

INSTRUCTIONS FOR COMPLETING THE 2021 MONTANA LARGE QUANTITY HAZARDOUS WASTE GENERATOR BIENNIAL REPORT FORM

IMPORTANT: READ <u>ALL</u> INSTRUCTIONS CAREFULLY BEFORE COMPLETING THE BIENNIAL HAZARDOUS WASTE REPORT FORM FOR 2021

GENERAL INSTRUCTIONS

Who Must File

You are required to file the 2021 Hazardous Waste Biennial Report if this site meets **ANY** of the following criteria:

- Generate, in any calendar month, 1,000 kilograms (2,200 pounds) or more of non-acute RCRA hazardous waste (which includes quantities imported by importer site); OR
- Generate, in a calendar month, or accumulates at any time, more than 1 kilogram per month (kg/ mo) (2.2 pounds per month [lb/ mo]) of any RCRA acute hazardous waste listed in 40 CFR 261.31 or 261.33(e); OR
- Generate, in any calendar month, or accumulates at any time, more than 100 kg/ mo (220 lb/ mo) of residue
 or contaminated soil, waste, or other debris resulting from the cleanup of a spill, into or on any land or water, of
 any RCRA acute hazardous waste listed in 40 CFR 261.31 or 261.33(e); OR
- Accumulate on site at any time more than 6,000 kg (13,227 pounds) of hazardous waste.

If you do not meet the above criteria of a LQG, but you do meet the below criteria for a small quantity generator of hazardous waste, you must submit an annual report. See our website or contact our office for the correct forms and instructions.

- Generate, in any calendar month, more than 100 kg (220 pounds), but less than 1000 kg (2200 pounds) of non-acute hazardous waste; OR
- The site *never* generated more than 100 kg (220 pounds) in any month but accumulated more than 1000 kg (2200 pounds) of hazardous waste at any time during the year.

NOTE: If you do not meet the above large or small quantity generator criteria during 2021, you are not required to submit the entire report form. However, please complete and submit Part 1 of the report.

To obtain assistance in filling out the report form, please contact your <u>regional inspector</u> or the DEQ Hazardous Waste Program at (406) 444-5300.

When and Where to File

The report, which covers hazardous waste activities for calendar year 2021, must be submitted to: Waste & Underground Tank Management Bureau, Hazardous Waste Program, no later than **March 1, 2022**. **You may be subject to enforcement action if you do not file by that date.**

Submit completed reports to:

Waste & Underground Tank Management Bureau
Hazardous Waste Program
P.O. Box 200901 - mail
1520 East Sixth Ave - FedEx/UPS
Helena, MT 59620-0901
email: DEQHazWaste@mt.gov

What Must Be Reported

Administrative Rules of Montana (ARM) §17.53.603 requires any hazardous waste generated during calendar year 2021 (that was required to be accompanied by a completed Uniform Hazardous Waste Manifest, or equivalent documentation) be reported in the 2021 report. Additionally, any generator who treats, stores, or disposes of hazardous waste **on-site** must submit an annual report covering those wastes.

You need **not** report any wastes that are not regulated as hazardous under the Montana hazardous waste regulations, **even if manifested** (e.g., PCBs, asbestos, etc.)

Only wastes or portions of waste shipments that are regulated as either <u>characteristic</u> or <u>listed hazardous wastes</u> must be reported. The characteristic and listed wastes are identified in **Subparts C & D of 40 CFR Part 261**. They may be accessed at this website:

U.S. EPA Laws & Regulations, Title 40, Chapter I - Environmental Protection Agency, Subchapter I - Solid Waste, Part 261: eCFR :: 40 CFR Part 261 -- Identification and Listing of Hazardous Waste

Subpart C:

(Dxxx codes) § 261.24 – Toxicity Characteristic (i.e., ignitability, corrosivity, reactivity, and toxicity).

Subpart D:

- (Fxxx codes) § 261.31 Hazardous wastes from non-specific sources.
- (Kxxx codes) § 261.32 Hazardous wastes from specific sources.
- (*Pxxx and Uxxx codes*) § 261.33 Discarded commercial chemical products, off-specification species, container residues, and spill residues thereof.

Please enter missing information and/or corrections in the SHADED areas of the form.

PART ONE – Generator Information

I. REASON FOR SUBMITTAL

The box for the Component of the Hazardous Waste Report is already checked. Read the statement below this and if the statement applies, please check this box.

If you would like to change any information that has been pre-populated on this form, check the box by Provide Subsequent Notification (to update site information).

<u>2021 REGISTERED STATUS</u> - This is your current registration status during 2021. If you wish to change your status, please indicate new status in the comments section.

II. EPA ID # / DEQ AREA

Verify your business' 12-character U.S. EPA identification (EPA ID) number.

DEQ Area: For assistance, please contact your regional inspector:

REGION	INSPECTOR	CONTACT
Area 1	Jennifer Strause	(406) 431-3148 Jennifer.Strause@mt.gov
Area 2	Denise Kirkpatrick	(406) 444-3983 DKirkpatrick@mt.gov

III. SITE NAME

Verify the name of your business. Indicate any changes in the gray box to the right.

IV. CURRENT REGULATED WASTE ACTIVITIES

Please check all the boxes that apply for the types of regulated waste activities at your site as of the end of the 2021 reporting year

LQG (LARGE QUANTITY GENERATOR) - If **ANY** of the following criteria was met during 2021 then the site was a Large Quantity Generator (LQG):

- The site generated more than 1000 kg (2200 lb) of hazardous waste in any calendar month; OR
- The site generated in any calendar month, or accumulated at any time, 1 kg (2.2 lb) or more of acute hazardous waste; **OR**
- The site generated or accumulated at any time more than 100 kg (220 lb) of spill cleanup materials contaminated with acute hazardous waste; **OR**
- The site accumulated at any time more than 6,000 kg (13,227 lb) of hazardous waste.

SQG (SMALL QUANTITY GENERATOR) - If **ANY** of the following criteria was met during 2021 then the site was a Small Quantity Generator (SQG):

- The site generated more than 100 kg (220 lb), but no more than 1000 kg (2200 lb) of non-acute hazardous waste, in any single calendar month; **OR**
- The site *never* generated more than 100 kg (220 lb) in any month but *accumulated* more than 1000 kg (2200 lb) of non-acute hazardous waste at any time during the year.

<u>CESQG (CONDITIONALLY EXEMPT SMALL QUANTITY GENERATOR)</u> - A site is a conditionally exempt generator if, within <u>EACH</u> calendar month:

- The site <u>generated</u> no more than 100 kg (220 lb) of hazardous waste, or no more than 1 kg (2.2 lb) of acute hazardous waste, or no more than 100 kg (220 lb) of material from the cleanup of a spillage of acutely hazardous wastes; OR
- The site <u>accumulated</u> no more than 1,000 kg (2200 lb) of hazardous waste, **or** no more than 1 kg (2.2 lb) of acute hazardous waste, **or** no more than 100 kg (220 lb) of material from the cleanup of a spillage of acutely hazardous wastes.

<u>SHORT TERM/ONE-TIME</u> - The activity at the site was a one-time or short-term, non-recurring, temporary event. Example: Spill Cleanup.

