Josh Keller
Associate Director
Rocky Mountain Laboratories
903 South 4th St.
Hamilton, MT 59840

RE: Final Title V Operating Permit #OP2991-03

Dear Mr. Keller:

The Department of Environmental Quality has prepared the enclosed Final Operating Permit #2991-03, for Rocky Mountain Laboratories, located in Hamilton, Montana.

Please review the cover page of the attached permit for information pertaining to the action taking place on Permit #OP2991-03.

If you have any questions, please contact John P. Proulx, the permit writer, at (406) 444-5391 or by email at jproulx@mt.gov.

Sincerely,

A handwritten signature in black ink that reads "Julie A. Merkel".

Julie A. Merkel
Permitting Services Section Supervisor
Air Quality Bureau
(406) 444-3626

A handwritten signature in black ink that reads "John P. Proulx".

John P. Proulx
Air Quality Specialist
Air Quality Bureau
(406) 444-5931

Robert Gallagher, US EPA Region VIII, Montana Office

STATE OF MONTANA
Department of Environmental Quality
Helena, Montana 59620

AIR QUALITY OPERATING PERMIT OP2991-03

Issued to: United States Dept. of Health and Human Services
National Institute of Health
Rocky Mountains Laboratories
903 South 4th Street
Hamilton, MT 59840

Final Date: **July 10, 2021**
Expiration Date: **July 10, 2026**
Renewal Application Due: **January 10, 2026**

Effective Date: **July 9, 2021**
Date of Decision: **June 9, 2021**
End of EPA 45-day Review: **May 28, 2021**
Proposed Issue Date: **April 13, 2021**
Draft Issue Date: **March 5, 2021**

Application Deemed Technically Complete: **June 12, 2020**
Application Deemed Administratively Complete: **June 12, 2020**
Renewal Application Received: **June 12, 2020**
AFS Number: **030-081-005A**

Permit Issuance and Appeal Processes: In accordance with Montana Code Annotated (MCA) Sections 75-2-217 and 218 and the Administrative Rules of Montana (ARM), ARM Title 17, Chapter 8, Subchapter 12, Operating Permit Program, this operating permit is hereby issued by the Department of Environmental Quality (Department) as effective and final on July 10, 2021. This permit must be kept on-site at the above-named facility.

SECTION I. GENERAL INFORMATION

The following general information is provided pursuant to ARM 17.8.1210(1).

Company Name: United States Department of Public Health and Human Services, National Institutes of Health – Rocky Mountain Laboratories

Mailing Address: 903 South 4th Street

City: Hamilton State: Montana Zip: 59840

Plant Location: 903 South 4th Street in Hamilton, Montana 59840
NE ¼ of Section 36, Township 6 North, Range 21 West, Ravalli County, Montana

Responsible Official: Josh Kellar, Associate Director

Facility Contact Person: Aaron Bestor, Health Physicist

Alternate Contact Person: Barri Twardoski, Environmental Engineer

Primary SIC Code: 8071 – Medical Laboratories

Nature of Business: Biomedical Research Facility

Description of Process: The United States Department of Public Health and Human Services, National Institutes of Health – Rocky Mountain Laboratories (RML) operates a biomedical research facility conducting basic and applied research in immunological, allergic, and infectious diseases.

SECTION II. SUMMARY OF EMISSION UNITS

The emission units regulated by this permit are the following (ARM 17.8.1211):

Emitting Unit/Process	Control Device/Practice
EU001 - Facility-Wide Fuel Consumption and Use (Natural Gas and Number 2 Fuel Oil)	Natural gas fuel use limitation and maximum fuel oil sulfur concentration of 0.5%
EU002 – 66-MMBtu/hr Natural Gas-Fired Boiler	Natural gas fuel use limitation
EU003 – 66-MMBtu/hr Natural Gas-Fired Boiler	Natural gas fuel use limitation
EU004 - 66-MMBtu/hr Natural Gas-Fired Boiler	Natural gas fuel use limitation
EU005 - 6.5-MMBtu/hr Natural Gas-Fired Consumat Model C-325PA Pathological Furnace (Incinerator)	Limited incineration content (material type), maximum charge rate of 500 lb/hr, 2190 ton/yr pathological and general refuse incineration.
EU006 - 3.5-MMBtu/hr Natural Gas-Fired Consumat Model C-225P Pathological Furnace (Incinerator)	Limited incineration content (material type), maximum charge rate of 500 lb/hr, 2190 ton/yr pathological and general refuse incineration.
EU007 - Emergency Generators (Diesel-Fired)	Emergency/back-up operation only. Maximum of 500 hours of operation/unit/year
EU008 – 24.4 MMBtu/hr Natural Gas-Fired Boiler	Natural gas fuel use limitation

SECTION III. PERMIT CONDITIONS

The following requirements and conditions are applicable to the facility or to specific emission units located at the facility (ARM 17.8.1211, 1212, and 1213).

A. Facility-Wide

Conditions	Rule Citation	Rule Description	Pollutant/Parameter	Limit
A.1	ARM 17.8.105	Testing Requirements	Testing Requirements	-----
A.2	ARM 17.8.304(1)	Visible Air Contaminants	Opacity	40%
A.3	ARM 17.8.304(2)	Visible Air Contaminants	Opacity	20%
A.4	ARM 17.8.308(1)	Particulate Matter, Airborne	Fugitive Opacity	20%
A.5	ARM 17.8.308(2)	Particulate Matter, Airborne	Reasonable Precautions	-----
A.6	ARM 17.8.308	Particulate Matter, Airborne	Reasonable Precaution, Construction	20%
A.7	ARM 17.8.309	Particulate Matter, Fuel Burning Equipment	Particulate Matter	$E = 0.882 * H^{-0.1664}$ Or $E = 1.026 * H^{-0.233}$
A.8	ARM 17.8.310	Particulate Matter, Industrial Processes	Particulate Matter	$E = 4.10 * P^{0.67}$ or $E = 55 * P^{0.11} - 40$
A.9	ARM 17.8.316(1)	Incinerator	Design	-----
A.10	ARM 17.8.316(2)	Incinerator	Particulate Matter	0.10 gr/dscf
A.11	ARM 17.8.316(3)	Incinerator	Opacity	10%
A.12	ARM 17.8.322(4)	Sulfur Oxide Emissions, Sulfur in Fuel	Sulfur in Fuel (liquid or solid fuels)	1 lb/MMBtu fired
A.13	ARM 17.8.322(5)	Sulfur Oxide Emissions, Sulfur in Fuel	Sulfur in Fuel (gaseous)	50 gr/100 CF
A.14	ARM 17.8.324(3)	Hydrocarbon Emissions, Petroleum Products	Gasoline Storage Tanks	-----
A.15	ARM 17.8.324	Hydrocarbon Emissions, Petroleum Products	65,000 Gallon Capacity	-----
A.16	ARM 17.8.324	Hydrocarbon Emissions, Petroleum Products	Oil-effluent Water Separator	-----
A.17	ARM 17.8.342	NESHAPs General Provisions	SSM Plans	Submittal
A.18	ARM 17.8.1211(1)(Greenhouse Gas Reporting	Reporting	-----

Conditions	Rule Citation	Rule Description	Pollutant/Parameter	Limit
	c) and 40 CFR Part 98			
A.19	ARM 17.8.1212	Reporting Requirements	Prompt Deviation Reporting	-----
A.20	ARM 17.8.1212	Reporting Requirements	Compliance Monitoring	-----
A.21	ARM 17.8.1207	Reporting Requirements	Annual Certification	-----

Conditions

A.1. Pursuant to ARM 17.8.105, any person or persons responsible for the emission of any air contaminant into the outdoor atmosphere shall, upon written request of the Department, provide the facilities and necessary equipment (including instruments and sensing devices) and shall conduct test, emission or ambient, for such periods of time as may be necessary using methods approved by the Department.

Compliance demonstration frequencies that list “as required by the Department” refer to ARM 17.8.105. In addition, for such sources, compliance with limits and conditions listing “as required by the Department” as the frequency, is verified annually using emission factors and engineering calculations by the Department’s compliance inspectors during the annual emission inventory review; in the case of Method 9 tests, compliance is monitored during the regular inspection by the compliance inspector.

A.2. Pursuant to ARM 17.8.304(1), RML shall not cause or authorize emissions to be discharged into the outdoor atmosphere from any source installed on or before November 23, 1968, that exhibit an opacity of 40% or greater averaged over 6 consecutive minutes, unless otherwise specified by rule or in this permit.

A.3. Pursuant to ARM 17.8.304(2), RML shall not cause or authorize emissions to be discharged into the outdoor atmosphere from any source installed after November 23, 1968, that exhibit an opacity of 20% or greater averaged over 6 consecutive minutes, unless otherwise specified by rule or in this permit.

A.4. Pursuant to ARM 17.8.308(1), RML shall not cause or authorize the production, handling, transportation, or storage of any material unless reasonable precautions to control emissions of particulate matter are taken. Such emissions of airborne particulate matter from any stationary source shall not exhibit an opacity of 20% or greater averaged over 6 consecutive minutes, unless otherwise specified by rule or in this permit.

