FORM
NOI-07

**Notice of Intent Form
Construction Dewatering General Permit
MTG070000**

READ BEFORE COMPLETING THIS FORM:

Before completing this form, the applicant needs to read the Construction Dewatering General Permit (CDGP). Certification of this Notice of Intent (NOI) is certification with the requirements in the CDGP. This NOI must be completed by the owner/operator responsible for construction dewatering activities who are seeking coverage under the CDGP. Please read the attached instructions before completing this form. You must print or type legibly; forms that are not legible, incomplete, or unsigned will be returned. You must maintain a copy of the completed NOI Form for your records.

Section A – Application Status (Check one):

- New - No prior CDGP authorization or authorization request for this project/activity.
- Resubmitted - Permit Number: M T G 0 7 ___ ___ ___ ___
- Renewal - Permit Number: M T G 0 7 ___ ___ ___ ___
- Modification - Permit Number: M T G 0 7 ___ ___ ___ ___ *(Discuss Modification in Section K)*

Section B – Site or Activity Information:

Site Name: _____

Location (site physical address or directions): _____

Nearest City or Town: _____ Zip Code: _____ County: _____

Latitude: _____ Longitude: _____

Township/Range/Section (optional): T _____ / R _____ / S _____

Is this site or activity located on Tribal Lands? No Yes *(If yes, stop and obtain authorization from EPA)*

Standard Industrial Classification (SIC) Codes:

Provide at least one SIC code and description which best reflects the project or activity at the site described above.

Code	A. Primary Description	Code	B. Secondary Description
1		2	

Section C – Applicant (Owner/Operator) Information:

Organizational Formal Name: _____

Mailing Address: _____

City, State, and Zip Code: _____

Contact Name: _____ Title: _____

Phone Number: () _____ Email Address: _____

Section D – Authorized Representative:

In order for future reports, including Discharge Monitoring Reports (DMRs), to be signed by anyone other than the signatory for this NOI, a duly authorized individual(s) or position(s) must be identified. If one is not designated, then all reports must be signed by the signatory until such designation is made in writing [ARM 17.30.1323(2)]. (Check the appropriate box):

I designate the Contact listed in Section C as a duly authorized individual.

Or

I designate the following duly authorized representative for this permit (complete information below):

Name and Title, or Position Title: _____

Company Name (if different than the applicant): _____

Mailing Address: _____

City, State, and Zip Code: _____

Phone Number: () _____ Email Address: _____

Or

No duly authorized representative for this permit is designated at this time.

Section E – Outfalls and Receiving Water(s):

Provide the latitude and longitude (decimal degree format is preferred) for each dewatering outfall. The specified location should be after all treatment and before release to the receiving water. Provide the name of the initial receiving water. If the initial receiving water is unnamed, please also indicate the closest named drainage the receiving water flows into (i.e. unnamed tributary to Clear Creek). Attach additional sheets if necessary for more outfalls. **Each outfall to a different receiving water segment is subject to additional application fees and annual fees.**

Outfall No.	Latitude	Longitude	Receiving Surface Waters (Name)
001			
—			
—			
—			
—			
—			
—			
—			

MAP: Attach a USGS topographic map or aerial photo extending one mile beyond the property boundaries of the site or facility/activity identified in Section B depicting the facility or activity boundaries, any treatment area(s), outfall(s), major drainage patterns, and the receiving surface waters stated above.

Map Attached

Section F – Proximity to Contaminated Site(s): (See instructions for further guidance)

Will construction dewatering for this project occur in or near a known contamination site (SUPERFUND, leaking tank, etc.) or do you suspect the site has contamination?

No. (Proceed with Section G.)

Yes: **Delineate suspected area of contamination on Section E map, or provide an additional map. In addition, provide relevant information on the contamination site and address following:**

- (1) Distance from nearest suspected area of contamination to construction dewatering is: _____ feet.
- (2) Name of regulatory clean-up program: _____
- (3) Regulatory program project manager contacted (name/date): _____ / _____

The permittee must take a pre-discharge sample of the groundwater and/or surface water that is representative of expected dewatering discharge and have it analyzed for any known or suspected pollutants of concern in accordance with 40 CFR 136. The laboratory's detection level should be able to report at or below Required Reporting Value (RRV) contained in Department Circular DEQ-7. **The laboratory results need to be submitted with the NOI.** If carbon or other control technology is proposed, the sample may be collected after treatment, and a description of the treatment must be provided.

Copy of Lab Results enclosed. Sample date _____.

If analysis shows contaminants present at concentrations above the RRV, the authorization request for coverage under the CDGP will be denied. If there are no contaminants present at concentrations above the RRV, DEQ will continue to process the request. DEQ may require additional future testing in the authorization letter.

Section G – Description of Expected Discharge Duration and Mitigation Measures (Dewatering Plan):

Date construction dewatering discharge is anticipated to begin: _____

Date construction dewatering discharge is anticipated to end*: _____

(*Note that the authorized signatory is required to submit a request for termination after all construction dewatering activity is complete: any authorization that is open into a calendar year is liable for the annual fees for that year).

Rough estimate of average discharge flow rate [gallons per minute (gpm)] _____ gpm

Dewatering Control Plan: the applicant must complete a Dewatering Control Plan (Dewatering Plan) as part of the NOI process, and implement as part of the dewatering project. The Dewatering Plan will be maintained, and available to DEQ for on-site inspection. (DEQ does not require submittal of this Plan.)