<u>MON-HANDLER</u> - Did not generate hazardous waste in any quantity during 2021 but wish to remain active at their current 2021 Registered Status.

<u>OUT OF BUSINESS</u> - Did not generate hazardous waste in any quantity during 2021, <u>because</u> the establishment was closed for business *prior to January 1, 2021*.

<u>IMPORTER OF HW (HAZARDOUS WASTE)</u> – You import hazardous waste from a foreign country into the United States.

MIXED WASTE GENERATOR – You generate mixed waste (waste that is both hazardous and radioactive).

HW TRANSPORTER – You transport hazardous waste within the United States.

TRANSFER FACILITY – You are a hazardous waste transfer facility if you hold manifested waste for a period of ten (10) days or less while the waste is in transit.

<u>TREATER, STORER, OR DISPOSER OF HW</u> – You treat, store, or dispose of hazardous waste. *Note: A "Part B" Permit is required for this activity – please contact the Hazardous Waste Program for more information.*

¹ The Conditionally Exempt Small Quantity Generator (CESQG) category will soon be renamed Very Small Quantity Generator (VSQG) upon the implementation of updated Montana hazardous waste regulations, which are coming in 2022.

RECYCLER OF HW - You recycle regulated hazardous waste (recyclable materials).

SMALL QUANTITY ON-SITE BURNER EXEMPTION – You burn small quantities of hazardous waste in an on-site boiler or industrial furnace and comply with all applicable regulations (e.g., Clean Air Act, etc.).

<u>SMELTING, MELTING, AND REFINING FURNACE EXEMPTION</u> – You process hazardous wastes in a smelting, melting, or refining furnace solely for metals recovery or to recover economically significant amounts of precious metals or you process hazardous wastes in a lead recover furnace to recover lead and comply with all applicable regulations (e.g., Clean Air Act, etc.).

<u>UNDERGROUND INJECTION CONTROL</u> – You generate, treat, store, or dispose of hazardous waste and place the waste into an underground injection well located at your site.

<u>RECEIVES HW FROM OFF-SITE</u> – You receive hazardous waste from another site, whether this was a commercial transaction or waste received from a restricted group of off-site generators.

LARGE QUANTITY HANDLER OF UNIVERSAL WASTE (UW) – You accumulate a total of 5,000 kg or more of universal wastes (batteries, pesticides, mercury-containing equipment, or lamps – calculated collectively) at any time. Check which types of waste are managed at your site.

<u>DESTNATION FACILITY FOR UNIVERSAL WASTE</u> – You treat, dispose, or recycle universal wastes on-site. A permit is required if you treat or dispose of universal wastes; a permit may be required if you recycle universal wastes. Please contact the Hazardous Waste Program for more information.

USED OIL (UO) TRANSPORTER – You transport used oil within the United States.

<u>UO TRANSFER FACILITY</u> – You own or operate a used oil transfer facility.

<u>UO PROCESSOR</u> – You process used oil.

<u>UO RE-REFINER</u> – You produce lubricating oils and greases, industrial fuel, asphalt extender, gasoline, and other products from on- or off-specification used oil.

OFF-SPECIFICATION UO BURNER – You burn off-specification used oil fuel.

<u>MARKETER WHO DIRECTS SHIPMENT OF OFF-SPECIFICATION UO TO OFF-SPECIFICATION UO BURNERS</u> – You are a marketer who directs shipment of off-specification used oil to off-specification used oil burners.

<u>MARKETER WHO FIRST CLAIMS THE USED OIL MEETS THE SPECIFICATION</u> – You are the first to demonstrate that the used oil meets the used oil specification.

V. LAND TYPE

Check only one box that best describes the land type of your site. If your site could be described as Municipal and another type such as County, District, or Tribal do not check Municipal but the other appropriate type.

VI. NAICS

Verify the North American Industry Classification System (NAICS) code(s) or enter the code(s) that best describes your site's primary and other business production processes for your products or services. For a listing of NAICS codes see the NAICS website is: https://www.census.gov/naics/. Check the website to be sure you list the latest version of the NAICS codes.

VII. SITE LOCATION ADDRESS

Verify the address, city, state, and zip code for the physical location of your site. **Do not use a post office box or mailing address.**

VIII. SITE MAILING ADDRESS

Verify the mailing address, city, state, and zip code for your site.

IX. SITE CONTACT & ALTERNATE CONTACT PERSONS

Verify the name, title, telephone, extension, mailing address (address, city, state, zip code), facsimile number, and email address for the individual (site Contact Person) who should be contacted regarding the information submitted in the EPA Form 8700-12, RCRA Subtitle C Site Identification Form. If the person completing the Hazardous Waste Report is not the primary site RCRA hazardous waste contact, enter their name in the Comments section (item XII).

Verify the name, title, telephone number, extension, and email address of an Alternate Contact we can contact if the Contact Person is not available.

X. SITE LEGAL OWNER

Verify or provide <u>all</u> the site's legal owner(s) name, type, mailing address (address city, state, zip code), telephone number, and date (MM/DD/YYYY) they become the owner. **Owner** is the person who owns the site or part of the site including <u>building(s)</u> and/or land. Please identify by owner type, i.e., site, land, building. A person is defined as an individual, trust, firm, joint stock company, Federal Agency, corporation (including a government corporation), partnership, association, State, municipality, commission, political subdivision of a State, or any interstate body. **List any additional owner(s) in the Comments section (item XII).**

XI. OPERATOR

Verify or provide <u>all</u> the site's operator(s) name, type, and date (MM/DD/YYYY) they became the operator. The operator is the person responsible for the overall operation of your site. *This is the legal entity which controls the site operation rather than the plant or site manager.* This is usually a company or business name but could be an individual. See definition of Person under X. Site Legal Owner. List any additional operators in the Comments section (item XII).

XII. COMMENTS

Use this Comments section to provide additional information for Items I-XI. Reference the item number with each comment.

XIII. CERTIFICATION

- 1. Type or print the name and title of the owner or operator of the facility or an authorized representative and date signed.
- 2. Signature:
 - a. Electronic Submittal: Insert an electronic signature or type the name
 - b. Hard Copy by Mail or Delivery: Print the report and sign.

PART TWO - Waste Identification

In general, **each** generated RCRA hazardous waste that is used to determine the site's generator status should be reported in Part Two.

See Appendix A for examples of waste to be reported and materials and waste not to be reported.

Refer to Appendix B, Excluded Wastes, for a partial list of excluded or exempted materials and wastes.

Refer to <u>Appendix C</u>, Special Instructions for reporting lab packs, asbestos, PCBs, waste oils, groundwater contaminated by hazardous waste, RCRA-radioactive mixed wastes, and laboratory clean-out wastes.

For further information, please see the EPA document Biennial Report: Reportable and Non-Reportable Wastes located at: https://www.epa.gov/sites/default/files/2021-05/documents/excerpt biennial report rcra subtitlec forms and instruction 5 12 2021.pdf

Complete Part Two if the site generated hazardous waste that was accumulated on-site, managed on-site in a treatment, storage, or disposal unit, shipped off-site for management, and/or imported from a foreign country.