A.5. Pursuant to ARM 17.8.308(2), RML shall not cause or authorize the use of any street, road or parking lot without taking reasonable precautions to control emissions of airborne particulate matter, unless otherwise specified by rule or in this permit.

A.6. Pursuant to ARM 17.8.308, RML shall not operate a construction site or demolition project unless reasonable precautions are taken to control emissions of airborne particulate matter. Such emissions of airborne particulate matter from any stationary source shall not exhibit an

opacity of 20% or greater averaged over 6 consecutive minutes, unless otherwise specified by rule or in this permit.

A.7. Pursuant to ARM 17.8.309, unless otherwise specified by rule or in this permit, RML shall not cause or authorize particulate matter caused by the combustion of fuel to be discharged from any stack or chimney into the outdoor atmosphere in excess of the maximum allowable emissions of particulate matter for existing fuel burning equipment and new fuel burning equipment calculated using the following equations:

For existing fuel burning equipment (installed before November 23, 1968):
$$E = 0.882 * H^{-0.1664}$$

For new fuel burning equipment (installed on or after November 23, 1968):
$$E = 1.026 * H^{-0.233}$$

Where H is the heat input capacity in million BTU (MMBtu) per hour and E is the maximum allowable particulate emissions rate in pounds per MMBtu.

A.8. Pursuant to ARM 17.8.310, unless otherwise specified by rule or in this permit, RML shall not cause or authorize particulate matter to be discharged from any operation, process, or activity into the outdoor atmosphere in excess of the maximum hourly allowable emissions of particulate matter calculated using the following equations:

For process weight rates up to 30 tons per hour:
$$E = 4.10 * P^{0.67}$$

For process weight rates in excess of 30 tons per hour:
$$E = 55.0 * P^{0.11} - 40$$

Where E = rate of emissions in pounds per hour and p = process weight rate in tons per hour.

A.9. Pursuant to ARM 17.8.316(1), RML shall not use any incinerator for the burning of refuse unless the incinerator is a multi-chambered incinerator or has a design of equal effectiveness approved by the Department prior to installation or use, unless otherwise specified by rule or in this permit.

A.10. Pursuant to ARM 17.8.316(2), RML shall not cause or authorize to be discharged into the outdoor atmosphere from any incinerator, particulate matter emissions in excess of 0.10 grains per standard cubic foot of dry flue gas, adjusted to 12% carbon dioxide and calculated as if no auxiliary fuel had been used, unless otherwise specified by rule or in this permit.

A.11. Pursuant to ARM 17.8.316(3), RML shall not cause or authorize to be discharged into the outdoor atmosphere from any incinerator emissions which exhibit an opacity of 10% or greater averaged over 6 consecutive minutes, unless otherwise specified by rule or in this permit.

A.12. Pursuant to ARM 17.8.322(4), RML shall not burn liquid or solid fuels containing sulfur in excess of 1 pound per million BTU fired, unless otherwise specified by rule or in this permit.

A.13. Pursuant to ARM 17.8.322(5), RML shall not burn any gaseous fuel containing sulfur compounds in excess of 50 grains per 100 cubic feet of gaseous fuel, calculated as hydrogen sulfide at standard conditions, unless otherwise specified by rule or in this permit.

A.14. Pursuant to ARM 17.8.324(3), RML shall not load or permit the loading of gasoline into any stationary tank with a capacity of 250 gallons or more from any tank truck or trailer, except through a permanent submerged fill pipe, unless such tank is equipped with a vapor loss control device or is a pressure tank as described in ARM 17.8.324(1), unless otherwise specified by rule or in this permit.

A.15. Pursuant to ARM 17.8.324, unless otherwise specified by rule or in this permit, RML shall not place, store or hold in any stationary tank, reservoir or other container of more than 65,000 gallon capacity any crude oil, gasoline or petroleum distillate having a vapor pressure of 2.5 pounds per square inch absolute or greater under actual storage conditions, unless such tank, reservoir or other container is a pressure tank maintaining working pressure sufficient at all times to prevent hydrocarbon vapor or gas loss to the atmosphere, or is designed and equipped with a vapor loss control device, properly installed, in good working order and in operation.

A.16. Pursuant to ARM 17.8.324, unless otherwise specified by rule or in this permit, RML shall not use any compartment of any single or multiple-compartment oil-effluent water separator, which compartment receives effluent water containing 200 gallons a day or more of any petroleum product from any equipment processing, refining, treating, storing or handling kerosene or other petroleum product of equal or greater volatility than kerosene, unless such compartment is equipped with a vapor loss control device, constructed so as to prevent emission of hydrocarbon vapors to the atmosphere, properly installed, in good working order and in operation.

A.17. Pursuant to ARM 17.8.302 and ARM 17.8.342, and 40 CFR 63.6, the owner or operator must maintain at the affected source a current startup, shutdown, and malfunction plan (if a plan is required by 40 CFR 63.6(e)(3) and the Table for General Provision Applicability of the appropriate subpart), meeting the requirements of 40 CFR 63.6, and must make the plan available upon request. In addition, if the startup, shutdown, and malfunction plan is subsequently revised, the owner or operator must maintain at the affected source each previous (i.e., superseded) version of the startup, shutdown, and malfunction plan, and must make each such previous version available for a period of 5 years after revision of the plan. The owner or operator shall confirm that actions taken during the relevant reporting period during periods of startup, shutdown, and malfunction were consistent with the affected source's startup, shutdown and malfunction plan in the semiannual (or more frequent) startup, shutdown, and malfunction report required in 40 CFR 63.10(d)(5).

A.18. Pursuant to ARM 17.8.1211(1)(c) and 40 CFR Part 98, RML shall comply with requirements of 40 CFR Part 98 – Mandatory Greenhouse Gas Reporting, as applicable (ARM 17.8.1211(1)(c), NOT an applicable requirement under Title V).

A.19. RML shall promptly report deviations from permit requirements including those attributable to upset conditions, as upset is defined in the permit. To be considered prompt, deviations shall be reported to the Department using the schedule and content as described in Section V.E (unless otherwise specified in an applicable requirement) (ARM 17.8.1212)

A.20. On or before February 15 and August 15 of each year, RML shall submit to the Department the compliance monitoring reports required by Section V.D. These reports must contain all information required by Section V.D, as well as the information required by each individual

emissions unit. For the reports due by February 15 of each year, RML may submit a single report, provided that it contains all the information required by Section V.B & V.D. Per ARM 17.8.1207,

any application form, report, or compliance certification submitted pursuant to ARM Title 17, Chapter 8, Subchapter 12 (including semiannual monitoring reports), shall contain certification by a responsible official of truth, accuracy and completeness. This certification and any other certification required under ARM Title 17, Chapter 8, Subchapter 12, shall state that, “based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate and complete.”

A.21. By February 15 of each year, RML shall submit to the Department the compliance certification report required by Section V.B. The annual certification report required by Section V.B must include a statement of compliance based on the information available that identifies any observed, documented or otherwise known instance of noncompliance for each applicable requirement. Per ARM 17.8.1207,

any application form, report, or compliance certification submitted pursuant to ARM Title 17, Chapter 8, Subchapter 12 (including annual certifications), shall contain certification by a responsible official of truth, accuracy and completeness. This certification and any other certification required under ARM Title 17, Chapter 8, Subchapter 12, shall state that, “based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate and complete.”

B. EU001 – Facility-Wide Fuel Consumption and Use (Natural Gas and Number 2 Fuel Oil)

Condition(s))	Pollutant/Parameter	Permit Limit	Compliance Demonstration Method Frequency	Reporting Requirements	
B.1, B.3, B.5, B.7, B.8	Natural Gas Consumption/Combusti on	847 MMcuft/y r	Recordkeepin g	Ongoing	Semiannual
B.2, B.4, B.6, B.7, B.8	No.1/2 Fuel Oil Use	Back-Up Fuel Only and 0.5 Weight % Sulfur	Recordkeepin g	Ongoing	Semiannual

Conditions

B.1. Natural gas consumption/combustion at the RML facility is limited to 847 million cubic feet (MMcuft) during any rolling 12-month time period (ARM 17.8.749).

B.2. Blended Number 1/ Number 2 (No. 1/2) fuel oil may be used only as back-up fuel at the RML facility, provided that the oil does not contain greater than 0.5 weight percent sulfur (ARM 17.8.749 and 40 CFR 60, Subpart Dc).

Compliance Demonstration

B.3. RML shall document, by month, the amount of natural gas consumed at the facility. By the 25th day of each month RML shall total the amount of natural gas combusted facility wide during the previous 12 months to monitor compliance with Section III.B.1 (ARM 17.8.749).

B.4. RML shall maintain a No. 1/ 2 diesel fuel use log on site documenting all instances where back-up fuel is used at the facility; documenting that only number 2 fuel oil was used as back-up fuel; and documenting that the sulfur content of the No. 1/2 fuel oil used as back-up fuel did not exceed the applicable limit contained in Section III.B.2. The log shall include the applicable information as required in ARM 17.8.1212(1)(a-c), the date, time, and the initials of the documenting personnel (ARM 17.8.1212).