Yes No Have you developed a site-specific Dewatering Control Plan? (See General Permit Part II.C.2.)

Dewatering discharge to state surface waters will be controlled by Best Management Practices evaluated in your Dewatering Plan (indicate which of the following will be employed to the extent known; include details in your plan):

- Yes No Unknown
- Yes No Unknown

Run-on prevention/diversion

Pumping process pretreatment (i.e. filtering sump or submersible pump protection)

- Yes No Unknown
- Yes No Unknown

Directed through vegetated swale prior to discharge

Constructed settling pond or structure, including hay bales

- Yes No Unknown
- Yes No Unknown

Dewatering bags

Anionic polymer-based flocculants and/or coagulants in accordance with manufacturers specifications (if yes, provide MSDS and specs)

- Yes No Unknown
- Yes No

Erosion Control for the discharge, including rip rap or baffles.

Other, describe:

Section H – Selection of Dewatering Category & Mixing Zone

Outfall _____ (*A separate Section H needs to be completed for each outfall listed in Section E)

Category Selection: The owner/operator selects the following category as representative of the conditions during the period of construction dewatering discharge from this outfall (*PICK ONE CATEGORY PER OUTFALL*):

- A. “Minimal Impact” with discharge to (*also select one of the three subcategories if Category A*):
- A.1 Storm Sewer or Ephemeral A.2 Dry intermittent segment A.3 Large river (*see list*)
- B. “Discharge Turbidity Limited to Prevent Impact” – Turbidity effluent limit for discharge to rivers, lakes, wetlands.
- C. “Real-Time Turbidity Demonstration” – Demonstration of no increase above background.

By selecting the appropriate category (above), the owner/operator certifies that they will comply with the effluent limits and monitoring requirements associated with that category for this outfall, as provided in the CDGP.

(*See instructions if the receiving water is classified as A-1 or A-closed.*)

Mixing Zone (for Categories A.3 and B, only):

A mixing zone for category A.3 (large rivers) or B (variable flows) is granted for rivers and lakes. (*If not A-3 or B-Categories indicate “NA” for this section.*) Indicate the amount of ambient surface water, at the driest time expected for the dewatering activity.

Stream width (at lowest flow expected): _____ ft x 10 = _____ ft mixing zone length

Lake/wetland area (at lowest volume): _____ ft² x 5% = _____ ft² mixing zone area (note: capped at 200 feet radius)

Section H (*con't*) – Additional Outfalls Category & Mixing Zone

Outfall _____ (*A separate Section H needs to be completed for each outfall listed in Section E)

Category Selection: The owner/operator selects the following category as representative of the conditions during the period of construction dewatering discharge from this outfall (*PICK ONE CATEGORY PER OUTFALL*):

- A. “Minimal Impact” with discharge to (*also select one of the three subcategories if Category A*):
- A.1 Storm Sewer or Ephemeral A.2 Dry intermittent segment A.3 Large river (*see list*)
- B. “Discharge Turbidity Limited to Prevent Impact” – Turbidity effluent limit for discharge to rivers, lakes, wetlands.
- C. “Real-Time Turbidity Demonstration” – Demonstration of no increase above background.

By selecting the appropriate category (above), the owner/operator certifies that they will comply with the effluent limits and monitoring requirements associated with that category for this outfall, as provided in the CDGP.

(*See instructions if the receiving water is classified as A-1 or A-closed.*)

Mixing Zone (for Categories A.3 and B, only):

A mixing zone for category A.3 (large rivers) or B (variable flows) is granted for rivers and lakes. (*If not A-3 or B-Categories indicate “NA” for this section.*) Indicate the amount of ambient surface water, at the driest time expected for the dewatering activity.

Stream width (at lowest flow expected): _____ ft x 10 = _____ ft mixing zone length

Lake/wetland area (at lowest volume): _____ ft² x 5% = _____ ft² mixing zone area (note: capped at 200 feet radius)

Section I – Turbidity Monitoring Method

Select the method you will use to conduct the required turbidity monitoring in accordance with the General Permit Part II.B

Laboratory Analysis: Name of lab: _____

Meter for on-site Turbidity Readings. Meter Manufacturer: _____

Section J – Sage Grouse Habitat: Visit the Montana Sage Grouse Habitat Conservation Program (Program) website to determine if the dewatering operation is located in designated sage grouse habitat (core, general, and/or connectivity).

See NOI-07 instructions for additional detail.

Yes. *Submit a copy of your application to the Montana Sage Grouse Habitat Conservation Program and attach the resulting consultation letter issued by the Program to you.*

No. Project is not located in a designated habitat.

Section K – Additional Information (provide attachments, as necessary)**Section L – CERTIFICATION**

Applicant Information: This form must be completed, signed, and certified as follows:

- For a corporation, by a principal officer of at least the level of vice president;
- For a partnership or sole proprietorship, by a general partner or the proprietor, respectively; or
- For a municipality, state, federal, or other public facility, by either a principal executive officer or ranking elected official.

All Applicants Must Complete the Following Certification:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information; including the possibility of fine and imprisonment for knowing violations. [75-5-633, MCA].

Certification of this form indicates conformance with the Construction Dewatering General Permit.
