Report Explanation

This is a listing of hazardous waste facilities where cleanup activities have taken place or are in progress. Cleanups were triggered by permitting requirements or discovery of hazardous waste or used oil spills during DEQ inspections, complaints, or self-reporting by handler. This report will be reviewed annually, at a minimum, and updated accordingly.

Status

- **C** – case Complete
- **O** – case On-Going

Authority

- **CECRA** – Comprehensive Environmental Cleanup and Responsibility Act
- **CERCLA** – Comprehensive Environmental Response, Compensation, and Liability Action (Federal Superfund)
- **MHWA** – Montana Hazardous Waste Act

Cleanup Status

- **CNFA** – cleanup of entire site is complete and no further action needed
- **CLTM** - cleanup of entire site is complete with on-going, long-term ground water or soil treatment
- **CMP** – corrective measures in progress
- **CpC** – action complete, potential for additional contamination exists
- **RIIP** – remedial investigation in progress

Institutional Controls

- **ACL** – alternate concentration limit for ground water
- **CGWUA** – controlled ground water use area
- **LUR** – land use restriction
- **Not determined**
- Other (e.g., None)

Final Land Use

- **Industrial**
- **Recreational**
- **Residential**
- **Not determined**
- *Other*