Recordkeeping

B.5. RML shall maintain, on site, a log monitoring compliance with Section III.B.1, as described in Section III.B.3. The log shall include the applicable information as required in ARM 17.8.1212(2)(a-b), and the date, time, and the initials of the documenting personnel (ARM 17.8.1212).

B.6. RML shall maintain, on site, a log monitoring compliance with Section III.B.2, as described in Section III.B.4. The log shall include the information as required in ARM 17.8.1212(2)(a-b), the date, time, and the initials of the documenting personnel. The required sulfur-in-fuel content information may be obtained through the product distributor or manufacturer (ARM 17.8.1212).

Reporting

B.7. The annual compliance certification report required by Section V.B must contain a certification statement for the above applicable requirements (ARM 17.8.1212).

B.8. The semiannual reporting shall provide (ARM 17.8.1212):

- a. A summary of the information required in Section III.B.5; and
- b. A summary of the information required in Section III.B.6.

C. EU002, EU003, EU004, EU008– 66 MMBtu/hr Natural Gas-Fired Boiler (EU002), 66 MMBtu/hr Natural Gas-Fired Boiler (EU003), 66 MMBtu/hr Natural Gas-Fired Boiler (EU004), 24.4 MMBtu/hr Natural Gas-Fired (EU008)

Condition(s)	Pollutant/Parameter	Permit Limit	Compliance Demonstration Method	Frequency	Reporting Requirements
C.1, C.3, C.5, C.6, C.8, C.9	Opacity	20%	Method 9	As Required by the Department and Section III.A.1	Semiannual
			Visual Observation	Weekly	
C.2, C.4, C.7, C.8, C.9	40 CFR 60, Subpart Dc	Maintain Compliance with Applicable Standards, Limitations, and the Reporting, Recordkeeping, and Notification Requirements	Recordkeeping	As Applicable	Semiannual

Conditions

- C.1. RML shall not cause or authorize any emissions to be discharged into the outdoor atmosphere from any source installed after November 26, 1968, that exhibit an opacity of 20% or greater averaged over 6 consecutive minutes (ARM 17.8.304).
- C.2. RML shall comply with all applicable standards, limitations, and the reporting, recordkeeping, and notification requirements contained in 40 Code of Federal Regulations (CFR) Part 60, Subpart Dc, Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units as it applies to EU002, EU003, EU004, and EU008 (ARM 17.8.340 and 40 CFR 60, Subpart Dc).

Compliance Demonstration

- C.3. RML shall conduct either a semiannual Method 9 source test or a weekly visual survey of visible emissions on the boiler exhaust stacks. Under the visual survey option, once per calendar week, during daylight hours, RML shall visually survey the boiler exhaust stacks for any visible emissions. If visible emissions are observed during the visual survey, RML must conduct a Method 9 source test. The Method 9 source test must begin within one hour of any observation of visible emissions. If visible emissions meet or exceed 15% opacity based

on the Method 9 source test, RML shall immediately take corrective action to contain or minimize the source of emissions. If corrective actions are taken, then RML shall immediately conduct a subsequent visual survey (and subsequent Method 9 source test if visible emissions remain) to monitor compliance. The person conducting the visual survey shall record the results of the survey (including the results of any Method 9 source test performed) in a log, including any corrective action taken. Conducting a visual survey does not relieve RML of the liability for a violation determined using Method 9 (ARM 17.8.101(27)).

If the visual surveys are not performed once per calendar week as specified above during the reporting period, then RML shall perform the Method 9 source tests on the boiler stacks for that reporting period.

Method 9 source tests must be performed in accordance with the Montana Source Test Protocol and Procedures Manual, except that prior notification of the test is not required. Each observation period must be a minimum of 6 minutes unless any one reading is 20% or greater, then the observation period must be a minimum of 20 minutes or until a violation of the standard has been documented, whichever is a shorter period of time (ARM 17.8.1213).

- C.4. RML shall monitor compliance with the requirements contained in Section III.C.2 through recordkeeping as required by 40 CFR 60, Subpart Dc (ARM 17.8.1213, ARM 17.8.340, and 40 CFR 60, Subpart Dc).

Recordkeeping

- C.5. All compliance source test recordkeeping shall be performed in accordance with the test method used and the Montana Source Test Protocol and Procedures Manual, and shall be maintained on site. The reports must be submitted in accordance with the Montana Source Test Protocol and Procedures Manual (ARM 17.8.106 and ARM 17.8.1212).
- C.6. If visual surveys are performed, RML shall maintain a log to verify that the visual surveys were performed as specified in Section III.C.3. Each log entry must include the date, time, results of survey (and results of subsequent Method 9, if applicable), and observer's initials. If any corrective action is required, the time, date, observer's initials and any preventative or corrective action taken must be recorded in the log (ARM 17.8.1212).
- C.7. RML shall comply with all the recordkeeping requirements contained in 40 CFR Part 60, Subpart Dc for the Boilers (ARM 17.8.340 and 40 CFR Part 60, Subpart Dc).

Reporting

- C.8. The annual compliance certification report required by Section V.B must contain a certification statement for the above applicable requirements (ARM 17.8.1212).
- C.9. The semiannual reporting shall provide (ARM 17.8.1212):
 - a. A summary of results of any source testing that was performed during the reporting period. Any compliance source test reports must be submitted in accordance with the Montana Source Test Protocol and Procedures Manual (ARM 17.8.106);

- b. A summary of the results contained in the weekly visual observations log required under Section III.C.6; and
- c. A summary of the information required in Section III.C.7.

D. EU005, EU006 – 6.5 MMBtu/hr Natural Gas-Fired Consumat Model C-325PA Pathological Furnace (Incinerator) (EU005), 3.5 MMBtu/hr Natural Gas-Fired Consumat Model C-225P Pathological Furnace (Incinerator) (EU006)

Condition(s)	Pollutant/Parameter	Permit Limit	Compliance Demonstration Method	Frequency	Reporting Requirements
D.1, D.18, D.24, D.29, D.30	Incineration of Pathological Waste, HMIWI, Radioactive Waste, General Refuse	Limited Incineration Materials	Recordkeeping	Daily	Semiannual
D.2, D.18, D.24, D.29, D.30	Incinerator Operations	No Simultaneous Operation	Recordkeeping	Ongoing	Semiannual
D.3, D.18, D.24, D.30	Incinerator Charge Rate	≤ 500 lb/hr	Recordkeeping	Ongoing	Semiannual
D.4, D.19, D.25.a.D.25, D.29, D.30	Pathological Waste and General Refuse Incineration Limit	2190 ton/year	Recordkeeping	Monthly	Semiannual
D.5, D.20, D.27, D.29, D.30	40 CFR 62, Subpart HHH	Maintain Compliance as Applicable	Recordkeeping	As Applicable	Semiannual
D.6, D.21, D.26, D.29, D.30	Opacity	10%*	Method 9	Annual	Semiannual

* All emission limits contained in Section III.D.6 through Section III.D.15 are corrected to 7% O₂ where applicable (ARM 17.8.340 and 40 CFR 60, Subpart Ce).

Conditions

- D.1. RML shall not incinerate any material other than pathological waste, hospital/medical/infectious waste (HMIW) (as defined under 40 CFR 60, Subpart Ce), radioactive waste per Nuclear Regulatory Commission license, or general refuse from the facility (ARM 17.8.749).
- D.2. RML shall not operate both Consumat incinerators simultaneously (ARM 17.8.749).
- D.3. Each Consumat incinerator shall be limited to a maximum charge rate equal to or less than 500 pounds per hour (lb/hr) (ARM 17.8.749).
- D.4. RML shall not incinerate more than 2190 tons of pathological waste or general refuse (as defined under 40 CFR 60, Subpart Ce), combined, during any rolling 12-month time period (ARM 17.8.749).
- D.5. RML shall comply with all applicable standards, limitations, and the reporting, record keeping, and notification requirements contained in 40 CFR Part 62, Subpart HHH, Emission Guidelines and Compliance Times for Hospital/Medical/Infectious Waste Incinerators, as this subpart applies to the incinerators at the RML facility (ARM 17.8.340 and 40 CFR 62, Subpart HHH).