A single copy of Part Two is included. Make as many copies as needed to complete your Hazardous Waste Report and submit the completed Page(s) with the original report form.

Additional Montana 2021 Instructions and Biennial Large Quantity Hazardous Waste Generator Report Forms can be downloaded from the DEQ Hazardous Waste Program forms website: https://deq.mt.gov/twr/assistance

Documents Helpful in Filling out the Form

- Hazardous waste manifests
- Hazardous waste report forms submitted in previous years
- Records of quantities of hazardous waste generated or accumulated on-site
- Results of laboratory analyses of your waste
- Contracts or agreements with off-site facilities managing your wastes
- Copies of permits for on-site waste management systems

Note: If a waste was generated and shipped out-of-country, **DO NOT** include it in Part Two. Complete the Annual Hazardous Waste (HW) Report for Exports of HW to a Foreign Country per 40 CFR 262.56. A sample report template with information is on the HW Program's website at https://deq.mt.gov/twr/assistance

Line #:

A separate line entry is required for each different waste or waste mixture that was shipped to a facility identified in Column J (Receiving Facility).

Enter consecutive line numbers for each different reportable waste or waste mixture.

Column A - Is this Remediation Waste?

Check the box in this column if the waste stream being reported is a remediation waste (hazardous waste, debris, and media, including ground water, surface water, soils, and sediments that are managed for implementing cleanup or as a result of final closure of the entire facility).

Column B - Description of Waste

Supply the name or description of the waste (general type, source, type of hazard, and generic chemical name or primary hazardous waste constituents – example: Ignitable spent solvent from degreasing operation in tool production; mixture of mineral spirits and kerosene). Typically, this information is obtained from the hazardous waste shipping documents. Hazardous waste descriptions can also be found in Subparts C & D of 40 CFR Part 261.

Column C – EPA Hazardous Waste Codes

The EPA hazardous waste code is a four-unit code made up of a single alphabetic prefix (D, F, K, P, U) followed by a three-digit number. That number may be found on hazardous waste shipping documents or in Subparts C & D of 40 CFR Part 261. If more space is needed to record waste codes, list additional codes in the Comments section below and reference the appropriate line number. See Appendix D for the list of EPA hazardous waste codes.

Column D - Source Code and Management Method Code for Source Code G25

Enter the Source Code that best describes how the hazardous waste reported in Column B originated. Only enter the Source Code for the hazardous waste portion of the waste.

Please review your previous cycle's source and management method codes to see if they still apply. If applicable, use those same codes for consistency.

If reporting Source Code G25 (Appendix E), also enter a Management Method Code (Appendix G), except Code H141.

If entering Source Code G61 (Appendix E), the generation amount must be zero (0).

See Appendix E for a list of Source Codes and Appendix G for a list of Management Method Codes.

Column E - Form Code

Enter the Form Code that best corresponds to the physical form or chemical composition of the hazardous waste reported in Column A.

Please review your previous cycle's form codes to see if they still apply. If applicable, use those same codes for consistency.

See Appendix F for a list of Form Codes.

Column F - Quantity Generated

Enter the total amount of waste or waste mixture generated, as described in Column B.

If you generate the same waste stream several times during the year and **do not** ship it, the waste stream <u>should be a one line</u> entry with the total quantity generated for all of 2021 **and enter '0' in Column L (**Quantity Shipped).

If you generate the same waste stream several times during the year and ship some or all of it, see instructions for Column L (Quantity Shipped).

Column G - Unit of Measure/Density

Enter the unit of measure code for the quantity of waste described in Column B. Units of measure, which must be used in this report, are:

- Pounds (lb)
- Tons (i.e., short tons, T equal to 2,000 lb)
- Cubic yards (yd3 must include an accurate density)
- Gallons (gal must include an accurate density)

Acceptable units of density are:

- lb/gal
- Specific gravity, referenced to the density of water at 4°C (39°F); if another reference density is used, please note such in the Comments section below.
- If density units are different than listed above, please note such in the Comments section below (i.e., grams per milliliter, g/ml, etc.)

Column H - Waste Minimization Code

Select the code (listed below) that best corresponds to the waste minimization, recycling, or pollution prevention efforts implemented for each waste stream reported in Column B.

WASTE MINIMIZATION EFFORT		
Continued to reduced quantity and/or toxicity of waste	Α	
Continued to recycle waste	В	
Implemented new efforts to reduce quantity and/or toxicity of waste	С	
Implemented new efforts to recycle waste	D	
Efforts are economically or technically impracticable	N	
No waste minimization efforts implemented.		

Column I - On-Site Process

If waste was generated and treated, disposed, and/or recycled on-site, enter the Management Method Code (<u>Appendix G</u>) to classify the process that best identifies the final substantive purpose/operation the facility performed on-site. Enter the quantity in the same unit of measure reported in Column G.

Space is provided for a second on-site process. Use only when:

- A waste is managed in one process for a part of a year and in another process for the rest of the year; or
- A waste is managed by two different processes at the same time.

If more than two on-site processes are used to treat, dispose, and/or recycle hazardous waste, use another line to report the remaining on-site processes.

Do not use Column I On-Site Process to report the following:

- The on-site management of the treatment residual generated by the first management method (on-site management of treatment residuals should be reported on a separate line); or
- To report treatment in a series of process units [refers to a single type of treatment (e.g., tank, distillation column, surface impoundment) in which hazardous waste is treated, disposed, or recycled]. Report only process systems, not process units.

See Appendix G for a list of Management Method Codes.

Column J - Receiving Facility

Do not report waste shipped via transfer facility or shipments of de-characterized wastes.

Space is provided to report shipments of the waste to three different off-site facilities. Enter the 12-digit EPA Identification Number of each receiving facility. If hazardous waste was shipped to a foreign country, do not record in Part Two; complete the Annual Hazardous Waste (HW) Report for Exports of HW to a Foreign Country report, which can be found under Hazardous Waste Forms on the DEQ website https://deq.mt.gov/twr/assistance, and submit a copy with this report.

Column K - Off-Site Management Method Code

Enter the Management Method Code (<u>Appendix G</u>) that best describes the way in which the waste was managed *at all the initial receiving facilities*.

Please review your previous cycle's management method codes to see if they still apply. If applicable, use those same codes for consistency.

See Appendix G for a list of Management Method Codes.

Column L - Quantity Shipped

Enter the total quantity of waste shipped **off-site** to each receiving facility (identified in Column J) during 2021. Report in the same unit of measure as stated in Column G. (These shipment quantities should equal the total quantity recorded on the hazardous waste shipping documents).

Multiple Shipments to Same Receiving Facility by Same First Transporter

If you had several shipments of the same hazardous waste stream during the year and the waste was sent to the same receiving facility by the same first transporter (listed as Transporter 1 on the shipping documents), <u>do not</u> report them separately, but as a one-line entry with the total quantity generated and shipped for all of 2021.

Multiple Shipments to Same Receiving Facility by Multiple First Transporters

If you had several shipments of the same hazardous waste stream during the year and the waste was sent to the same receiving facility by multiple first transporters (listed as Transporter 1 on the shipping documents), <u>do not</u> report them separately, but as a <u>one-line</u> entry with the total quantity generated and shipped for all of 2021 and breakdown the amount transported by each Transporter 1 in the Comments section below.

