| Facility Name: |  |  |  |  |  | Facility ID\# |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| *All metal components in conta ct with the soil that c onta in product (excluding vents and tank risers) must have CP. |  |  |  |  |  |  |  |  |  |
| UST Information: If a shaded question does not apply, leave it blank. |  |  |  |  | TAG \# | TAG \# | TAG \# | TAG \# | TAG \# |
| Is the tank constructed of $\square$ FRP, $\square$ clad with FRP, or $\square$ jacketed with HDPE so that cathodic protection is not required? |  |  |  |  |  |  |  |  |  |
| 2 Is the tank a STI-P 3 type tank or protected by a sacrificial anode? |  |  |  |  |  |  |  |  |  |
| 3 | Has impressed current cathodic protection been added to the tank? |  |  |  |  |  |  |  |  |
| 4 | Does the product pipe meet corrosion performance standards according to any of the criteria in $4 \mathrm{a}-4 \mathrm{~b}$ ? |  |  |  |  |  |  |  |  |
| Is the product pipe constructed of $\square$ FRP or $\square$ flexible pipe so that cathodic protection is not required? |  |  |  |  |  |  |  |  |  |
| b $\begin{aligned} & \text { Does a } \square \text { sacrificial anode or an } \square \text { impressed current system protect the } \\ & \text { product pipe? }\end{aligned}$ |  |  |  |  |  |  |  |  |  |
| 5 | Do flex connectors at turbine or dispenser meet corrosion performance standards according to any of the criteria $5 \mathrm{a}-5 \mathrm{c}$ ? |  |  | TURBINE |  |  |  |  |  |
|  |  |  |  | DISPENS |  |  |  |  |  |
|  | Are flex connectors protected by a $\square$ sacrificial anode or an $\square$ impressed current system? |  |  |  |  |  |  |  |  |
|  | Are flex connectors completely inside sumps or boxes so they are not in contact with the soil? |  |  |  |  |  |  |  |  |
|  | Are flex connectors protected by $\square$ watertight shrink sleeves or watertight boots? |  |  |  |  |  |  |  |  |
| 6 | Has the sacrificial or impressed current system been given a comprehensive soil potential survey by a qualified CP tester within $\square 3$ years (Or within $\square 6$ months, if new or repaired)? |  |  |  |  |  |  |  |  |
|  | Indicate the date of the last CP test. You are required to supply a copy of the test with the inspection. |  |  |  |  |  |  |  |  |
| 7 | Does the tank pass the -850 mv or the $100-\mathrm{mv}$ shift requirements? |  |  |  |  |  |  |  |  |
| 8 | Does the product pipe pass the -850 mv or the $100-\mathrm{mv}$ shift requirements? |  |  |  |  |  |  |  |  |
| 9 | Do the flex connectors pass the -850 mv or the $100-\mathrm{mv}$ shift requirements? |  |  |  |  |  |  |  |  |
| 10 | Are records available for 2 of the last 3 60-day rectifier inspections? |  |  |  |  |  |  |  |  |
| Comments: |  |  |  |  |  |  |  |  |  |
