

CAP AC-05
ABBREVIATED
REMEDIAATION SYSTEM DECOMMISSIONING AND REMOVAL
CORRECTIVE ACTION PLAN and BUDGET FORMAT

(This format may be appropriate for decommissioning and removing remediation systems and equipment, including Soil Vapor Extraction (SVE) blowers, Air Sparge (AS) compressors, product-recovery pumps, passive skimmers, piping, air-strippers, oil-water separators, electrical service connections, and wiring, and equipment sheds or boxes.

The Department of Environmental Quality (DEQ) developed the outline below to illustrate basic information an *Abbreviated Remediation System Decommissioning and Removal Corrective Action Plan (CAP) and Budget* must contain before it will be reviewed by DEQ. Abbreviated Corrective Action Plans and Budgets are requested by DEQ-PTS when either a plethora of site information already on-file makes additional background or detailed plan information redundant, or when the tasks are routine, or when a more in-depth corrective action plan and budget containing detailed background and proposed investigation or corrective action information may be generated after performance of the requested work. The following outline provides owner/operators and consultants with an understanding of the minimum requirements for preparation and submittal of an *Abbreviated Remediation System Decommissioning and Removal CAP and Budget* when specifically requested by the department. If any of the topics do not apply to your situation, please omit the section.

Unless otherwise requested by DEQ, specifically not requested in this context is a title page, table of contents, executive summary, site history or background narrative, site map, groundwater or plume maps, detailed descriptions of purpose/procedures/methods/or scopes of work, tabular presentation of historic data or results, photographs, multiple copies, or report binding. Tasks or items not listed below are considered unnecessary items unless specifically requested in writing (by letter or fax transmittal) by DEQ.

1.0 COVER LETTER (One Page)

- 1.1 Date
- 1.2 Responsible Party's Name and Mailing Address
- 1.3 Contact Person's Name and Mailing Address (if different from above).
- 1.4 Subject Line with the following information:
 - 1.4.1 Title (**Abbreviated Remediation System Decommissioning and Removal CAP and Budget**) for the petroleum release at (Facility Name, Street Address, Town, County, Montana); DEQ Facility ID (Number), Release (Number), and Work Plan ID (Number).
- 1.5 Introductory paragraph containing reference to DEQ request for abbreviated corrective action plan and budget, and purpose of proposed (specific tasks to be conducted) event.
- 1.6 Scope and schedule paragraph specifying the task(s) to be conducted, remediation equipment to be decommissioned and removed, and approximate date of the proposed work.
- 1.7 Disposal of waste plan.
- 1.8 Consultant's Name, Address, Phone Number, and E-mail Address (if not on letterhead).

2.0 BUDGET

- 2.1 Labor to prepare the subject abbreviated corrective action plan and budget
- 2.2 Unit-Cost Worksheet (preferable), or
- 2.3 Time and Materials (if requested by DEQ)
 - 2.3.1 Materials
 - 2.3.2 Equipment
 - 2.3.3 Labor
 - 2.3.4 Reporting (abbreviated report cover letter or standard report, whichever is required by DEQ), and equipment inventory and disposition list.