Multiple Shipments to Multiple Receiving Facilities

If you had several shipments of the same hazardous waste stream during the year and the waste was sent to multiple receiving facilities, on <u>one line</u> enter the total quantity generated for all of 2021 in Column F and breakdown the quantity shipped to each receiving facility noted in Column J.

Comments section:

This space may be used to explain, clarify, or continue any entry. If used, reference the appropriate line number. If additional space is required for comments, use a separate sheet of paper and place the generator's name and EPA ID number at the top of the page.

PART THREE - Waste Received from Off-Site

Part Three identifies hazardous wastes that were received from other hazardous waste sites and the method(s) used to manage them.

Hazardous wastes from the same off-site handler may be aggregated if a single Form Code (Appendix F) describes the physical form or chemical composition of the waste, and all of the waste is managed in a single process system [i.e., same Management Method Code (Appendix G)].

Line #:

A separate line entry is required for each different waste received.

A single copy of Part Three is included. Make as many copies of Part Three as needed to complete your Hazardous Waste Report and submit the completed page(s) with the original report form.

Additional Montana 2021 Instructions and Biennial Large Quantity Hazardous Waste Generator Report Forms can be located on the DEQ, Hazardous Waste Program, Forms, Reporting website at: https://deq.mt.gov/twr/assistance

Enter a consecutive Line number starting with 1 for each different waste or waste mixture.

Column A - Description of Waste

Supply the name or description of the waste (general type, source, type of hazard, and generic chemical name or primary hazardous waste constituents – example: Ignitable spent solvent from degreasing operation in tool production; mixture of mineral spirits and kerosene). Typically, this information is obtained from the hazardous waste shipping documents. This information is also found in Subparts C & D of 40 CFR Part 261.

Column B - EPA Hazardous Waste Codes

The EPA Hazardous Waste Code is a four-unit code made up of a single alphabetic prefix (D, F, K, P, U) followed by a three-digit number. This number may be found on hazardous waste shipping documents or in Subparts C & D of 40 CFR Part 261. If more space is needed to record waste codes, list additional codes in the Comments section below and reference the appropriate line number. See Appendix D.

Column C - Off-Site Handler EPA Identification Number

Enter the 12-digit EPA Identification Number of the off-site handler from which the waste was received.

If the site does not have an EPA Identification Number, it may be a CESQG or foreign country. Refer to the Special Instructions, Appendix C, for instructions on how to complete Column C for these off-site handlers.

Column D - Quantity Received in 2021

Enter the total amount of waste received in 2021, as described in Column A, that was received from the off-site handler reported in Column C.

Column E - Unit of Measure/Density

Enter the unit of measure code for the quantity of waste described in Column A. Units of measure, which must be used in this report and appropriate codes, are:

- Pounds (lb)
- Tons (i.e., short tons, T equal to 2,000 lb)
- Cubic yards (yd3 must include an accurate density)
- Gallons (gal must include an accurate density)

Acceptable units of density are:

lb/gal

- Specific gravity, referenced to the density of water at 4°C (39°F); if another reference density is used, please note such in the Comments section below.
- If density units are different than listed above, please note such in the Comments section below (i.e., grams per milliliter, g/ml, etc.)

Column F - Form Code

Enter the Form Code that best corresponds to the physical form or chemical composition of the hazardous waste reported in Column A.

See Appendix F for a list of Form Codes.

Column G - Management Method Code

Enter the Management Method Code that best describes the type of process system in which the waste was managed.

See Appendix G for a list of Management Method Codes.

Comments

Use this section as needed to explain anything contained in Part Three. If used, reference to the appropriate line number.

Appendix A

Reportable and Not Reportable Hazardous Wastes

Examples of Reportable Hazardous Waste:

- Generated on-site from a production process, service activity, or routine cleanup.
- Generated from equipment decommissioning, spill cleanup, or remedial cleanup activity.
- Removed from on-site storage.
- Derived from the management of non-hazardous waste.
- Derived from the on-site treatment (including reclamation), disposal, or recycling of previously existing hazardous waste (as a residual).
- Shipped off-site, including hazardous waste that was received from off-site (reported on the Part Three form) and subsequently shipped off-site without being treated or recycled on-site.
- Radioactive (source, special nuclear, or by-product material) wastes mixed with RCRA hazardous wastes should also be reported; be sure to mark "Yes" on Part One, Mixed Waste Generator. See <u>special instructions</u> regarding this waste.
- Hazardous wastes regulated only by your State should be reported if required by your State.

Non-Reportable Waste:

- Materials which are excluded from being a solid waste, e.g., any mixture of domestic sewage and other wastes that passes through a sewer system to a publicly owned treatment works (unless they are stored or treated in regulated units prior to being discharged). (40 CFR 261.4(a))
- Solid wastes that are excluded from being hazardous waste, e.g., petroleum-contaminated media and debris that fail the test for the toxicity characteristic (waste codes D018 through D043 only) and are subject to the corrective action regulations under 40 CFR Part 280. (40 CFR 261.4(b)(10))
- Waste exempt from regulation because the waste has not exited the raw material storage or production unit yet.
 (40 CFR 261.4(c))
- Hazardous waste that has been collected as a sample(s) for the purpose of determining its characteristic or composition, as specified in 40 CFR 261.4(d).
- Sample(s) undergoing treatability studies, as specified in 261.4(e).
- Sample(s) undergoing treatability studies at the laboratory or testing facility, as specified in 40 CFR 261.4(f).
- Hazardous waste that is a specified recyclable material such as ethyl alcohol or scrap metal, as specified in 40 CFR 261.6(a)(3).
- A residue of hazardous waste in an empty container or in an inner liner removed from an empty container, as specified in 40 CFR 261.7(a)(1).
- PCB wastes regulated under the Toxic Substance Control Act, as specified in 40 CFR 261.8, unless mixed with a hazardous waste.
- Wastes managed immediately upon generation only in on-site elementary neutralization units, wastewater treatment units, or totally enclosed treatment facilities as defined in 40 CFR 260.10. Any hazardous waste residues generated from these units, however, must be reported.
- Wastes recycled, without prior storage, only in an on-site process subject to regulation under 40 CFR 261.6(c)(2). Any hazardous waste residues generated from these units, however, must be reported.
- Used oil that is recycled and is also a hazardous waste solely because it exhibits a hazardous waste characteristic and is managed under 40 CFR Part 279. (40 CFR 261.6(a)(4))
- Spent lead-acid batteries managed under the requirements of 40 CFR Part 266, Subpart G, which includes persons who reclaim spent lead-acid batteries that are recyclable materials; persons who generate, transport, or collect spent batteries; persons who regenerate spent batteries; or persons who store them (other than spent batteries that are to be regenerated). (40 CFR 261.6(a)(2)(iv)) Any hazardous wastes generated during battery reclamation, however, must be reported.
- Universal wastes managed under 40 CFR 261.9 and 40 CFR Part 273. Any hazardous waste residues generated from these units, however, must be reported.
- Hazardous wastes that were exported out of the United States to a foreign country are not exempt and must follow the requirements of 40 CFR 262.56. An Annual Report must be filed as required under 40 CFR 262.56(b)

Appendix B

Excluded Wastes

This section presents a partial list of excluded materials and wastes. This list includes materials excluded from the definition of solid waste in 40 CFR 261.4(a) and solid wastes excluded from the definition of hazardous waste in 40 CFR 261.4(b). In addition, it also includes specific solid waste samples that are excluded from the definition of hazardous waste in 40 CFR 261.4(d)-(f). Finally, this list includes specific hazardous wastes, as described in 40 CFR 261.4(c), that are exempted from certain RCRA Subtitle C regulations.

