

**Water Quality Division
Montana Pollutant Discharge Elimination System (MPDES)
Produced Water General Permit Fact Sheet – Minor Modification**

Permit No.: MTG310000

Facility Information: Oil and Natural Gas Production Operations

Receiving Water: Statewide Ephemeral Water Bodies of Montana
(Except Indian Lands, National Parks and the state waters in
Rosebud Creek, Tongue, Powder, and Little Powder River
watersheds)

Facility Contact: Applicant

Date: November 4, 2022

The most recent MPDES Produced Water General Permit (PWGP), MTG310000 became effective on December 1, 2021 with an expiration date of November 30, 2026.

Through this minor modification, DEQ is updating Section II.E.3 and Section II.E.4 of the PWGP. The reports for new and existing permittees not discharging at the time of their NOI submission will be due **January 28 and July 28** of each year until new discharge commences. DEQ is also correcting typographical errors in the PWGP.
