

Montana Department of Environmental Quality
PO Box 200901
Helena, MT 59601

**TARGETED BROWNFIELDS ASSESSMENT ASSISTANCE
APPLICATION**

The Montana Department of Environmental Quality (DEQ) is currently providing Phase I, Phase II, or other specific site assessment assistance at selected brownfields properties. To request DEQ's assistance for site assessments, interested parties must complete the following application. For petroleum sites, please submit your application to Hayden Janssen, Brownfields Coordinator, DEQ – Remediation Division at the above address. For all other sites, please submit your application to Jason Seyler, Brownfields Coordinator, DEQ – Remediation Division at the above address. You will be contacted after DEQ reviews your application.

Please type or print.

Contact Person

Name: _____
Community/Group/Entity: _____
Telephone number: _____
Fax number: _____
Mailing address: _____
E-mail address: _____

Site/Project Location

Site name: _____
Site address or general location: _____
If possible, please include a map with the site location.
City and county: _____
Describe the land uses surrounding the site. _____

Site History and Current Status

Known past and current uses of site and approximate dates: _____

Any regulatory involvement? _____

If yes, please briefly explain and identify the regulatory contact person (including phone number). _____

Known contaminants and which environmental media are contaminated: _____

Is the contamination believed to be solely petroleum contamination? _____

Describe any past environmental investigations (dates, investigator, conclusions). _____

Describe past, current, and future ownership status. If property is not owned by applicant, describe how applicant anticipates obtaining access to property in order to conduct assessment activities. _____

Is there a viable responsible party? _____
If yes, provide the name of the responsible party. _____

Describe developer interest and the developer's plans for the property. _____

Assurance of Future Redevelopment and Reuse of the Site

Identify the future use of the site. _____

Describe the roles of all other key stakeholders in the project (i.e. community organizations, state involvement, city involvement, private stakeholders, etc.) _____

Describe efforts directed towards community involvement (i.e. Is the community aware of the project and do they support the proposed redevelopment? If the community is not aware of the project, what are the plans to involve the community?) _____

Identify cleanup funding sources. _____

If all or part of the property is to be donated to the local government, include the developer's written commitment to make the stated donations.

Benefits

Describe how site redevelopment will benefit the community (i.e. creation of new jobs or greenspace/park space, etc.) _____

State whether a direct health/environmental threat will be mitigated. _____

Signed: _____

Date: _____