Agricultural Waste Fertilizer §261.4(b)(2)

Analytical Samples §261.4(d)

Arsenic Treated Wood and Wood Products §261.4(b)(9)

Cement Kiln Dust §261.4(b)(8)

Coking By-products §261.4(a)(10)

Comparable/Syn gas Fuels §261.4(a)(16)

Domestic Sewage §261.4(a)(1)

Dredged Material that is Not Hazardous Waste §261.4(g)

Drilling Fluids and Produced Waters §261.4(b)(5)

Excluded Scrap Metal Being Recycled §261.4(a)(13)

Exported Wastes §262.56

Fossil Fuel Emission Control Waste §261.4(b)(4)

Hazardous Secondary Material Generated and Reclaimed Under the Control of the Generator 40 CFR 261.4(a)(23)

Hazardous Secondary Material Transferred Off-Site for Reclamation (Domestically or Internationally) or Remanufacturing

40 CFR 261.4(a)(24) 40 CFR 261.4(a)(25) 40 CFR 261.3(a)(27)

Household Waste §261.4(b)(1)(i)-(ii)

HTMR Condenser Residue §261.4(a)(11)

In situ Mining Materials §261.4(a)(5)

Irrigation Return Flows §261.4(a)(3)

Kraft Mill Steam Stripper Condensates Combusted at the Generating Mill §261.4(a)(15)

Certain Landfill Leachate §261.4(b)(15)

Certain Mining and Mineral Process Wastes

§261.4(b)(7)

Mining Overburden §261.4(b)(3)

Nuclear Material §261.4(a)(4)

Oil Filters §261.4(b)(13)

Petrochemical Recovered Oil Inserted into the Petroleum Refining Process §261.4(a)(18)

Petroleum-contaminated Media and Debris Subject to Corrective Action under 40 CFR 280 §261.4(b)(10)

Petroleum Refining Recovered Oil §261.4(a)(12)

Pulping Liquor §261.4(a)(6)

Refrigerants §261.4(b)(12)

Secondary Material Returned to Original Process §261.4(a)(8)

Secondary Material from Mineral Processing that is Recycled §261.4(a)(17)

Shredded Circuit Boards Being Recycled §261.4(a)(14)

Solvent-Contaminated Wipes (Except for Trichloroethylene Contamination)
40 CFR 261.4(b)(18)

Solvent-Contaminated Wipes Sent for Cleaning and Reuse 40 CFR 261.3(a)(26)

Spent Caustics from Petroleum Refining Used as Feedstock §261.4(a)(19)

Spent Wood Preserving Solutions and Wastewaters that have been Reclaimed and Reused §261.4(a)(9)

Spent Sulfuric Acid Used to Produce Virgin Sulfuric Acid §261.4(a)(7)

Treatability Study Samples §261.4(e)

Treatability Studies at Laboratories and Testing Facilities §261.4(f)

Trivalent Chromium Waste §261.4(b)(6)

Used Oil Distillation Bottoms §261.4(b)(14)

Used Cathode Ray Tubes (CRT) 40 CFR 261.4(a)(22)

Wastes Generated in Storage Tanks, Transport Vehicles, Pipelines, or Manufacturing Process Units §261.4(c)

Wastewater Point Source Discharge §261.4(a)(2)

Zinc Fertilizers made from Hazardous Secondary Materials and Hazardous Secondary Materials Used to Make Zinc Fertilizers 40 CFR 261.3(a)(20)-(21)

Appendix C

Special Instructions

These instructions explain how to complete the 2021 Hazardous Waste Generator Biennial Report for wastes and sites with unique regulatory or reporting requirements.

Asbestos, PCBs, Waste Oils

In most cases, **do not** report asbestos, PCBs, and waste oils. However, you **must** report them **if any** of the following conditions exist:

- (1) If your State specifically requires that these wastes be reported;
- (2) If a listed RCRA hazardous waste (i.e., EPA hazardous waste code that begins with "F", "K", "P", or "U") is mixed with asbestos, PCBs, or waste oil, in which case the entire mixture is a hazardous waste; or
- (3) If the waste possesses one or more of the characteristics that result in assigning EPA hazardous waste code beginning with "D". (This does not apply to used oil that is recycled as explained below.)

Do not report "used oil that is recycled and is also a hazardous waste solely because it exhibits a hazardous characteristic (criterion 3 above). Used oil that is recycled includes any used oil which is reused, following its original use, for any purpose (including the purpose for which the oil was originally used). Such term includes, but is not limited to, oil which is re-refined, reclaimed, burned for energy recovery, or reprocessed." (40 CFR 261.6(a)(4))

Groundwater Contaminated by Hazardous Waste

Groundwater contaminated by RCRA hazardous waste **is not** considered a solid waste and is, therefore, not classified as a hazardous waste. However, because hazardous waste is "contained in" the groundwater, it must be treated "as if" it were a RCRA hazardous waste if it is removed for treatment, storage or disposal. When reporting groundwater contaminated by hazardous waste in the 2021 Hazardous waste Report, observe the following conventions:

- (1) Enter "0" in Part Two Form, Column F (quantity). Explain in the Comments section that it is groundwater, not a hazardous waste that was generated on-site.
- (2) Report quantities managed on-site (Part Two Form, Column I, On-site Process Systems 1 and 2); quantities shipped off-site for management (Part Two Form, Column J, K, & L); and quantities received from off-site and managed on-site (Part Three Form, Column D)

http://yosemite.epa.gov/osw/rcra.nsf/0c994248c239947e85256d090071175f/d9e61a0505db4b6885256817006e32b8!OpenDocument.

