Notice of Completeness: Application for Exploration License No. 00907

Dear Robin Hunt,

The Department of Environmental Quality (DEQ) received a complete application for Exploration License No. 00907 on August 20, 2026. The application proposes drilling 14 drill pads to drill 16 holes to assess the commercial potential of an ore deposit at the Kearsage Project, located approximately 5 miles south of Virginia City, Montana.

The next step in processing the application for Exploration License No. 00907 is for DEQ to conduct an environmental review. Pursuant to the Montana Code Annotated (MCA), 75-1-208 (4)(a)(ii), DEQ must complete an environmental assessment within 90 days of receiving a complete application. An environmental assessment on the proposed application for Exploration License No. 00907 must be completed by **November 18, 2026**.

A draft bond will be calculated based on the application. It would include the reclamation of 14 drill pads, 16 drill holes, staging areas, revegetation, weed control, and indirect and contingency costs. **Additional questions may be necessary to complete the MEPA review process.**

Please contact me if you have any questions related to this Notice of Completeness.

Sincerely,

Nicholas Allin
Reclamation Specialist
