

2025 Instructions for CDGP NOI-07 to determine potential contamination

(1) Determine proximity of contaminated sites, using the DEQ GIS link:

- <https://gis.mtdeq.us/portal/apps/webappviewer/index.html?id=f554f421c3e64f5599e76b5cb8dd3391>
 - Input the address, latitude/longitude, or scroll into the area to be dewatered.
 - Choose **Clean-up & Remediation** button on top RHS (next to “I”) and select all boxes except the “Mining District” layer.
 - Determine the distance from where you will dewater to the nearest contaminated areas (if there are any proximate).

(2) Contact relevant program(s) for information on all contaminated site(s) proximate to your dewatering activity
