very odd that we only have one -- is final actions on contested case. This would be in the matter of violations of the Montana Water Quality Act by Jim Gilman Excavation at Augusta-South, Lewis & Clark County.

MS. ORR: Mr. Chairman, members of the Board, this is a case in which the parties resolve to file a motion for dismissal under Rule 41(a), and that means that they're mutually withdrawing from the jurisdiction of the Board, and the Board really doesn't have much more to do other than to sign the dismissal order. I can give you details about the case, but whatever is your druthers there.

CHAIRMAN RUSSELL: Is there a motion -MR. MIRES: So moved.

CHAIRMAN RUSSELL: -- and authorize the Board Chair to sign the order --

MR. WHALEN: Second.

LAURIE CRUTCHER, RPR 406-442-8262

1 CHAIRMAN RUSSELL: Seconded by Joe. All those in favor, signify by saying aye. 2 3 (Response) 4 CHAIRMAN RUSSELL: Opposed. 5 (No response) CHAIRMAN RUSSELL: Motion carries. 6 7 Katherine, we're done with you, right? MS. ORR: Yes, for now. 8 9 CHAIRMAN RUSSELL: This is the time of 10 the meeting that the Board would accept general 11 public comment on matters pertaining to the Board. 12 Is there anyone out there that would be a member of the public that would like to speak to the 13 14 Board at this time? 15 MR. ALLEN: Mr. Chairman, members of the 16 Board, for the record, Don Allen with WETA, Western Environmental Trade Association, and I 17 18 might just comment on a couple things. I know you 19 gave me an opportunity to get up earlier, but I 20 don't want to disappoint you. 21 So the ones on the ORW, I will just 22 quickly say that we think it's on the right path 23 going forward. We had a lot of misgivings about

that whole adoption of that rule to begin with,

but then the groups came along and put together a

2.4

25

collaborative effort trying to resolve that, and I'm hopeful that it will be okay when they get done.

2.4

The other thing I might just say about the fees. As you know, in the air quality fees, when those were proposed for initiating rulemaking, one of our people was here to talk about the overall concern about the increase in fees coming pretty heavy on things. It was a big increase on the air, and it's a big increase on the water. And so there is some concern about that.

But then let me quickly say that we've been meeting with Jennie, and her people, and the Department, and I might just mention that one of the things we've urged them to do -- and I know Director Opper, and Judy Hanson, and also Jennie are all supportive of that -- I've been urging them for awhile to set up a water CAC.

As you know, we have the Clean Air Act Advisory Committee, which has done a really excellent job over the years of getting ahead of the curve on air quality matters, including fees. They're working on some ways not to try to mitigate that. And so the last time I suggested

the other day at a meeting, somebody said, "Yes, we could call it CWAAC. That would work real good," and I said, "I'm not sure about that name."

But I just want to throw that out because it's up to the Department, of course, and up to the Department, and I'm hopeful they'll go ahead and do that, and that they will help us do a lot of good communicating that needs to happen.

So that's my concern is that -- these cumulative effect of the fees that is a concern to a lot of people. Some of our folks are having a tough time right now, and so it's not -- we've gone into the Legislature, and they can tell you that last session we supported, and we've always supported, enough fees appropriation of the Legislature to do the job right in terms of permitting, saying, "Hey, if you need more money to do the permitting, to get it done, we'll come and support that." We've lived up to that.

But I just throw that out just as a cautionary thing, because these things come along, and hopefully we can continue to work with the Department. And as I say, the air quality folks have been great in trying to address this in terms

of next time, and so hopefully we can do that as far as the water quality, too.

But anyway, I appreciate the chance to comment. I'm sorry. I told you I was supposed to be on vacation today, but it didn't work that way, so I wound up having to come up. So I apologize for not having a tie on.

nice points, and from the regulatory standpoint -which I've done for most of my professional career
-- establishing environmental fees takes a
philosophy. How much general obligation does the
public have to support a program versus how much
does the industry have to support the program?

And you can go out there, and you can find a lot of literature on how much, is it totally fee supported, should there be some general obligations for complaints and public health protection. So these points are good, and I'm sure that every time that you look at a fee, you look at -- whether you do it specifically or not, you look at those types of issues.

MR. LIVERS: Mr. Chairman, we do, and I wanted to express appreciation for those points being raised as well. There is certainly a subset

of the Legislature that has pretty strong feelings that fee supported programs are essentially not general obligations, or that the fulcrum is pretty far over, so that they're primarily to be supported by the fee payers.

I also think -- and Don may agree with me on this -- that that tends to flex over time, and sometimes the condition of the General Fund is the driver, that we go through a session like we've just had where there wasn't a surplus of General Fund, and it becomes less of a decision based on the kind of philosophy you're talking about, and maybe a little more based on fiscal reality.

So I think sometimes that tends to play maybe too big a role, but certainly those are the kind of considerations we take. When we believe there is an argument that there is a general obligation out there, we do try to raise that with the Legislature, and it manifests in a lot of parts of our budget discussions.

Also taken to heart are Don's comments on the Clean Air Advisory Council or committee, and trying to replicate that. We see that as a real successful model, and we are moving that

1	direction.
2	So I guess I just want you to know we're
3	listening to that, as well as Mr. Whalen's
4	comments about large increases versus smaller
5	incremental increases. So it's all taken to
6	heart, and all of those are kind of reflective of
7	the direction we're trying to head in the
8	Department.
9	CHAIRMAN RUSSELL: That's good. Thanks
10	for your comments.
11	MR. ALLEN: Thanks, Mr. Chairman,
12	members of the Board.
13	CHAIRMAN RUSSELL: Any general Board
14	comments before we adjourn?
15	(No response)
16	CHAIRMAN RUSSELL: Good meeting. I
17	would entertain a motion to adjourn.
18	MR. WHALEN: So moved.
19	CHAIRMAN RUSSELL: It's been moved by
20	Joe. Is there second?
21	MR. MILLER: Second.
22	CHAIRMAN RUSSELL: It's been seconded by
23	Marvin. All those in favor, signify by saying
2 4	aye.

LAURIE CRUTCHER, RPR 406-442-8262

(Response)
