

CHARGE AHEAD MONTANA

Janny Kirk

Owner of both a Tesla Model S
and Model X

What made you decide to buy your electric vehicles?

Economics – we figured it was overall less expensive to drive an electric vehicle than an internal combustion engine vehicle... We also liked the environmental aspect of the EV.

What has been your favorite part of owning electric vehicles?

The joy of driving has been amazing... While driving, there are absolutely no worries.

What has been the most challenging part of owning electric vehicles?

It is very tempting to go over the speed limit, the ride is so smooth!

Have you ever taken your electric vehicle on a trip? If so, where to?

Yes, we did a road trip to San Francisco and to Salt Lake City.

Have you had any problems with them during the winter?

We found that the best driving in snow requires snow tires. Otherwise, driving in snow is no problem whatsoever. The cars are extremely heavy and can get through most anything.

Would you recommend an electric vehicle to someone considering buying a new car?

Absolutely. Buy one, you won't be sorry. As you can tell, I am a Tesla fan. The reason we went with Tesla is that it has the largest charging network.

What advice would you give to someone considering buying an electric vehicle?

Take the plunge – you won't regret it. Do your research and figure out what your driving needs are and what the daily usage would be. Then you can make the best decision as to the best EV to purchase.