- D.6. RML shall not cause or authorize to be discharged into the atmosphere from each Consumat incinerator any visible emissions that exhibit an opacity of 10% or greater averaged over 6 consecutive minutes (ARM 17.8.316, ARM 17.8.340, and 40 CFR 60, Subpart Ce).
- D.7. RML shall not cause or authorize to be discharged into the atmosphere from each Consumat incinerator any particulate matter (PM) emissions in excess of 0.02 grains per dry standard cubic feet (gr/dscf) (ARM 17.8.340 and 40 CFR 62, Subpart HHH).
- D.8. RML shall not cause or authorize to be discharged into the atmosphere from each Consumat incinerator any carbon monoxide (CO) emissions that exceed 5.5 parts per million (ppm) (ARM 17.8.340 and 40 CFR 62, Subpart HHH).
- D.9. RML shall not cause or authorize to be discharged into the atmosphere from each Consumat incinerator any hydrogen chloride (HCl) emissions that exceed 7.7 ppm by volume (ARM 17.8.340 and 40 CFR 62, Subpart HHH).
- D.10. RML shall not cause or authorize to be discharged into the atmosphere from each Consumat incinerator any dioxins/furans that exceed 0.37 gr/billion dscf (ARM 17.8.340 and 40 CFR 62, Subpart HHH).
- D.11. RML shall not cause or authorize to be discharged into the atmosphere from each Consumat incinerator any sulfur dioxide (SO₂) emissions that exceed 4.2 ppm by volume (ARM 17.8.340 and 40 CFR 62, Subpart HHH).
- D.12. RML shall not cause or authorize to be discharged into the atmosphere from each Consumat incinerator any nitrogen oxide (NO_x) emissions that exceed 190 ppm by volume (ARM 17.8.340 and 40 CFR 62, Subpart HHH).
- D.13. RML shall not cause or authorize to be discharged into the atmosphere from each Consumat incinerator any lead (Pb) emissions that exceed 0.0079 gr/thousand dscf (ARM 17.8.340 and 40 CFR 62, Subpart HHH).
- D.14. RML shall not cause or authorize to be discharged into the atmosphere from each Consumat incinerator any cadmium (Cd) emissions that exceed 0.0057 gr/thousand dscf (ARM 17.8.340 and 40 CFR 62, Subpart HHH).
- D.15. RML shall not cause or authorize to be discharged into the atmosphere from each Consumat incinerator any mercury (Hg) emissions that exceed 0.011 gr/thousand dscf (ARM 17.8.340 and 40 CFR 62, Subpart HHH).
- D.16. RML shall maintain compliance with all monitoring requirements contained in 40 CFR 60.57(c), as applicable (ARM 17.8.340 and 40 CFR 60, Subpart Ce).
- D.17. RML shall maintain compliance with all monitoring requirements contained in 40 CFR 62 Subpart HHH, as applicable (40 CFR 62, Subpart HHH).

Compliance Demonstration

D.18. For the purpose of monitoring compliance with applicable requirements, RML shall maintain a daily incinerator operations log documenting the following information (ARM 17.8.1213):

- a. The type of materials incinerated in the Consumat incinerators for each incinerator charge to monitor compliance with Section III.D.1;
- b. Any instance in which the 2 Consumat incinerators were operated simultaneously to monitor compliance with Section III.D.2; and
- c. The amount of waste (charge rate in lb/hr) incinerated during each charge for each incinerator to monitor compliance with the requirement in Section III.D.3.

The log shall include, at a minimum, the applicable information, the date, time, and the initials of the documenting personnel for each requirement under Section III.D.17(a-c).

D.19. RML shall document, by month, the amount of pathological waste and general refuse combusted in the incinerators. By the 25th day of each month, RML shall total the amount of waste combusted during the previous month. The monthly information will be used to verify compliance with the rolling 12-month limitation in Section III.D.4. The documentation shall be included in a log. The log shall include, at a minimum, the applicable information, the date, time, and the initials of the documenting personnel (ARM 17.8.749 and ARM 17.8.1213).

D.20. RML shall monitor compliance with the requirements contained in Section III.D.5 through recordkeeping as required by 40 CFR 620, Subpart HHH (ARM 17.8.1213, ARM 17.8.340, and 40 CFR 62, Subpart HHH).

D.21. RML shall monitor compliance with the opacity limitation in Section III.D.6 by conducting an annual source test in accordance with the provisions of 40 CFR 60.56(c) (no more than 12 months following the previous performance source test) (ARM 17.8.340 and 40 CFR 60.56(c)).

D.22. Within 60 days after achieving the maximum production rate, but not later than 180 days after initial start-up of the incinerators, RML shall perform source testing on the Consumat incinerators to monitor compliance with the emission limits contained in Section III.D.7 through Section III.D.15, as specified in 40 CFR Part 60.56(c) (ARM 17.8.340 and 40 CFR Part 60, Subpart Ce).

D.23. After the initial performance source test(s) required in Section III.D.21, RML shall conduct additional performance source tests as specified in 40 CFR 62, Subpart HHH, according to the following schedule (40 CFR 62, Subpart HHH):

RML shall monitor compliance with the PM, CO, and HCl emission limits in Section(s) III.D.7, III.D.8, and III.D.9, respectively, by conducting an annual performance source test (no more than 12 months following the previous performance source test). If all three performance tests over a 3-year period indicate compliance with the applicable emission limit, RML may forego a performance test for that pollutant for the subsequent 2-year

period. At a minimum, a performance test for each pollutant shall be conducted every third year (no more than 36 months following the previous performance source test). If a performance test conducted every third year indicates compliance with the applicable emission limit for a pollutant (PM, CO, HCl), RML may forego a performance test for that pollutant for an additional 2 years. If any performance test indicates non-compliance with the respective emission limit, a performance source test for that pollutant shall be conducted annually until all annual performance source tests conducted over a 3-year period indicate compliance with the emission limit.

- D.24. Monitoring compliance with the requirements in Section III.D.16 shall be accomplished through recordkeeping (40 CFR 62.14453, ARM 17.8.1213)
- D.25. RML shall maintain Monitoring compliance requirements contained in 40 CFR 62, Subpart HHH (40 CFR 62.14470)

Recordkeeping

- D.26. RML shall maintain on-site a daily incinerator operations log, as described in Section III.D.17 (ARM 17.8.1212).
- D.27. RML shall maintain on site a monthly incinerator operations log as described in Section III.D.18 (ARM 17.8.749 and ARM 17.8.1212).
- D.28. All compliance source test recordkeeping shall be performed in accordance with the test method used and the Montana Source Test Protocol and Procedures Manual, and shall be maintained on site. The reports must be submitted in accordance with the Montana Source Test Protocol and Procedures Manual (ARM 17.8.1212).
- D.29. RML shall comply with all applicable recordkeeping requirements contained in 40 CFR 60, Subpart Ce (ARM 17.8.1212).
- D.30. RML shall maintain recordkeeping requirements contained in 40 CFR 62, Subpart HHH (40 CFR 62.14460)

Reporting

- D.31. The annual compliance certification report required by Section V.B must contain a certification statement for the above applicable requirements (ARM 17.8.1212).
- D.32. The semiannual reporting shall provide (ARM 17.8.1212):
 - a. A summary of the information contained in the log required in Section III.D.18(a-c);
 - b. A summary of the information contained in the recordkeeping required in Section III.D.19;
 - c. A summary of the information contained in the recordkeeping required in Section III.D.20;

- d. A summary of results of the last source testing that was performed in accordance with Sections III.D.21 and III.D.22. Any compliance source test reports must be submitted in accordance with the Montana Source Test Protocol and Procedures Manual (ARM 17.8.106); and
- e. A summary of the information required under Section III.D.23.
- f. A summary of the information required under 40 CFR 62, Subpart HHH

E. EU007 – Emergency Generators (Diesel-Fired)

Condition(s)	Pollutant/Parameter	Permit Limit	Compliance Demonstration Method	Frequency	Reporting Requirements
E.1, E.5, E.9, E.13, E.16	Emergency Generator Status	Back-Up Use Only	Recordkeeping	Ongoing	Semiannual
E.2, E.6, E.10, E.13, E.16	Emergency Generator Status	Operating Limit 500 hrs/yr/generator	Recordkeeping	Ongoing	Semiannual
E.3, E.7, E.11, E.14	40 CFR 60, Subpart IIII	40 CFR 60, Subpart IIII	40 CFR 60, Subpart IIII	40 CFR 60, Subpart IIII	40 CFR 60, Subpart IIII
E.4, E.8, E.12, E.14	40 CFR 63, Subpart ZZZZ	40 CFR 63, Subpart ZZZZ	40 CFR 63, Subpart ZZZZ	40 CFR 63, Subpart ZZZZ	40 CFR 63, Subpart ZZZZ

Conditions

- E.1. Each emergency diesel-fired generator at the RML facility shall be used only as backup sources of power and not as part of normal operations (ARM 17.8.749).
- E.2. Each emergency diesel-fired generator at the RML facility shall be limited to 500 hours of operation during any rolling 12-month time period (ARM 17.8.749).
- E.3. RML shall comply with all applicable standards and limitations, and the reporting, recordkeeping, and notification requirements contained in 40 CFR Part 60, Subpart IIII, Standards of Performance for Stationary Compression Ignition Internal Combustion Engine, for any applicable diesel engine (ARM 17.8.340 and 40 CFR Part 60, Subpart IIII).
- E.4. RML shall comply with all applicable standards and limitations, and the reporting, recordkeeping, and notification requirements contained in 40 CFR Part 63, Subpart ZZZZ, National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines, for any applicable diesel engine (ARM 17.8.342 and 40 CFR Part 63, Subpart ZZZZ).