¹ To determine if the contaminated media must be reported at all (generated OR treated): If the contamination is due to a characteristic waste, then it is the generator's responsibility to determine if the contaminated groundwater is a hazardous waste. Once the characteristics are eliminated, the media is no longer considered to "contain" hazardous waste. If a facility has first removed groundwater and is claiming that the groundwater is contaminated with a listed hazardous waste or "contains" listed hazardous waste, EPA Regions or Authorized States should make a site-specific determination of whether the media is a RCRA Waste. Please see: "Management of Remediation Waste Under RCRA," EPA530-F-98-026, October 14, 1998. RCRA Online Document No. 14291. Available online at:

Lab Packs

The following rules apply to the reporting of lab pack wastes in the 2021 Hazardous Waste Report:

- (1) You may aggregate lab pack wastes if they have the same Form Code. However, you must report them as separate wastes under the following conditions:
- (a) If they contain **RCRA** acute hazardous wastes (i.e., EPA hazardous waste codes F020, F021, F022, F023, F026, F027, and all "P" waste codes). Report separately from lab packs containing other RCRA hazardous wastes (all other EPA hazardous waste codes).
- (b) If they are **managed differently from each other**. For example, report lab packs shipped to landfills separately from those incinerated.
- (2) Enter a Form Code indicating lab packs (i.e., W001 or W004) on the Part Two Form, Column E or on the Part Three Form in Column F. These Form Codes are to be used with any lab pack, whether the wastes are gaseous, liquid, solid, or sludge.
- (3) It is **not** necessary to report every EPA hazardous waste code included in a batch of lab packs. Record one, or a few predominant, EPA hazardous waste codes in Column C of Part Two Form, or Column B of Part Three Form. If there are many EPA hazardous waste codes associated with the batch of lab packs, enter "LABP" in the first four-character field in Column C of Part Two Form, or Column B of Part Three Form; then enter "NA" in the remaining spaces for the EPA hazardous waste codes.
- (4) When reporting quantities for lab packs:

Include the weight of the containers if they are disposed (e.g., landfilled) or treated (e.g., incinerated) with the waste.

Exclude the weight of the containers if the waste is removed from the containers before treatment or disposal.

RCRA-Radioactive Mixed Wastes

Subpart K Laboratory Waste Clean-out

By themselves, source material, special nuclear material, or byproduct materials, as defined by the Atomic Energy Act of 1954 and amended by 42 U.S.C. 2011 et. seq., are not classified as hazardous wastes under RCRA. However, if these materials are mixed with a RCRA hazardous waste, the material is controlled under RCRA regulation, as well as under the Atomic Energy Act (DOE, NRC, and EPA) regulations, and is to be reported in the 2021 Hazardous Waste Report.

A Subpart K laboratory clean-out conducted in accordance with 40 CFR 262.213(a), is defined as: once per 12 months per laboratory, a laboratory will have 30 days to conduct a clean-out and will not have to count the hazardous waste that consists of unused commercial chemical products (either listed or characteristic) generated during those 30 days towards the eligible academic entity's generator status for the purposes of onsite accumulation. See 40 CFR 262.213(a)(1-4) for other Subpart K laboratory clean-out requirements. The waste generated from this clean-out should be reported on

the Part Two Form, Column D with a source code of "G17 – Subpart K Laboratory Waste Clean-out" with a generation amount of zero (0) (Column F). The amount shipped off-site or managed on-site will be reported in Columns I, J, K, & L of Part Two Form as appropriate.

Laboratory waste that is generated during routine operations (e.g., spent solvents or spent acids/bases) should be reported separately from Subpart K laboratory clean-out wastes. Routinely generated laboratory waste should be reported with source code(s) other than G17.

Wastes Received from Conditionally Exempt Small Quantity Generators (CESQGs)

Waste management facilities sometimes receive hazardous waste from large numbers of Conditionally Exempt Small Quantity Generators (CESQGs) or other sites that do not have RCRA EPA Identification Numbers. To minimize the response burden for filling out the **Part Three Form** for these wastes, you may aggregate the wastes across generating sites, in accordance with these quidelines:

- (1) All the wastes must have the same EPA hazardous waste Code (Column B), Form Code (Column F), and Management Method Code (Column G).
- (2) Wastes received from different States must be reported separately. For the off-site handler EPA Identification Number (Column C), the entry should include the two-letter postal code of the originating State, followed by the letters "CESQG".

For example, wastes received from several CESQGs in the State of Alaska (AK) that share a common EPA hazardous waste code, State Hazardous Waste Code, Form Code, and Management Method Code could be aggregated in a single waste block of the Part Three Form (e.g., Waste 1). In Column C, the off-site handler EPA ID number is entered as "AKCESQG". Note: This method of completing Column C can also be used for CESQG waste that is not aggregated.

Wastes Received from Foreign Countries

Reporting on Part Two Form – If your site was the generator of record and was the U.S. Importer for hazardous waste received from a foreign country (other than a foreign Department of Defense site, Maquiladora, U.S. territory or protectorate), complete Part Two Form. Enter the appropriate code in Column D – Source Code from the list of codes G63 through G75 – Hazardous waste received from [name of foreign country]. Include the Import Notification and other foreign generator information in the Comments. Also, mark "Yes" on the Part One Form, United States Importer of Hazardous Waste.

Report on the Part Three Form – If your site received hazardous waste directly from a generator in a foreign country (other than a foreign Department of Defense site, Maquiladora, U.S. territory or protectorate), complete a Part Three Form for the waste treated, recovered, or disposed at your site. This waste was not shipped to your site by a U.S. Importer. Report the code "FC" followed by the name of the foreign country in Column C – Off-site Handler EPA ID number. Include the Import Notification and other foreign generator information in the Comments section.

Appendix D

EPA Hazardous Waste Codes

A list of all the hazardous waste codes is shown below. See the regulations for details.

CHARACTERISTICS OF HAZARDOUS WASTE (SEE 40 CFR 261.24) – DXXX

HAZARDOUS WASTE FROM NON-SPECIFIC SOURCES (SEE 40 CFR 261.31) – FXXX

HAZARDOUS WASTE FROM SPECIFIC SOURCES (SEE 40 CFR 261.32) - KXXX

DISCARDED COMMERCIAL CHEMICAL PRODUCTS, OFF-SPECIFICATION SPECIES, CONTAINER RESIDUALS, AND SPILL RESIDUES THEREOF – ACUTE HAZARDOUS WASTE (SEE 40 CFR 261.33) – PXXX

DISCARDED COMMERCIAL CHEMICAL PRODUCTS, OFF-SPECIFICATION SPECIES, CONTAINER RESIDUES, AND SPILL RESIDUES THEREOF – TOXIC WASTES (SEE 40 CFR 261.33) – UXXX

Appendix E

Source Codes

Source codes describe the type of process or activity (i.e., source) from which a hazardous waste was generated. Review the groups and pick the appropriate code.

	Wastes from Ongoing Production and Service Processes (waste from general day to day manufacturing, production, or maintenance activities)			
Code	Source Code Description			
G01	Dip, flush or spray rinsing (using solvents to clean or prepare parts or assemblies for further processing - i.e., painting or assembly)			
G02	Stripping and acid or caustic cleaning (using caustics to remove coatings or layers from parts or assemblies)			
G03	Plating and phosphating (electro- or non-electroplating or phosphating)			
G04	Etching (using caustics or other methods to remove layers or partial layers)			
G05	Metal forming and treatment (pickling, heat treating, punching, bending, annealing, grinding, hardening, etc.)			
G06	Painting and coating (manufacturing, building, or maintenance)			
G07	Product and by-product processing (direct flow of wastes from chemical manufacturing or processing, etc.)			
G08	Removal of spent process liquids or catalysts (bulk removal of wastes from chemical manufacturing or processing, etc.)			
G09	Other production or service-related processes from which the waste is a direct outflow or result (specify in comments)			

