Comments: _____

- The water system named above hereby certifies that proper notice has been provided to each consumer identified as served by a Lead, GRR, or Unknown service line. The water system also certifies that these notices and the following information were provided to such persons by the following deadline:
- Within 30 days of submitting the Lead Service Line Inventory to DEQ
- Include steps consumers can take to reduce exposure to lead in drinking water 141.85(a)(1)(iv)
- Include instructions for customers to notify the water system if they think the service line material has been identified incorrectly on the lead service line inventory.
- Include offer from system to sample the tap of any consumer served by line categorized as lead, galvanized requiring replacement, or unknown material.
- System acknowledges it's understanding of the requirement to repeat this notice annually, and submit lead service line inventory updates to Montana DEQ annually
- System acknowledges the requirement to notify consumers of any disturbances to lead, galvanized requiring replacement, or unknown service lines that may affect them, and provide pitcher filters or point-of-use devices for certain disturbances.
- System acknowledges the requirement to conduct outreach activities if system is unable to meet the mandatory service line replacement rate.
- System acknowledges the requirement to include information about lead, galvanized requiring replacement, and unknown service lines in public education after a lead action level exceedance, and in the annual Consumer Confidence Report.
- Water systems serving a large proportion of consumers with limited English proficiency are required to provide translations of these notices or translation support.