Compliance Demonstration

- E.5. RML shall maintain on site a diesel-fired emergency generator operations log. The log shall include the date, time, and reason for each emergency generator use and shall include the documenting personnel's initials for each log entry (ARM 17.8.1213).
- E.6. RML shall document, by month, the hours of operation for each emergency diesel-fired generator at the facility. By the 25th day of each month, RML shall total the hours of operation for each diesel-fired generator for the previous month. The monthly information will be used to verify compliance with the rolling 12-month limitation in Section III.E.1 (ARM 17.8.749 and ARM 17.8.1213).
- E.7. Compliance monitoring shall be performed in accordance with 40 CFR Part 60, Subpart IIII, as applicable (ARM 17.8.340 and 40 CFR Part 63, Subpart IIII).
- E.8. Compliance monitoring shall be performed in accordance with 40 CFR Part 63, Subpart ZZZZ, as applicable (ARM 17.8.342 and 40 CFR Part 63, Subpart ZZZZ).

Recordkeeping

- E.9. RML shall maintain on site a monthly diesel-fired emergency generator operations log documenting the reason for emergency generator use, as described in Section III.E.3 (ARM 17.8.1212).
- E.10. RML shall maintain on site a monthly diesel-fired emergency generator operations log documenting the hours of operation for each diesel-fired emergency generator, as described in Section III.E.4 (ARM 17.8.1212).
- E.11. Recordkeeping shall be performed in accordance with 40 CFR Part 63, Subpart ZZZZ, as applicable (ARM 17.8.340 and 40 CFR Part 60, Subpart IIII).
- E.12. Recordkeeping shall be performed in accordance with 40 CFR Part 63, Subpart ZZZZ, as applicable (ARM 17.8.342 and 40 CFR Part 63, Subpart ZZZZ).

Reporting

- E.13. The annual compliance certification report required by Section V.B must contain a certification statement for the above applicable requirements (ARM 17.8.1212).
- E.14. The semiannual reporting shall provide (ARM 17.8.1212):
 - a. A summary of the information required in Section III.E.5; and
 - b. A summary of the information required in Section III.E.6.
 - c. A summary of any reporting required by 40 CFR 60, Subpart IIII.
 - d. A summary of any reporting required by 40 CFR 63, Subpart ZZZZ.

SECTION IV. NON-APPLICABLE REQUIREMENTS

Air Quality Administrative Rules of Montana (ARM) and Federal Regulations identified as not applicable to the facility or to a specific emissions unit at the time of the permit issuance are listed below (ARM 17.8.1214). The following list does not preclude the need to comply with any new requirements that may become applicable during the permit term.

RML did not provide a list of non-applicable requirements for the Department to review; therefore, this section does not include any requirements which RML has been granted a permit shield from.

SECTION V. GENERAL PERMIT CONDITIONS

A. *Compliance Requirements*

ARM 17.8, Subchapter 12, Operating Permit Program §1210(2)(a)-(c)&(e), §1206(6)(c)&(b)

1. The permittee must comply with all conditions of the permit. Any noncompliance with the terms or conditions of the permit constitutes a violation of the Montana Clean Air Act, and may result in enforcement action, permit modification, revocation and reissuance, or termination, or denial of a permit renewal application under ARM Title 17, Chapter 8, Subchapter 12.
2. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.
3. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit. If appropriate, this factor may be considered as a mitigating factor in assessing a penalty for noncompliance with an applicable requirement if the source demonstrates that both the health, safety or environmental impacts of halting or reducing operations would be more serious than the impacts of continuing operations, and that such health, safety or environmental impacts were unforeseeable and could not have otherwise been avoided.
4. The permittee shall furnish to the Department, within a reasonable time set by the Department (not to be less than 15 days), any information that the Department may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit, or to determine compliance with the permit. Upon request, the permittee shall also furnish to the Department copies of those records that are required to be kept pursuant to the terms of the permit. This subsection does not impair or otherwise limit the right of the permittee to assert the confidentiality of the information requested by the Department, as provided in 75-2-105, MCA.
5. Any schedule of compliance for applicable requirements with which the source is not in compliance with at the time of permit issuance shall be supplemental to, and shall not sanction noncompliance with, the applicable requirements on which it was based.
6. For applicable requirements that will become effective during the permit term, the source shall meet such requirements on a timely basis unless a more detailed plan or schedule is required by the applicable requirement or the Department.

B. *Certification Requirements*

ARM 17.8, Subchapter 12, Operating Permit Program §1207 and §1213(7)(a)&(c)-(d)

1. Any application form, report, or compliance certification submitted pursuant to ARM Title 17, Chapter 8, Subchapter 12, shall contain certification by a responsible official of truth, accuracy and completeness. This certification and any other certification required under ARM Title 17, Chapter 8, Subchapter 12, shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate and complete.

2. Compliance certifications shall be submitted by February 15 of each year, or more frequently if otherwise specified in an applicable requirement or elsewhere in the permit. Each certification must include the required information for the previous calendar year (i.e., January 1 – December 31).
3. Compliance certifications shall include the following:
 - a. The identification of each term or condition of the permit that is the basis of the certification;
 - b. The identification of the method(s) or other means used by the owner or operator for determining the status of compliance with each term and condition during the certification period, consistent with ARM 17.8.1212;
 - c. The status of compliance with each term and condition for the period covered by the certification, *including whether compliance during the period was continuous or intermittent* (based on the method or means identified in ARM 17.8.1213(7)(c)(ii), as described above); and
 - d. Such other facts as the Department may require to determine the compliance status of the source.
4. All compliance certifications must be submitted to the Environmental Protection Agency, as well as to the Department, at the addresses listed in the Notification Addresses Appendix of this permit.

C. *Permit Shield*

ARM 17.8, Subchapter 12, Operating Permit Program §1214(1)-(4)

1. The applicable requirements and non-federally enforceable requirements are included and specifically identified in this permit and the permit includes a precise summary of the requirements not applicable to the source. Compliance with the conditions of the permit shall be deemed compliance with any applicable requirements and any non-federally enforceable requirements as of the date of permit issuance.
2. The permit shield described in 1 above shall remain in effect during the appeal of any permit action (renewal, revision, reopening, or revocation and reissuance) to the Board of Environmental Review (Board), until such time as the Board renders its final decision.
3. Nothing in this permit alters or affects the following:
 - a. The provisions of Sec. 7603 of the FCAA, including the authority of the administrator under that section;
 - b. The liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance;
 - c. The applicable requirements of the Acid Rain Program, consistent with Sec. 7651g(a) of the FCAA;

- d. The ability of the administrator to obtain information from a source pursuant to Sec. 7414 of the FCAA;
- e. The ability of the Department to obtain information from a source pursuant to the Montana Clean Air Act, Title 75, Chapter 2, MCA;
- f. The emergency powers of the Department under the Montana Clean Air Act, Title 75, Chapter 2, MCA; and
- g. The ability of the Department to establish or revise requirements for the use of Reasonably Available Control Technology (RACT) as defined in ARM Title 17, Chapter 8. However, if the inclusion of a RACT into the permit pursuant to ARM Title 17, Chapter 8, Subchapter 12, is appealed to the Board, the permit shield, as it applies to the source's existing permit, shall remain in effect until such time as the Board has rendered its final decision.

- 4. Nothing in this permit alters or affects the ability of the Department to take enforcement action for a violation of an applicable requirement or permit term demonstrated pursuant to ARM 17.8.106, Source Testing Protocol.
- 5. Pursuant to ARM 17.8.132, for the purpose of submitting a compliance certification, nothing in these rules shall preclude the use, including the exclusive use, of any credible evidence or information relevant to whether a source would have been in compliance. However, when compliance or noncompliance is demonstrated by a test or procedure provided by permit or other applicable requirements, the source shall then be presumed to be in compliance or noncompliance unless that presumption is overcome by other relevant credible evidence.
- 6. The permit shield will not extend to minor permit modifications or changes not requiring a permit revision (see Sections I & J).
- 7. The permit shield will extend to significant permit modifications and transfer or assignment of ownership (see Sections K & O).

D. *Monitoring, Recordkeeping, and Reporting Requirements*

ARM 17.8, Subchapter 12, Operating Permit Program §1212(2)&(3)

- 1. Unless otherwise provided in this permit, the permittee shall maintain compliance monitoring records that include the following information:
 - a. The date, place as defined in the permit, and time of sampling or measurement;
 - b. The date(s) analyses were performed;
 - c. The company or entity that performed the analyses;
 - d. The analytical techniques or methods used;
 - e. The results of such analyses; and

- f. The operating conditions at the time of sampling or measurement.
2. The permittee shall retain records of all required monitoring data and support information for a period of at least 5 years from the date of the monitoring sample, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit. All monitoring data, support information, and required reports and summaries may be maintained in computerized form at the plant site if the information is made available to Department personnel upon request, which may be for either hard copies or computerized format. Strip-charts must be maintained in their original form at the plant site and shall be made available to Department personnel upon request.
3. The permittee shall submit to the Department, at the addresses located in the Notification Addresses Appendix of this permit, reports of any required monitoring by February 15 and August 15 of each year, or more frequently if otherwise specified in an applicable requirement or elsewhere in the permit. The monitoring report submitted on February 15 of each year must include the required monitoring information for the period of July 1 through December 31 of the previous year. The monitoring report submitted on August 15 of each year must include the required monitoring information for the period of January 1 through June 30 of the current year. All instances of deviations from the permit requirements must be clearly identified in such reports. All required reports must be certified by a responsible official, consistent with ARM 17.8.1207.