Wastes Fro	Wastes From Other Intermittent Events or Processes			
Code	Source Code Description			
G11	Discarding off-specification, out-of-date, and/or unused chemicals or products			
G12	Lagoon or sediment dragout and leachate collection (large scale operations in open pits, ponds, or lagoons)			
G13	Cleaning out process equipment (periodic sludge or residual removal from enclosed processes including internal scrubbing or cleaning)			
G14	Removal of tank sludge, sediments, or slag (periodic sludge or residual removal from storage tanks including internal scrubbing or cleaning)			
G15	Process equipment change-out or discontinuation of equipment use (final materials and residuals removal including cleaning)			
G16	Oil changes and filter or battery replacement (automotive, machinery, etc.)			
G17	Subpart K laboratory waste clean-out (facility must have opted into the Subpart K rule to use this source code)			
G19	Other one-time or intermittent processes (specify in comments)			

Residuals From Pollution Control and Waste Management Process			
Code	Source Code Description		
G21	Air pollution control devices (e.g., baghouse dust ash, etc. from stack scrubbers or precipitators; vapor collection, etc.)		
G22	Laboratory analytical wastes (e.g., used chemicals from laboratory operations)		
G23	Wastewater treatment (sludge, filter cake, etc., including wastes from treatment before discharge by NPDES or POTW or by UIC disposal)		
G24	Solvent or product distillation (sludge, waste solvent)		
G25	Treatment, disposal, or recycling of hazardous waste - indicate in Column K (Part Two) or Column G the Management Method Code (enter the related H code) that produced the residuals		
G26	Leachate collection (from landfill operations or other land units)		
G27	Treatment or recovery of universal waste		

Wastes From Spills and Accidental Releases		
Code	Source Code Description	
G31	Accidental contamination of products, materials, or containers (other than G11)	
G32	Cleanup of spill residues (infrequent, not routine)	
G33	Leak collection and floor sweeping (ongoing, routine)	
G39	Other cleanup of current contamination (specify in comments)	

Wastes Fro	Wastes From Remediation of Past Contamination		
Code	Source Code Description		
G41	Closure of hazardous waste management unit under RCRA		
G42	Corrective action at a solid waste management unit under RCRA		
G43	Remedial action or emergency response under Superfund		
G44	Cleanup under State or voluntary program		
G45	Cleanup of underground storage tank		
G49	Other remediation (specify in comments)		

Waste Not Physically Generated On-Site		
Code	Source Code Description	
G61	Hazardous waste received from off-site for storage/bulking and transfer off-site for treatment or disposal	
For codes G63- G75	Hazardous waste received from a foreign country (other than a foreign Department of Defense site, Maquiladora, U.S. territory or protectorate). This site was the generator of record and is the U.S. Importer. Enter the appropriate code from the list below -	
G63	Hazardous waste received from Antarctica	
G64	Hazardous waste received from Aruba	
G65	Hazardous waste received from Bahamas	
G66	Hazardous waste received from Belgium	
G67	Hazardous waste received from Brazil	
G68	Hazardous waste received from Canada	
G69	Hazardous waste received from Holland	
G70	Hazardous waste received from Malaysia	
G71	Hazardous waste received from Mexico	
G72	Hazardous waste received from New Zealand	
G73	Hazardous waste received from Taiwan	
G74	Hazardous waste received from Venezuela	
G75	Hazardous waste received from other foreign country - see Comments for country name	

Appendix F

Form Codes

Form Codes describe the general physical and chemical characteristics of a hazardous waste. Review the groups and pick the appropriate code.

solid wastes	, or devices that are not easily categorized
Code	Form Code Description
W001	Lab packs from any source not containing acute hazardous waste
W002	Contaminated debris (see definition at 40 CFR 268.2(g) and requirements at 40 CFR 268.45): for example, certain paper, clothing, rags, wood, empty fiber or plastic containers, glass, piping, or other solids
W004	Lab packs from any source containing acute hazardous waste
W005	Waste pharmaceuticals
W301	Contaminated soil (usually from spill cleanup, demolition, or remediation); see also W512
W309	Batteries, battery parts, cores, casings (lead-acid or other types)
W310	Filters, solid adsorbents, ion exchange resins and spent carbon (usually from production, intermittent processes, or remediation)
W320	Electrical devices (lamps, fluorescent lamps, or thermostats usually containing mercury; CRTs containing lead; etc.)
W512	Sediment or lagoon dragout, drilling or other muds (wet or muddy soils); see also W301
W801	Compressed gases of any type

	iquids - Waste that is primarily inorganic and highly fluid (e.g., aqueous), with low inorganic solids and low organic content
Code	Form Code Description
W101	Very dilute aqueous waste containing more than 99% water (land disposal restriction defined wastewater that is not exempt under NPDES or POTW discharge)
W103	Spent concentrated acid (5% or more)
W105	Acidic aqueous wastes less than 5% acid (diluted but pH <2)
W107	Aqueous waste containing cyanides (generally caustic)
W110	Caustic aqueous waste without cyanides (pH >12.5)
W113	Other aqueous waste or wastewaters (fluid but not sludge)
W117	Waste liquid mercury (metallic)
W119	Other inorganic liquid (specify in comments)

Organic Liquids - Waste that is primarily organic and is highly fluid, with low inorganic solids content and low-to-moderate water content				
Code	Form Code Description			
W200	Still bottoms in liquid form (fluid but not sludge)			
W202	Concentrated halogenated (e.g., chlorinated) solvent			
W203	Concentrated non-halogenated (e.g., non-chlorinated) solvent			
W204	Concentrated halogenated/ non-halogenated solvent mixture			
W205	Oil-water emulsion or mixture (fluid but not sludge)			
W206	Waste oil managed as hazardous waste			
W209	Paint, ink, lacquer, or varnish (fluid – not dried out or sludge)			
W210	Reactive or polymerizable organic liquids and adhesives (fluid but not sludge)			
W211	Paint thinner or petroleum distillates			
W219	Other organic liquid (specify in comments)			

Inorganic Solids - Waste that is primarily inorganic and solid, with low organic content and low-to-moderate			
water content	water content; not pumpable		
Code	Form Code Description		
W303	Ash (from any type of burning of hazardous waste)		
W304	Slags, drosses, and other solid thermal residues		
W307	Metal scale, filings and scrap (including metal drums)		
W312	Cyanide or metal cyanide bearing solids, salts, or chemicals		
W316	Metal salts or chemicals not containing cyanides		
W319	Other inorganic solids (specify in comments)		

Organic Solids - Waste that is primarily organic and solid, with low-to-moderate inorganic content and		
water content; not pumpable		
Code	Form Code Description	
W401	Pesticide solids (used or discarded – not contaminated soils - see W301)	
W403	Solid resins, plastics, or polymerized organics	
W405	Explosives or reactive organic solids	
W406	Dried paint (paint chips, filters, air filters, other)	
W409	Other organic solids (specify in comments)	

Inorganic Sludges - Waste that is primarily inorganic, with moderate-to-high water content and low organic content; mostly pumpable		
Code	Form Code Description	
W501	Lime and/or metal hydroxide sludges and solids with no cyanides (not contaminated muds – see W512)	
W503	Gypsum sludges from wastewater treatment or air pollution control	
W504	Other sludges from wastewater treatment or air pollution control	
W505	Metal bearing sludges (including plating sludge) not containing cyanides	
W506	Cyanide-bearing sludges (not contaminated soils – see W512)	
W519	Other inorganic sludges (not contaminated muds – see W512; specify in comments)	

Organic Sludges - Waste that is primarily organic with low-to-moderate inorganic solids content and			
water content; pumpable			
Code	Form Code Description		
W603	Oily sludge (not contaminated muds – see W512)		
W604	Paint or ink sludges, still bottoms in sludge form (not contaminated muds – see W512)		
W606	Resins, tars, polymer or tarry sludge (not contaminated muds – see W512)		
W609	Other organic sludge (specify in comments)		

Appendix G

Management Method Codes

Management Method Codes describe the type of hazardous waste management system used to treat, recover, or dispose a hazardous waste. Select the final substantive method used. Review the groups and pick the appropriate code.

