Re: Deficiency Comments on Application for Amendment to Exploration License No. 00901

Dear Robert Procop,

The Department of Environmental Quality (DEQ) received your application for an amendment to Exploration License No. 00901 on July 1, 2026. DEQ has provided the following deficiency comments that must be addressed before DEQ can begin processing the application. A complete application must be submitted before any further processing of the application.

1.) **Project Quantities and Dimensions (Overland Travel)-** The application identifies zero feet of overland travel; however, the proposed 52-hole drilling program appears to require travel by the drill rig and support vehicles between existing access routes and individual drill sites. Please clarify whether overland travel is proposed and, if so, revise the application and project map to identify travel routes, and provide the cumulative length and approximate width. If no overland travel is proposed, explain how all drill locations would be accessed without it.

2.) **Structures (Portable Toilets)-** If portable toilets will be used on site, please identify the quantity.

3.) **Cultural Resources -** Please provide additional details regarding which agencies would be contacted if a cultural resource is discovered.

Sincerely,

Mark Odegard, P.G.
Reclamation Specialist
Small Miner and Exploration Program