E. *Prompt Deviation Reporting*

ARM 17.8, Subchapter 12, Operating Permit Program §1212(3)(b)

The permittee shall promptly report deviations from permit requirements, including those attributable to upset conditions as defined in the permit, the probable cause of such deviations, and any corrective actions or preventive measures taken. To be considered prompt, deviations shall be reported to the Department within the following timeframes (unless otherwise specified in an applicable requirement):

1. For deviations which may result in emissions potentially in violation of permit limitations:
 - a. An initial phone notification (or faxed or electronic notification) describing the incident within 24 hours (or the next business day) of discovery; and,
 - b. A follow-up written, faxed, or electronic report within 30 days of discovery of the deviation that describes the probable cause of the reported deviation and any corrective actions or preventative measures taken.
2. For deviations attributable to malfunctions, deviations shall be reported to the Department in accordance with the malfunction reporting requirements under ARM 17.8.110; and
3. For all other deviations, deviations shall be reported to the Department via a written, faxed, or electronic report within 90 days of discovery (as determined through routine internal review by the permittee).

Prompt deviation reports do not need to be resubmitted with regular semiannual (or other routine) reports, but may be referenced by the date of submittal.

F. *Emergency Provisions*

ARM 17.8, Subchapter 12, Operating Permit Program §1201(13) and §1214(5), (6)&(8)

1. An “emergency” means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, including acts of God, which situation requires immediate corrective action to restore normal operation and causes the source to exceed a technology-based emission limitation under this permit due to the unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of reasonable preventive maintenance, careless or improper operation, or operator error.
2. An emergency constitutes an affirmative defense to an action brought for noncompliance with a technology-based emission limitation if the permittee demonstrates through properly signed, contemporaneous logs, or other relevant evidence, that:
 - a. An emergency occurred and the permittee can identify the cause(s) of the emergency;
 - b. The permitted facility was at the time being properly operated;
 - c. During the period of the emergency the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in the permit; and
 - d. The permittee submitted notice of the emergency to the Department within 2 working days of the time when emission limitations were exceeded due to the emergency. This notice fulfills the requirements of ARM 17.8.1212(3)(b). This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.
3. These emergency provisions are in addition to any emergency, malfunction or upset provision contained in any applicable requirement.

G. *Inspection and Entry*

ARM 17.8, Subchapter 12, Operating Permit Program §1213(3)&(4)

1. Upon presentation of credentials and other requirements as may be required by law, the permittee shall allow the Department, the administrator, or an authorized representative (including an authorized contractor acting as a representative of the Department or the administrator) to perform the following:
 - a. Enter the premises where a source required to obtain a permit is located or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;
 - b. Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;

- c. Inspect at reasonable times any facilities, emission units, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit; and
 - d. As authorized by the Montana Clean Air Act and rules promulgated thereunder, sample or monitor, at reasonable times, any substances or parameters at any location for the purpose of assuring compliance with the permit or applicable requirements.
2. The permittee shall inform the inspector of all workplace safety rules or requirements at the time of inspection. This section shall not limit in any manner the Department's statutory right of entry and inspection as provided for in 75-2-403, MCA.

H. *Fee Payment*

ARM 17.8, Subchapter 12, Operating Permit Program §1210(2)(f) and ARM 17.8, Subchapter 5, Air Quality Permit Application, Operation, and Open Burning Fees §505(3)-(5) (STATE ONLY)

1. The permittee must pay application and operating fees, pursuant to ARM Title 17, Chapter 8, Subchapter 5.
2. Annually, the Department shall provide the permittee with written notice of the amount of the fee and the basis for the fee assessment. The air quality operation fee is due 30 days after receipt of the notice, unless the fee assessment is appealed pursuant to ARM 17.8.511. If any portion of the fee is not appealed, that portion of the fee that is not appealed is due 30 days after receipt of the notice. Any remaining fee, which may be due after the completion of an appeal, is due immediately upon issuance of the Board's decision or upon completion of any judicial review of the Board's decision.
3. If the permittee fails to pay the required fee (or any required portion of an appealed fee) within 90 days of the due date of the fee, the Department may impose an additional assessment of 15% of the fee (or any required portion of an appealed fee) or \$100, whichever is greater, plus interest on the fee (or any required portion of an appealed fee), computed at the interest rate established under 15-31-510(3), MCA.

I. *Minor Permit Modifications*

ARM 17.8, Subchapter 12, Operating Permit Program §1226(3)&(11)

1. An application for a minor permit modification need only address in detail those portions of the permit application that require revision, updating, supplementation, or deletion, and may reference any required information that has been previously submitted.
2. The permit shield under ARM 17.8.1214 will not extend to any minor modifications processed pursuant to ARM 17.8.1226.

J. *Changes Not Requiring Permit Revision*

ARM 17.8, Subchapter 12, Operating Permit Program §1224(1)-(3), (5)&(6)

1. The permittee is authorized to make changes within the facility as described below, provided the following conditions are met:

- a. The proposed changes do not require the permittee to obtain a Montana Air Quality Permit (MAQP) under ARM Title 17, Chapter 8, Subchapter 7;
 - b. The proposed changes are not modifications under Title I of the FCAA, or as defined in ARM Title 17, Chapter 8, Subchapters 8, 9, or 10;
 - c. The emissions resulting from the proposed changes do not exceed the emissions allowable under this permit, whether expressed as a rate of emissions or in total emissions;
 - d. The proposed changes do not alter permit terms that are necessary to enforce applicable emission limitations on emission units covered by the permit; and
 - e. The facility provides the administrator and the Department with written notification at least 7 days prior to making the proposed changes.
2. The permittee and the Department shall attach each notice provided pursuant to 1.e above to their respective copies of this permit.
3. Pursuant to the conditions above, the permittee is authorized to make Sec. 502(b)(10) changes, as defined in ARM 17.8.1201(30), without a permit revision. For each such change, the written notification required under 1.e above shall include a description of the change within the source, the date on which the change will occur, any change in emissions, and any permit term or condition that is no longer applicable as a result of the change.
4. The permittee may make a change not specifically addressed or prohibited by the permit terms and conditions without requiring a permit revision, provided the following conditions are met:
 - a. Each proposed change does not weaken the enforceability of any existing permit conditions;
 - b. The Department has not objected to such change;
 - c. Each proposed change meets all applicable requirements and does not violate any existing permit term or condition; and
 - d. The permittee provides contemporaneous written notice to the Department and the administrator of each change that is above the level for insignificant emission units as defined in ARM 17.8.1201(22) and 17.8.1206(3), and the written notice describes each such change, including the date of the change, any change in emissions, pollutants emitted, and any applicable requirement that would apply as a result of the change.
5. The permit shield authorized by ARM 17.8.1214 shall not apply to changes made pursuant to ARM 17.8.1224(3) and (5), but is applicable to terms and conditions that allow for increases and decreases in emissions pursuant to ARM 17.8.1224(4).

K. *Significant Permit Modifications*

ARM 17.8, Subchapter 12, Operating Permit Program §1227(1), (3)&(4)

1. The modification procedures set forth in 2 below must be used for any application requesting a significant modification of this permit. Significant modifications include the following:
 - a. Any permit modification that does not qualify as either a minor modification or as an administrative permit amendment;
 - b. Every significant change in existing permit monitoring terms or conditions;
 - c. Every relaxation of permit reporting or recordkeeping terms or conditions that limit the Department's ability to determine compliance with any applicable rule, consistent with the requirements of the rule; or
 - d. Any other change determined by the Department to be significant.
2. Significant modifications shall meet all requirements of ARM Title 17, Chapter 8, including those for applications, public participation, and review by affected states and the administrator, as they apply to permit issuance and renewal, except that an application for a significant permit modification need only address in detail those portions of the permit application that require revision, updating, supplementation or deletion.
3. The permit shield provided for in ARM 17.8.1214 shall extend to significant modifications.

L. *Reopening for Cause*

ARM 17.8, Subchapter 12, Operating Permit Program §1228(1)&(2)

1. This permit may be reopened and revised under the following circumstances:
 - a. Additional applicable requirements under the FCAA become applicable to the facility when the permit has a remaining term of 3 or more years. Reopening and revision of the permit shall be completed not later than 18 months after promulgation of the applicable requirement. No reopening is required under ARM 17.8.1228(1)(a) if the effective date of the applicable requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms or conditions have been extended pursuant to ARM 17.8.1220(12) or 17.8.1221(2);
 - b. Additional requirements (including excess emission requirements) become applicable to an affected source under the Acid Rain Program. Upon approval by the administrator, excess emission offset plans shall be deemed incorporated into the permit;
 - c. The Department or the administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emission standards or other terms or conditions of the permit; or
 - d. The administrator or the Department determines that the permit must be revised or revoked and reissued to ensure compliance with the applicable requirements.