MANAGEMENT METHOD CODES

CodeManagement Method Code DescriptionH010Metals recovery including retorting, smelting, chemical, etc.H011Mercury recovery (include mercury retorting, bulb/lamp crushing and mercury vapor recovery, thermostat recovery, mercury from medical equipment recovery, mercury car switch recovery, etc.)H015Deployment/deactivation of airbag waste followed by metals recoveryH020Solvents recovery (distillation, extraction, etc.)H039Other recovery or reclamation for reuse including acid regeneration, organics recovery, etc. (specify in comments)H050Energy recovery at this site – used as fuel (includes on-site fuel blending before energy recovery, report only this code)	Reclam	ation and Recovery
Hot10		·
H011 Mercury recovery (include mercury retorting, bulb/lamp crushing and mercury vapor recovery, thermostat recovery, mercury from medical equipment recovery, mercury car switch recovery, thermostat recovery (distillation, extraction, etc.) H020 Solvents recovery (distillation, extraction, etc.) Other recovery or reclamation for reuse including acid regeneration, organics recovery, etc. (specify in comments) Energy recovery at this site − used as fuel (includes on-site fuel blending before energy recovery, report only this code) H061 Fuel blending prior to energy recovery at another site (waste generated on-site or received from off site) Destruction or Treatment Prior to Disposal at Another Site Code Management Method Code Description H040 Incineration − thermal destruction other than use as a fuel (includes any preparation prior to burning) H041 Open burning/open detonation (should be permitted under Subpart X with process code X01) H070 Chemical treatment (reduction/destruction/oxidation/precipitation); do not include immediate treatment in an exempt wastewater treatment unit with discharge to a NPDES-POTW (unless required by State) H081 Biological treatment: do not include immediate treatment in an exempted wastewater treatment unit with discharge to a NPDES-POTW (unless required by State) H090 Polymerization (LDR standard as treatment method) H100 Physical treatment only (adsorption/absorption/separation/stripping/dewatering); do not include immediate treatment in an exempted wastewater treatment unit with discharge to a NPDES-POTW (unless required by State) H110 Stabilization prior to land disposal at another site (encapsulation/stabilization/fixation) H120 Combination of chemical, biological, and/or physical treatment; do not include immediate treatment in an exempted wastewater treatment unit with discharge to a NPDES-POTW (unless required by State) H121 Neutralization only (no other treatment) Evaporation (as the major component of treatment; not reportable as H070, H081, H100, or H120		
H020 Solvents recovery (distillation, extraction, etc.) H030 Other recovery or reclamation for reuse including acid regeneration, organics recovery, etc. (specify in comments) H050 Energy recovery at this site – used as fuel (includes on-site fuel blending before energy recovery, report only this code) H061 Fuel blending prior to energy recovery at another site (waste generated on-site or received from off site) Destruction or Treatment Prior to Disposal at Another Site Code		
H039 Other recovery or reclamation for reuse including acid regeneration, organics recovery, etc. (specify in comments) H050 Energy recovery at this site − used as fuel (includes on-site fuel blending before energy recovery, report only this code) H061 Fuel blending prior to energy recovery at another site (waste generated on-site or received from off site) Destruction or Treatment Prior to Disposal at Another Site Code Management Method Code Description H040 Incineration − thermal destruction other than use as a fuel (includes any preparation prior to burning) H041 Open burning/open detonation (should be permitted under Subpart X with process code X01) H070 Chemical treatment (reduction/destruction/oxidation/precipitation); do not include immediate treatment in an exempt wastewater treatment unit with discharge to a NPDES-POTW (unless required by State) H081 Biological treatment: do not include immediate treatment in an exempted wastewater treatment unit with discharge to a NPDES-POTW (unless required by State) H090 Polymerization (LDR standard as treatment method) H100 Physical treatment only (adsorption/absorption/separation/stripping/dewatering); do not include immediate treatment unit with discharge to a NPDES-POTW (unless required by State) H110 Stabilization prior to land disposal at another site (encapsulation/stabilization/fixation) H120 Combination of chemical, biological, and/or physical treatment; do not include immediate treatment in an exempted wastewater treatment unit with discharge to a NPDES-POTW (unless required by State) H121 Neutralization only (no other treatment) H122 Evaporation (as the major component of treatment; not reportable as H070, H081, H100, or H120) H129 Other treatment that does not include onsite disposal (specify in comments) Disposal Code Management Method Code Description H130 Surface impoundment that will be closed as a landfill (with prior treatment and/or stabilization) H131 Land treatment or application (with any prior treatment; this waste was counted as hazardous	H015	Deployment/deactivation of airbag waste followed by metals recovery
(specify in comments) Energy recovery at this site – used as fuel (includes on-site fuel blending before energy recovery, report only this code) Fuel blending prior to energy recovery at another site (waste generated on-site or received from off site) Destruction or Treatment Prior to Disposal at Another Site Code Management Method Code Description H040 Incineration – thermal destruction other than use as a fuel (includes any preparation prior to burning) H041 Open burning/open detonation (should be permitted under Subpart X with process code X01) H070 Chemical treatment (reduction/destruction/oxidation/precipitation); do not include immediate treatment in an exempt wastewater treatment unit with discharge to a NPDES-POTW (unless required by State) H081 Biological treatment: do not include immediate treatment in an exempted wastewater treatment unit with discharge to a NPDES-POTW (unless required by State) H090 Polymerization (LDR standard as treatment method) H100 Physical treatment only (adsorption/absorption/separation/stripping/dewatering); do not include immediate treatment in an exempted wastewater treatment unit with discharge to a NPDES-POTW (unless required by State) H110 Stabilization prior to land disposal at another site (encapsulation/stabilization/fixation) H120 Combination of chemical, biological, and/or physical treatment, do not include immediate treatment in an exempted wastewater treatment unit with discharge to a NPDES-POTW (unless required by State) H121 Neutralization only (no other treatment) H122 Evaporation (as the major component of treatment; not reportable as H070, H081, H100, or H120) Disposal Code Management Method Code Description H130 Surface impoundment that will be closed as a landfill (with prior treatment and/or stabilization) H131 Landfill (with prior treatment standard) H132 Landfill (with prior treatment and/or stabilization) H133 Landfill (with prior treatment and/or stabilization) H134 Deep well or underground injection (with or without treatment; th	H020	Solvents recovery (distillation, extraction, etc.)
