Physical Address: 2790 1/2 US HWY 93 S, Kalispell
Facility ID: NA
TREADS ID: 17176
Event Number: 4123
Priority: Rescinded

Event 4123 History and Background

The Facility is located at 2790 1/2 US HWY 93 South, Kalispell, Flathead County, Montana. Event 4123 was discovered on December 15, 1987, when benzene was detected in the Garafino domestic water well. The source of contamination detected in the domestic well in December 1987 was never identified. The domestic water well was sampled in 2002 and 2003 and analyzed for VOCs via EPA Method 524.2; no VOCs were detected during both events. The DEQ LUST Trust Program closed the subject file based on the lack of detectable VOC contamination in the domestic well during the last two sampling events, which were completed on December 18, 2002, and May 8, 2003. In addition, VPH constituents were not detected in the water samples collected during the May 8, 2003, sampling event.