M. *Permit Expiration and Renewal*

ARM 17.8, Subchapter 12, Operating Permit Program §1210(2)(g), §1220(11)&(12), and §1205(2)(d)

1. This permit is issued for a fixed term of 5 years.
2. Renewal of this permit is subject to the same procedural requirements that apply to permit issuance, including those for application, content, public participation, and affected state and administrator review.
3. Expiration of this permit terminates the permittee's right to operate unless a timely and administratively complete renewal application has been submitted consistent with ARM 17.8.1221 and 17.8.1205(2)(d). If a timely and administratively complete application has been submitted, all terms and conditions of the permit, including the application shield, remain in effect after the permit expires until the permit renewal has been issued or denied.
4. For renewal, the permittee shall submit a complete air quality operating permit application to the Department not later than 6 months prior to the expiration of this permit, unless otherwise specified. If necessary to ensure that the terms of the existing permit will not lapse before renewal, the Department may specify, in writing to the permittee, a longer time period for submission of the renewal application. Such written notification must be provided at least 1 year before the renewal application due date established in the existing permit.

N. *Severability Clause*

ARM 17.8, Subchapter 12, Operating Permit Program §1210(2)(i)&(l)

1. The administrative appeal or subsequent judicial review of the issuance by the Department of an initial permit under this subchapter shall not impair in any manner the underlying applicability of all applicable requirements, and such requirements continue to apply as if a final permit decision had not been reached by the Department.
2. If any provision of a permit is found to be invalid, all valid parts that are severable from the invalid part remain in effect. If a provision of a permit is invalid in one or more of its applications, the provision remains in effect in all valid applications that are severable from the invalid applications.

O. *Transfer or Assignment of Ownership*

ARM 17.8, Subchapter 12, Operating Permit Program §1225(2)&(4)

1. If an administrative permit amendment involves a change in ownership or operational control, the applicant must include in its request to the Department a written agreement containing a specific date for the transfer of permit responsibility, coverage and liability between the current and new permittee.
2. The permit shield provided for in ARM17.8.1214 shall not extend to administrative permit amendments.

P. *Emissions Trading, Marketable Permits, Economic Incentives*

ARM 17.8, Subchapter 12, Operating Permit Program §1226(2)

Notwithstanding ARM 17.8.1226(1) and (7), minor air quality operating permit modification procedures may be used for permit modifications involving the use of economic incentives, marketable permits, emissions trading, and other similar approaches, to the extent that such minor permit modification procedures are explicitly provided for in the Montana State Implementation Plan or in applicable requirements promulgated by the administrator.

Q. *No Property Rights Conveyed*

ARM 17.8, Subchapter 12, Operating Permit Program §1210(2)(d)

This permit does not convey any property rights of any sort, or any exclusive privilege.

R. *Testing Requirements*

ARM 17.8, Subchapter 1, General Provisions §105

The permittee shall comply with ARM 17.8.105.

S. *Source Testing Protocol*

ARM 17.8, Subchapter 1, General Provisions §106

The permittee shall comply with ARM 17.8.106.

T. *Malfunctions*

ARM 17.8, Subchapter 1, General Provisions §110

The permittee shall comply with ARM 17.8.110.

U. *Circumvention*

ARM 17.8, Subchapter 1, General Provisions §111

The permittee shall comply with ARM 17.8.111.

V. *Motor Vehicles*

ARM 17.8, Subchapter 3, Emission Standards §325

The permittee shall comply with ARM 17.8.325.

W. *Annual Emissions Inventory*

ARM 17.8, Subchapter 5, Air Quality Permit Application, Operation and Open Burning Fees §505 (STATE ONLY)

The permittee shall supply the Department with annual production and other information for all emission units necessary to calculate actual or estimated actual amount of air pollutants emitted during each calendar year. Information shall be gathered on a calendar-year basis and submitted to the Department by the date required in the emission inventory request, unless otherwise specified in this permit. Information shall be in the units required by the Department.

X. *Open Burning*

ARM 17.8, Subchapter 6, Open Burning §604, 605 and 606

The permittee shall comply with ARM 17.8.604, 605 and 606.

Y. *Montana Air Quality Permits*

ARM 17.8, Subchapter 7, Permit, Construction and Operation of Air Contaminant Sources §745 and 764

1. Except as specified, no person shall construct, install, modify or use any air contaminant source or stack associated with any source without first obtaining a permit from the Department or Board. A permit is not required for those sources or stacks as specified by ARM 17.8.744(1)(a)-(k).
2. The permittee shall comply with ARM 17.8.743, 744, 745, 748, and 764.
3. ARM 17.8.745(1) specifies de minimis changes as construction or changed conditions of operation at a facility holding an MAQP issued under Chapter 8 that does not increase the facility's potential to emit by more than five tons per year of any pollutant, except:
 - a. Any construction or changed condition that would violate any condition in the facility's existing MAQP or any applicable rule contained in Chapter 8 is prohibited, except as provided in ARM 17.8.745(2);
 - b. Any construction or changed conditions of operation that would qualify as a major modification under Subchapters 8, 9 or 10 of Chapter 8;
 - c. Any construction or changed condition of operation that would affect the plume rise or dispersion characteristic of emissions that would cause or contribute to a violation of an ambient air quality standard or ambient air increment as defined in ARM 17.8.804;
 - d. Any construction or improvement project with a potential to emit more than 5 tons per year may not be artificially split into smaller projects to avoid air quality permitting; or
 - e. Emission reductions obtained through offsetting within a facility are not included when determining the potential emission increase from construction or changed conditions of operation, unless such reductions are made federally enforceable.
4. Any facility making a de minimis change pursuant to ARM 17.8.745(1) shall notify the Department if the change would include a change in control equipment, stack height, stack diameter, stack gas temperature, source location or fuel specifications, or would result in an increase in source capacity above its permitted operation or the addition of a new emission unit. The notice must be submitted, in writing, 10 days prior to start up or use of the proposed de minimis change, or as soon as reasonably practicable in the event of an unanticipated circumstance causing the de minimis change, and must include the information requested in ARM 17.8.745(1).

Z. *National Emission Standard for Asbestos*
40 CFR, Part 61, Subpart M

The permittee shall not conduct any asbestos abatement activities except in accordance with 40 CFR 61, Subpart M (National Emission Standard for Hazardous Air Pollutants for Asbestos).

AA. *Asbestos*

ARM 17.74, Subchapter 3, General Provisions and Subchapter 4, Fees

The permittee shall comply with ARM 17.74.301, *et seq.*, and ARM 17.74.401, *et seq.* (State only)

BB. *Stratospheric Ozone Protection – Servicing of Motor Vehicle Air Conditioners*
40 CFR, Part 82, Subpart B

If the permittee performs a service on motor vehicles and this service involves ozone-depleting substance/refrigerant in the motor vehicle air conditioner (MVAC), the permittee is subject to all the applicable requirements as specified in 40 CFR 82, Subpart B.

CC. *Stratospheric Ozone Protection – Recycling and Emission Reductions*
40 CFR, Part 82, Subpart F

The permittee shall comply with the standards for recycling and emission reductions in 40 CFR 82, Subpart F, except as provided for MVACs in Subpart B:

1. Persons opening appliances for maintenance, service, repair, or disposal must comply with the required practices pursuant to §82.156;
2. Equipment used during the maintenance, service, repair or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to §82.158;
3. Persons performing maintenance, service, repair or disposal of appliances must be certified by an approved technical certification program pursuant to §82.161;
4. Persons disposing of small appliances, MVACs and MVAC-like (as defined at §82.152) appliances must comply with recordkeeping requirements pursuant to §82.166;
5. Persons owning commercial or industrial process refrigeration equipment must comply with the leak repair requirements pursuant to §82.156; and
6. Owners/operators of appliances normally containing 50 or more pounds of refrigerant must keep records of refrigerant purchased and added to such appliances pursuant to §82.166.

DD. *Emergency Episode Plan*

The permittee shall comply with the requirements contained in Chapter 9.7 of the State of Montana Air Quality Control Implementation Plan.

Each major source emitting 100 tons per year located in a Priority I Air Quality Control Region, shall submit to the Department a legally enforceable Emergency Episode Action Plan (EEAP) that details how the source will curtail emissions during an air pollutant emergency episode. The

industrial EEAP shall be in accordance with the Department's EEAP and shall be submitted according to a timetable developed by the Department, following Priority I reclassification.

EE. Definitions

Terms not otherwise defined in this permit or in the Definitions and Abbreviations Appendix of this permit, shall have the meaning assigned to them in the referenced regulations.

APPENDICES

Appendix A INSIGNIFICANT EMISSION UNITS

Disclaimer: The information in this appendix is not State or Federally enforceable, but is presented to assist RML, the permitting authority, inspectors, and the public.

Pursuant to ARM 17.8.1201(22)(a), an insignificant emission unit means any activity or emissions unit located within a source that: (i) has a potential to emit less than 5 tons per year of any regulated pollutant; (ii) has a potential to emit less than 500 pounds per year of lead; (iii) has a potential to emit less than 500 pounds per year of hazardous air pollutants listed pursuant to Sec. 7412 (b) of the FCAA; and (iv) is not regulated by an applicable requirement, other than a generally applicable requirement that applies to all emission units subject to Subchapter 12.

List of Insignificant Activities:

The following table of insignificant sources and/or activities were provided by RML. Because there are no requirements to update such a list, the emission units and/or activities may change from those specified in the table.

