

	Objective/Mission: Bring Montana's energy future into focus and lead the nation in affordable, reliable energy.		
Goal	Establish an actionable plan for cost-effective, reliable energy for Montana, with market driven solutions and consistency in the regulatory environment that secures economic growth.		
Sept. 25 - Sept. 26	Metrics should consider an assessment of who benefits/who pays and how those costs are shared.		
Strategy	Initiative	Subcommittee/Work Group	Metric
Montana First	Press forward on fuel neutrality. Comply with existing regulation and respect community priorities.	Generation Work Group	# Barriers to development and remedies in statute, rule, and practice.
Legacy and Change	Ensure available and reliable energy resources are in place and under development to meet critical economic security and safety demands.	Generation Work Group	# Strategies to bolster resource adequacy opportunities and innovation for market response.
Reliable and Cost-Effective	Establish policies and business environment to support delivery of energy in the quantity and quality demanded by users, while ensuring Montanans rates aren't adversely impacted.	Growing Demand, Generation, and Regional Markets and Transmission Work Group	# Initiatives and best practices in comparable states. Assessment of energy governance.
Legacy and Change	Identify need and opportunity for larger role in attracting energy development capital. Encourage competition and innovation in the marketplace.	Growing Demand Work Group	# Review steps to attract energy development capital and optimal methods to encourage competition and innovation.
Regional Context	Broaden Montana's energy export and import market. Determine Montana's role in a regionalized and global marketplace.	Transmission and Markets Work Group	# Policies committed to strengthening energy delivery systems for internal and external customers.
Regional Context	Ensure Montana's energy needs and priorities are represented in regional transmission and market planning forums and advance Montana's priorities in transmission and market planning forums.	Transmission and Markets Work Group	# Identify transmission constraints on access to markets and prioritize development needs and opportunities to maximize use of existing transmission capacity.