Emissions Unit ID	Description
IEU01 (IEU-01)	20,000 Gallon Fuel Oil Storage Tank (AST-01)
IEU02	4,000 Gallon Fuel Storage Tank (AST-02)
IEU03	10,000 Gallon Fuel Storage Tank (AST-03)
IEU04	300 Gallon Fuel Storage Tank (AST-04)
IEU05	300 Gallon Fuel Storage Tank (AST-05)
IEU06	12,000 Gallon Fuel Storage Tank (AST-06)
IEU07	12,000 Gallon Fuel Storage Tank (AST-07)
IEU08	12,000 Gallon Fuel Storage Tank (AST-08)
IEU09	12,000 Gallon Fuel Storage Tank (AST-09)
IEU10	500 Gallon Fuel Storage Tank (D-1)
IEU11	600 Gallon Fuel Storage Tank (D-2)
IEU12	300 Gallon Fuel Storage Tank (D-3)
IEU13	690 Gallon Fuel Storage Tank (D-4)
IEU14	690 Gallon Fuel Storage Tank (D-5)
IEU15	690 Gallon Fuel Storage Tank (D-6)
IEU16	690 Gallon Fuel Storage Tank (D-7)
IEU17	1000 Gallon Portable Fuel Storage Tank (P-1)
IEU18	500 Gallon Fuel Storage Tank (P-2)
IEU19 (IEU-02)	Vent Hoods

Appendix B DEFINITIONS and ABBREVIATIONS

"Act" means the Clean Air Act, as amended, 42 U.S. 7401, *et seq.*

"Administrative permit amendment" means an air quality operating permit revision that:

- (a) Corrects typographical errors;
- (b) Identifies a change in the name, address or phone number of any person identified in the air quality operating permit, or identifies a similar minor administrative change at the source;
- (c) Requires more frequent monitoring or reporting by RML;
- (d) Requires changes in monitoring or reporting requirements that the Department deems to be no less stringent than current monitoring or reporting requirements;
- (e) Allows for a change in ownership or operational control of a source if the Department has determined that no other change in the air quality operating permit is necessary, consistent with ARM 17.8.1225; or
- (f) Incorporates any other type of change that the Department has determined to be similar to those revisions set forth in (a)-(e), above.

"Applicable requirement" means all of the following as they apply to emission units in a source requiring an air quality operating permit (including requirements that have been promulgated or approved by the Department or the administrator through rule making at the time of issuance of the air quality operating permit, but have future-effective compliance dates, provided that such requirements apply to sources covered under the operating permit):

- (a) Any standard, rule, or other requirement, including any requirement contained in a consent decree or judicial or administrative order entered into or issued by the Department, that is contained in the Montana state implementation plan approved or promulgated by the administrator through rule making under Title I of the FCAA;
- (b) Any federally enforceable term, condition or other requirement of any MAQP issued by the Department under Subchapters 7, 8, 9 and 10 of this chapter, or pursuant to regulations approved or promulgated through rule making under Title I of the FCAA, including parts C and D;
- (c) Any standard or other requirement under Sec. 7411 of the FCAA, including Sec. 7411(d);
- (d) Any standard or other requirement under Sec. 7412 of the FCAA, including any requirement concerning accident prevention under Sec. 7412(r)(7), but excluding the contents of any risk management plan required under Sec. 7412(r);
- (e) Any standard or other requirement of the acid rain program under Title IV of the FCAA or regulations promulgated thereunder;

- (f) Any requirements established pursuant to Sec. 7661c(b) or Sec. 7414(a)(3) of the FCAA;
- (g) Any standard or other requirement governing solid waste incineration, under Sec. 7429 of the FCAA;
- (h) Any standard or other requirement for consumer and commercial products, under Sec. 7511b(e) of the FCAA;
- (i) Any standard or other requirement for tank vessels, under Sec. 7511b(f) of the FCAA;
- (j) Any standard or other requirement of the regulations promulgated to protect stratospheric ozone under Title VI of the FCAA, unless the administrator determines that such requirements need not be contained in an air quality operating permit;
- (k) Any national ambient air quality standard or increment or visibility requirement under part C of Title I of the FCAA, but only as it would apply to temporary sources permitted pursuant to Sec. 7661c(e) of the FCAA; or
- (l) Any federally enforceable term or condition of any air quality open burning permit issued by the Department under subchapter 6.

"Department" means the Montana Department of Environmental Quality.

"Emissions unit" means any part or activity of a stationary source that emits or has the potential to emit any regulated air pollutant or any pollutant listed under Sec. 7412(b) of the FCAA. This term is not meant to alter or affect the definition of the term "unit" for purposes of Title IV of the FCAA.

"FCAA" means the Federal Clean Air Act, as amended.

"Federally enforceable" means all limitations and conditions which are enforceable by the administrator, including those requirements developed pursuant to 40 CFR Parts 60 and 61, requirements within the Montana state implementation plan, and any permit requirement established pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR Part 51, Subpart I, including operating permits issued under an EPA approved program that is incorporated into the Montana state implementation plan and expressly requires adherence to any permit issued under such program.

"Fugitive emissions" means those emissions that could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening.

"General air quality operating permit" or **"general permit"** means an air quality operating permit that meets the requirements of ARM 17.8.1222, covers multiple sources in a source category, and is issued in lieu of individual permits being issued to each source.

"General refuse" means household type garbage such as foodstuffs, lunchroom wastes, and drink containers; office refuse such as discarded paper, plastic, and cardboard containers; and packaging and shipping materials from incoming shipments of laboratory supplies and equipment. Such refuse shall not include electronic equipment such as computer monitors, hazardous chemicals, spent

batteries, spent fluorescent bulbs, mercury containing thermostats, switches, bulbs, pesticides, and plastics containing poly vinyl chloride (PVC).

"Hazardous air pollutant" means any air pollutant listed as a hazardous air pollutant pursuant to Sec. 112(b) of the FCAA.

"Non-federally enforceable requirement" means the following as they apply to emission units in a source requiring an air quality operating permit:

- (a) Any standard, rule, or other requirement, including any requirement contained in a consent decree, or judicial or administrative order entered into or issued by the Department, that is not contained in the Montana state implementation plan approved or promulgated by the administrator through rule making under Title I of the FCAA;
- (b) Any term, condition or other requirement contained in any MAQP issued by the Department under Subchapters 7, 8, 9 and 10 of this chapter that is not federally enforceable;
- (c) Does not include any Montana ambient air quality standard contained in Subchapter 2 of this chapter.

"Permittee" means the owner or operator of any source subject to the permitting requirements of this subchapter, as provided in ARM 17.8.1204, that holds a valid air quality operating permit or has submitted a timely and complete permit application for issuance, renewal, amendment, or modification pursuant to this subchapter.

"Regulated air pollutant" means the following:

- (a) Nitrogen oxides or any volatile organic compounds;
- (b) Any pollutant for which a national ambient air quality standard has been promulgated;
- (c) Any pollutant that is subject to any standard promulgated under Sec. 7411 of the FCAA;
- (d) Any Class I or II substance subject to a standard promulgated under or established by Title VI of the FCAA; or
- (e) Any pollutant subject to a standard or other requirement established or promulgated under Sec. 7412 of the FCAA, including but not limited to the following:
 - (i) Any pollutant subject to requirements under Sec. 7412(j) of the FCAA. If the administrator fails to promulgate a standard by the date established in Sec. 7412(e) of the FCAA, any pollutant for which a subject source would be major shall be considered to be regulated on the date 18 months after the applicable date established in Sec. 7412(e) of the FCAA;
 - (ii) Any pollutant for which the requirements of Sec. 7412(g)(2) of the FCAA have been met but only with respect to the individual source subject to Sec. 7412(g)(2) requirement.

"Responsible official" means one of the following:

- (a) For a corporation: a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or a duly authorized representative of such person if the representative is responsible for the overall operation of one or more manufacturing, production, or operating facilities applying for or subject to a permit and either:
 - (i) The facilities employ more than 250 persons or have gross annual sales or expenditures exceeding \$25 million (in second quarter 1980 dollars); or
 - (ii) The delegation of authority to such representative is approved in advance by the Department.
- (b) For a partnership or sole proprietorship: a general partner or the proprietor, respectively.
- (c) For a municipality, state, federal, or other public agency: either a principal executive officer or ranking elected official. For the purposes of this part, a principal executive officer of a federal agency includes the chief executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., a regional administrator of the environmental protection agency).
- (d) For affected sources: the designated representative in so far as actions, standards, requirements, or prohibitions under Title IV of the FCAA or the regulations promulgated thereunder are concerned, and the designated representative for any other purposes under this subchapter.

Appendix D AIR QUALITY INSPECTOR INFORMATION

Disclaimer: The information in this appendix is not State or Federally enforceable, but is presented to assist RML, permitting authority, inspectors, and the public.

- 1. Direction to Plant:** The RML facility is located at 903 4th Street in Hamilton, MT.
- 2. Safety Equipment Required:** None within public access areas.
- 3. Facility Plot Plan:** A facility plot plan was provided in the application for Operating Permit #OP2991-01, a copy is on file with the Department and is available upon request.
